PROCEEDINGS OF SPIE

International Conference on Industrial IoT, Big Data, and Smart Cities (IIoTBDSC 2026)

Victor Chang
Yongxin Zhu
Patrick C. K. Hung
Editors

24–26 April 2026
Hong Kong, China

Organized by
Aston University (United Kingdom)

Co-Organized by
The Hang Seng University of Hong Kong (Hong Kong, China)
Ontario Tech University (Canada)
University of Chinese Academy of Sciences (China)
Fluminense Federal University (Brazil)
University of Macau (Macau, China)
Chongqing University of Posts and Telecommunications (China)
Advance Education Technology Research Institute (China)

SPIE

Volume 14325

Proceedings of SPIE 0277-786X, V. 14325

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIEDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:
Author(s), "Title of Paper," in *International Conference on Industrial IoT, Big Data, and Smart Cities (IIoTBDSC 2026)*, edited by Victor Chang, Yongxin Zhu, Patrick C. K. Hung, Proc. of SPIE 14325, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B … 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

ix *Conference Committee*

INDUSTRIAL SENSOR AND OPTICAL HARDWARE

14325 02 **Bidirectional LSTM-transformer with adaptive channel attention for state of health prediction of lithium-ion batteries** [14325-6]

14325 03 **Maintenance and sequential control program optimization for secondary filters in power plant circulating water systems** [14325-7]

14325 04 **Study on wind-induced responses of transmission lines around high-altitude deep canyons** [14325-10]

14325 05 **Intelligent metering and multi-level energy-saving control model in industrial power management system** [14325-12]

14325 06 **Identifiability-guided voltage sweep design and self-consistent fusion extraction for Schottky diode I-V parameters with SPICE validation** [14325-14]

14325 07 **Low-power data fusion technology for optoelectronic sensors based on edge computing** [14325-32]

14325 08 **PMSM control using QESMA-optimized fuzzy PID with LabVIEW interface** [14325-60]

14325 09 **Fast deduction method for new energy distribution networks integrating conventional and extreme scenarios based on graph computing** [14325-67]

14325 0A **Preparation of self-cooling exterior wall blocks based on capillary-radiation synergistic effect and research on intelligent control system** [14325-68]

BIG HARDWARE–SOFTWARE INTEGRATION

14325 0B **Dynamic monitoring and evaluation of full-chain carbon footprint of smart cold chain integrating IoT and machine learning** [14325-3]

14325 0C **A neighbor discovery algorithm for UAV ad hoc networks in airport low-altitude emergency scenarios: the DM-ND algorithm integrating directional antennas and multi-channel parallelism** [14325-4]

14325 0D **A 5G-V2X and vehicle-road-cloud collaborative system for intelligent connected vehicles: architecture, algorithm, and experimental verification** [14325-5]

14325 0E **Power system attack detection technology based on multi-head attention mechanism and convolutional neural network** [14325-31]

14325 0F **Construction and time series prediction of electricity bill accounting system combined with CNN and LSTM joint model** [14325-36]

14325 0G **Design of an intelligent electrical equipment management system based on IoT technology** [14325-39]

14325 0H **High-speed modulation and demodulation technology for millimeter-wave OFDM based on frequency-domain interpolation** [14325-40]

14325 0I **GRU and graph theory-based modeling for multimodal data fusion and analysis in power marketing** [14325-48]

14325 0J **An improved PCL-RC-L+TCN model for cloud computing resource load forecasting** [14325-52]

14325 0K **Control design of non-contact fan control panel based on STM32 single chip microcomputer** [14325-58]

14325 0L **A training-free threshold-based method for adversarial patch detection on RISC-V edge vision processors** [14325-61]

14325 0M **Research on optimizing the operational efficiency of combined heat and power systems based on multi-parameter coupling** [14325-72]

14325 0N **Research on intelligent regulation technology for poultry transportation environment based on brake energy storage** [14325-83]

14325 0O **Research on the collaborative optimization method of architectural BIM model and computer simulation system** [14325-84]

DATA, ANALYTICS, AND APPLICATIONS

14325 0P **A points-based governance model for age-friendly and green urban renewal: an AI-enhanced smart city approach** [14325-2]

14325 0Q **High-dimensional data modeling technology for life prediction of key components of combustion-driven compressor units** [14325-8]

14325 0R **Design and application of digital twin system for substation intelligent inspection robot** [14325-15]

14325 0S **Research on operation and maintenance system of substation equipment based on digital twin and its construction** [14325-16]

14325 0T **Design and experimental study of a bio-inspired legged wall-climbing robot for vertical mud-cake surfaces** [14325-20]

14325 0U **Fault diagnosis and predictive maintenance system of new energy vehicle powertrain based on digital twin** [14325-24]

14325 0V **The comprehensive analysis system of BDANN: Bayesian domain-adversarial learning for uncertainty-aware cloud workload forecasting across heterogeneous data centers** [14325-26]

14325 0W **Research on intelligent proportioning of RAP materials for highways and pavement performance prediction based on deep reinforcement learning** [14325-28]

14325 0X **Multimodal data semantic retrieval method for smart grid** [14325-34]

14325 0Y **Structural design and performance analysis of a heavy-duty multi-joint robot with a combined rotary-axis cooperative deceleration mechanism** [14325-35]

14325 0Z **Multi-source data fusion method for power supply services oriented toward multi-scenario collaboration** [14325-37]

14325 10 **Power customer service risk early warning method based on high-frequency long chain thought chain reasoning under the condition of multi-source data deep fusion** [14325-38]

14325 11 **Intelligent warning method for operation status of power customer service center under multimodal perception technology** [14325-49]

14325 12 **Research on intelligent integration mechanism, technological evolution, and implementation path of digital twin and smart manufacturing** [14325-50]

14325 13 **Research on intelligent dispatching strategies for cluster-type urban traffic from a data-driven perspective** [14325-51]

14325 14 **Digital twin-driven smart city energy management systems: an integrated approach combining big data and machine learning** [14325-54]

14325 15 **Comparative analysis of acoustic cavitation primary and numerical calculation visual cavitation primary in propeller test** [14325-57]

14325 16 **Data-driven RFES modeling and simulation framework for intelligent agricultural harvesting equipment** [14325-66]

14325 17 **Real-time power clearing framework integrating automated state capture and transformer-based forecasting method** [14325-69]

14325 18 **Research on an early warning model for extreme emotions in campus public safety based on psychological characteristics and graph neural networks** [14325-71]

14325 19 **Implementation of data analysis algorithm for identifying abnormal states in environmental monitoring system** [14325-74]

14325 1A **CRAB: capacity-aware dynamic path planning for surface garbage collection robots** [14325-76]

14325 1B **Feature interaction interpretation based on SHAP: a subgroup-aware model interpretation framework** [14325-77]

14325 1C **Application research of intelligent monitoring technology for transportation infrastructure in smart city** [14325-78]

14325 1D **Research on intelligent diagnosis technology for data quality issues of power grid steady-state models based on knowledge graphs** [14325-80]

14325 1E **End-to-end digital control system for ground navigation and air traffic management in smart airports** [14325-81]

EMERGING SECURITY, PRIVACY, AND TRUST

14325 1F **Design of multi-source old-age care big data fusion and real-time analysis algorithm in Guangdong-Hong Kong-Macao Greater Bay Area** [14325-1]

14325 1G **Intelligent evaluation model of helicopter flight safety risk for complex meteorological conditions** [14325-9]

14325 1H **Cooperative control strategy of one-key automatic closed-loop testing system for substation relay protection** [14325-11]

14325 1I **Computable modeling and protection method of sensitive information leakage risk in data sharing scenario** [14325-13]

14325 1J **Neural network-based multi-parameter fault identification for hybrid-source transmission lines** [14325-18]

14325 1K **Reliability data management and application for civil aviation aircraft based on engineering analysis and statistical methods** [14325-21]

14325 1L **A GNN-based vulnerability explanation method with learnable edge-type weights** [14325-29]

14325 1M **Power user behavior feature extraction and smart metering pricing strategy based on multimodal deep fusion** [14325-30]

14325 1N **Comparative case study of government-led and market-enabled models in city brain construction and operation among Shanghai and Hangzhou** [14325-41]

14325 1O **Research on safety helmet wearing detection algorithm for workers at water conservancy construction sites based on the HDS-DETR network** [14325-47]

14325 1P **Fusion of LSTM and SVM to optimize data anomaly detection and demand forecasting in power marketing business expansion** [14325-65]

14325 1Q **FADED: unlocking few-shot defect detection via frequency-domain augmentation and distillation enhancement** [14325-70]

14325 1R **Research and system implementation of multi-service collaborative power supply service application technology** [14325-75]

14325 1S **Research on optimization of area coverage strategy based on improved particle swarm algorithm** [14325-79]
