PROCEEDINGS OF SPIE

AI Photonics Technology Symposium (APTS 2026)

Xiang Zhang
Editor

17–19 May 2026
Wuhan, China

Organized by
Chinese Laser Press (China)
Shanghai Ephoton Optoelectronics Technology (China)
Tsinghua University (China)
Hunan Normal University (China)
Huazhong University of Science and Technology (China)
Wuhan University (China)
Nanchang Hangkong University (China)
Nanjing University of Science and Technology (China)

SPIE

Volume 14312

Proceedings of SPIE 0277-786X, V. 14312

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIEDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:
Author(s), "Title of Paper," in *AI Photonics Technology Symposium (APTS 2026)*, edited by Xiang Zhang, Proc. of SPIE 14312, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B … 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v *Conference Committee*

AI PHOTONICS TECHNOLOGY SYMPOSIUM (APTS 2026)

14312 02 **Blind-grooved glass optical bridge enabling high-efficiency fiber coupling for CPO** [14312-1]

14312 03 **Near-zero photon bioimaging with AI reconstruction** [14312-2]

14312 04 **Estimation of range-gated depth in autonomous driving with RGB geometric priors** [14312-3]

14312 05 **Synergistic design of an SU-8-based CMUT array for low-frequency ultrasonic detection under liquid loading** [14312-5]

14312 06 **Quantitative phase imaging for thick samples beyond the depth of field based on parallel multislice Fourier ptychographic microscopy** [14312-6]

14312 07 **Solid-state two-dimensional scanning free-space optical communication system** [14312-7]

14312 08 **3D measurement of transparent convex-concave defects on polarizer films based on polarization structured light** [14312-8]

14312 09 **Integrated snapshot computational spectral imaging sensor based on digital metasurfaces** [14312-9]

14312 0A **Physical-consistency-guided deep unfolding for metalens-based snapshot spectral imaging** [14312-10]

14312 0B **Research on coding angle self-calibration based on compound eye array** [14312-11]

14312 0C **SU-DVDNet: a video denoising method based on Swin Transformer UNet and FastDVDNet** [14312-12]

14312 0D **On-chip polarization beam-splitting gratings and integration methods for chip-scale atomic magnetometers** [14312-13]

14312 0E **Design and implementation of a MATLAB GUI-based multimodal medical image fusion system** [14312-14]

14312 0F **MEMS calorimetric gas flow sensor based on vanadium dioxide** [14312-15]

14312 0G **Metasurface enabled optical regulation for integrated dual-beam optically pumped magnetometers** [14312-16]

14312 0H **Optical 3D imaging using VCSEL-based speckle scanning projection** [14312-18]

14312 0I **An optical forward error correction encoding scheme based on a reconfigurable optical power splitter** [14312-20]

14312 0J **Research on GPU-based detection and perception simulation system** [14312-21]

14312 0K **Metasurface-integrated multichannel atomic magnetometer with diffusion optical pumping** [14312-22]

14312 0L **Self-shielded magnetic-field coil design for integrated atomic magnetometer arrays** [14312-23]

14312 0M **High-power and high-stability MOPA semiconductor laser for arrayed SERF atomic magnetometers** [14312-25]

14312 0N **Optically pumped atomic magnetometer based on a polarization-selective metalens** [14312-26]

14312 0O **Elliptical meta-polarizer with homogenized optical field for chip-scale optically pumped magnetometers** [14312-27]

14312 0P **Research on dual-trap differential self-referenced positioning and calibration of acousto-optic tweezers** [14312-29]

14312 0Q **Target-aware real-time imaging processing technology** [14312-30]

14312 0R **Multimodal image matching and autonomous positioning and velocimetry method** [14312-31]

14312 0S **Symmetry-breaking-induced chiroptical enhancement in reversed-S-shaped photonic crystal slabs** [14312-32]

14312 0T **Laser power measurement method based on evidential reasoning fusion** [14312-33]

14312 0U **A new strategy of microprocessing based on Galvo-AOD hybrid processing system** [14312-34]

14312 0V **Research on key technologies for lens defect detection based on recursive convolutional neural networks** [14312-36]
