SPIE

**Volume 14323**

Proceedings of SPIE 0277-786X, V. 14323

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at [SPIDigitalLibrary.org](http://SPIDigitalLibrary.org).

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *International Conference on Smart Oil and Gas; and Sustainable Development (SOGSD 2026)*, edited by Pascal Lorenz, Maki Habib, Proc. of SPIE 14323, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

---

**Paper Numbering:** A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

## INTELLIGENT TECHNOLOGIES FOR SUSTAINABLE OIL AND GAS DEVELOPMENT

---

- 14323 02 **AI-enabled low-carbon technologies for the oil and gas industry: a review** [14323-16]
- 14323 03 **Study on development technology and policy of highly deviated wells in low-permeability oil reservoirs based on machine learning and numerical simulation** [14323-25]
- 14323 04 **An early warning method for drilling anomalies based on change-point detection theory** [14323-15]
- 14323 05 **Research on screen pipe water control technology for oilfield high-aquifer completion** [14323-24]
- 14323 06 **Establishment and application of models for recovery factor and enhanced recovery via nitrogen injection in water-invaded gas reservoirs: a case study of the Kuqa foreland water-invaded gas reservoir** [14323-26]
- 14323 07 **Mechanism of gas flooding enhanced oil recovery in ultra-low permeability tight oil reservoirs** [14323-34]
- 14323 08 **Experimental study on the mechanism of unstable water injection for oil displacement in low-permeability sandstone reservoirs** [14323-33]
- 14323 09 **Application and value quantitative analysis of intelligent technologies in offshore oil and gas fields** [14323-19]
- 14323 0A **High-precision energy consumption prediction method based on numerical interpolation and multilayer long short-term memory for offshore oil and gas platforms** [14323-3]
- 14323 0B **Research on modeling and optimization strategies of shale gas gathering pipeline network in the Shunan Gas Field** [14323-35]
- 14323 0C **Machine learning-based gas well production decline model** [14323-18]
- 14323 0D **Multimodel-based dynamic liquid level measurement method for oil wells** [14323-27]
- 14323 0E **Predictive model for flow-induced accelerated corrosion and sand erosion rates in high-water-bearing sandstone shale gas wellhead pipelines** [14323-38]
- 14323 0F **A physics-informed deep learning model for inter-well connectivity analysis of waterflooding reservoirs** [14323-13]

- 14323 OG **Research on emulsion image segmentation and feature extraction methods for interface chemistry system analysis** [14323-20]
- 14323 OH **CM natural gas pipeline risk assessment model based on CV-gp** [14323-9]
- 14323 OI **Early warning method for stuck pipe detection based on DSformer neural network** [14323-17]
- 14323 OJ **Continuous inversion of rock mechanics parameters from well logs based on XGBoost and analysis of dominant factors** [14323-10]
- 14323 OK **Interdigitated electrode system for oil-gas tank interface localization based on K-means algorithm** [14323-21]
- 14323 OL **A hybrid AHP-entropy decision-support framework for smart and sustainable evaluation of oil and gas exploration and development** [14323-11]
- 14323 OM **A knowledge graph and large language model integration framework for intelligent oil and gas geological exploration** [14323-12]
- 14323 ON **Neural network-based water holdup detection method for high-water-cut, low-production horizontal wells** [14323-22]
- 14323 OO **Research on ultra-wide-angle camera perforation analysis and fracture interaction mechanism** [14323-4]
- 14323 OP **Efficient optimization of offshore natural gas dehydration processes based on data-driven approaches** [14323-2]
- 14323 OQ **Quantitative evaluation method of stabilizing oil production and controlling water cut in high water-cut oilfield and its application** [14323-32]
- 14323 OR **Study on circumferential surface crack propagation of S13Cr tubing used in oil and gas wells** [14323-29]
