Volume 14319

Proceedings of SPIE 0277-786X, V. 14319

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIEDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:
Author(s), "Title of Paper," in *International Conference on Artificial Intelligence, Big Data, and Electrical Automation (AIBDEA 2026)*, edited by Jie Xue, Li Han, Proc. of SPIE 14319, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B … 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

ix *Conference Committee*

POWER SYSTEM OPERATION AND CONTROL

14319 02 **The research on multidimensional fault diagnosis technology for combined electrical appliances based on electromechanical cooperative monitoring** [14319-37]

14319 03 **Simulation analysis of backflow prevention design and optimization of power station exhaust system** [14319-90]

14319 04 **Research on complex electromagnetic environment construction technology based on electromagnetic reverberation chambers** [14319-93]

14319 05 **Analysis of fault defects related to abnormalities in the rod control system caused by failures of the motor drive power card in the control rod holding coil of the reactor rod control and position system in nuclear power plants** [14319-46]

14319 06 **Research and application of power cable insulation condition testing technology based on short-time AC oscillating wave excitation** [14319-16]

14319 07 **Multidimensional integration and full cycle control: a new paradigm for equipment health management in new power systems** [14319-69]

14319 08 **Research on hazards and comprehensive protection against stray currents in subway systems** [14319-31]

14319 09 **Method for measuring mutual impedance of double-circuit transmission lines at multi-terminal stations without power outage** [14319-10]

14319 0A **Lightweight anomaly detection for power grid microservices based on temporal-aware fusion and graph neural networks** [14319-50]

14319 0B **Long-term operational reliability analysis of domestic security and stability control devices based on hardware-in-the-loop testing** [14319-78]

14319 0C **Research on participation strategies of pumped storage power stations in the spot market and frequency regulation market** [14319-11]

14319 0D **Study on evaluation index system and comprehensive assessment method for microgrid self-balancing capability** [14319-81]

14319 0E **Restoration strategy for power distribution networks considering the response to cyber attacks** [14319-24]

14319 0F **A distributed coordination optimization method for power transmission and distribution networks considering source-load-storage dynamic carbon potential interaction** [14319-2]

14319 0G **Optimization of hybrid energy storage capacity in microgrids based on a multi-strategy improved dung beetle optimization algorithm** [14319-32]

14319 0H **Non-contact visual recognition detection of galloping characteristics for overhead transmission lines** [14319-55]

14319 0I **Economic analysis of flexibility retrofit for CFB units coordinated with wind power operation: a cost-model-based approach** [14319-40]

14319 0J **Research on air conditioning load regulation and energy saving in public buildings based on reinforcement learning** [14319-23]

14319 0K **Adaptive suppression method for wide-frequency oscillation of three-phase grid-connected inverters based on selective reshaping of sequence impedance** [14319-88]

14319 0L **Automatic control method for FA terminal of 10kV overhead line feeder based on ACO algorithm** [14319-26]

14319 0M **A dynamic reconstruction method for power equipment operation and maintenance knowledge base based on large-scale language models** [14319-19]

14319 0N **A coordinated dispatch strategy for fluctuation mitigation in data centers considering flexible computing load** [14319-13]

14319 0O **Corrective control of power system cascading failures considering observability** [14319-57]

14319 0P **High-dimensional dynamic coupled graph spectral physics-informed neural network for power system prediction** [14319-9]

14319 0Q **EYOLO-AMT-based method for detecting hidden dangers in underground power cables** [14319-75]

SIGNAL PROCESSING, SENSING, AND INTELLIGENT SYSTEMS

14319 0R **Design of high-speed and reliable data transmission based on GTP** [14319-35]

14319 0S **Design of a weak signal acquisition system for hydrophone arrays** [14319-28]

14319 0T **Design and implementation of 32-channel underwater acoustic signal synchronous acquisition system based on FPGA** [14319-34]

14319 0U **Hybrid QIS-DTW algorithm for acoustic pipeline leak location: integrating shape-aware signatures with temporal alignment** [14319-6]

14319 0V **LSANet: a lightweight skipped-attention network for automatic modulation classification** [14319-3]

14319 0W **Research on absorbing boundary in electromagnetic propagation simulation based on machine learning** [14319-73]

14319 0X **Necessity of IMS for audiovisual service quality assurance in 5G private network for nuclear power plant** [14319-91]

14319 0Y **A SAC-based DRL approach for secure RIS-assisted NOMA transmission against internal and external eavesdropping** [14319-7]

14319 0Z **Implementation of a low-cost 1-bit reconfigurable reflectarray antenna for beam-steering applications** [14319-61]

14319 10 **Analysis and application of quartz crystal oscillator circuits** [14319-45]

14319 11 **Low-complexity direction-of-arrival estimation with coupling errors based on UAMP-SBL** [14319-5]

14319 12 **Theoretical research and verification on SAW multiplexer synthesis based on the COM model** [14319-72]

14319 13 **Design of a focusing servo platform for optical storage based on an MCU** [14319-87]

14319 14 **HarmonyOS system mobile offline terminal scanning and verification data structured storage method** [14319-27]

14319 15 **Design of an intelligent fire warning system based on STM32 microcontroller and edge AI** [14319-25]

14319 16 **A ruler recognition method based on rotated object detection** [14319-103]

14319 17 **Design and implementation of a PCB defect detection system based on improved YOLO11 and multi-model cross-validation** [14319-30]

14319 18 **Research on industrial defect detection in complex backgrounds based on improved YOLO26n** [14319-76]

14319 19 **Attention-enhanced LSTM model for bridge damage detection** [14319-52]

14319 1A **Design of an intelligent portable blood pressure monitoring system based on the STC89C52 single-chip microcomputer** [14319-62]

14319 1B **Intelligent multimodal face anti-spoofing detection system based on biometrics** [14319-102]

14319 1C **Multi-parameter dynamic TSEP mapping for online junction temperature estimation of SiC MOSFETs** [14319-42]

14319 1D **Chongqing dialect speech recognition based on fine-tuning lightweight pretrained models** [14319-14]

14319 1E **Emotion-driven music retrieval via cross-modal audio-visual representation learning** [14319-47]

MACHINE LEARNING AND CROSS-DISCIPLINARY APPLICATIONS

14319 1F **Experimental study on synergistic processing of combined electrical discharge deposition and electrical discharge subtraction machining** [14319-105]

14319 1G **Research on an automatic cable-guiding device for primary guide rope release in unmanned aerial vehicle deployment** [14319-101]

14319 1H **Entropy-guided test-time augmentation based on large language model for secret point recognition** [14319-41]

14319 1I **Intelligent recognition and diagnosis of transformer fault in new energy station based on machine learning and voice pattern vibration feature recognition** [14319-100]

14319 1J **Available wind power assessment of wind farms for AGC frequency regulation using the sand cat swarm algorithm** [14319-17]

14319 1K **Data-driven pricing and trusted trading mechanism for park-level flexible resources under energy-carbon coupling** [14319-15]

14319 1L **Research on the nonlinear response of strongly correlated electron systems in ultrafast laser fields based on the extended Hubbard model** [14319-84]

14319 1M **Design and experimental evaluation of an electrically heated vest for high-altitude cold environments** [14319-54]

14319 1N **Application of PFMEA in steering gear performance testing** [14319-67]

14319 1O **Coordinated longitudinal and lateral motion control of distributed-drive FSEC racing car based on NMPC** [14319-51]

14319 1P **Day-ahead power load curve forecasting based on multi-objective trade-off feature construction and selection** [14319-38]

14319 1Q **Parallel random forest on the sunway processor for ECG classification** [14319-4]

14319 1R **Parallel implementation and optimization of the A* algorithm on the sunway processor** [14319-49]

14319 1S **ES-DETR: an efficient and lightweight multi-target gonad recognition method for male and female *Procambarus clarkii* sorting** [14319-39]

14319 1T **Image encryption algorithm based on hyperchaotic system and wavelet transform** [14319-33]

14319 1U **Research on virtual surgery collision detection algorithm based on octree and OBB** [14319-8]

14319 1V **Prediction of the day-ahead power generation of photovoltaic power stations based on the transformer model and its historical power** [14319-85]

14319 1W **Adaptive feature extraction method of differentiated user side energy storage based on TF-IDF** [14319-77]

14319 1X **Automatic robust control method for pitch angle in wind turbine full load region based on FOMPC algorithm** [14319-22]

14319 1Y **Improved tri-training semi-supervised classification algorithm based on adaptive neighborhood entropy** [14319-21]

14319 1Z **A multi-view contrastive learning framework with information bottleneck for metabolite-disease association prediction** [14319-92]

14319 20 **Design and research on intelligent manufacturing production line of motor end cover for new energy vehicles** [14319-44]

14319 21 **Asynchronous spiking neural P systems for ternary logic architecture design, mathematical optimization, and energy analysis** [14319-36]

14319 22 **Research on obstacle avoidance path planning based on improved artificial potential field method** [14319-56]

14319 23 **A survey on fused path planning for mobile robots: improved A* and timed-elastic band (TEB) algorithms** [14319-58]

14319 24 **Classification of garbage based on lightweight deep learning multimodal method** [14319-71]

14319 25 **A study on the correlation between electricity sales and corporate output value, and upstream-downstream transmission effects based on PLSR, IV-LP, and NARDL** [14319-70]

14319 26 **Research on a high-specificity algorithm for Parkinson's disease tremor detection based on frequency domain representation optimization** [14319-43]

14319 27 **Location-routing optimization for multifunctional unmanned aerial vehicles in post-earthquake scenarios** [14319-60]

14319 28 **Research on spatiotemporal resource allocation methods for intersections facing spillover from flared approaches** [14319-79]
