Volume 14326

Part One of Two Parts

Proceedings of SPIE 0277-786X, V. 14326

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *International Conference on Machine Vision and Deep Learning (MVDL 2026)*, edited by Chuan Qin, Proc. of SPIE 14326, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

xi Conference Committee

Part One

INTERNATIONAL CONFERENCE ON MACHINE VISION AND DEEP LEARNING (MVDL 2026)

14326 02	Multi-space-time scale evaluation model and solution method for digital transformation of planning [14326-1]
14326 03	An intelligent computational framework for multisource cooperative interference based on dynamic simulation and particle swarm optimization [14326-2]
14326 04	Construction of digital governance model for urban traffic violations based on deep learning [14326-3]
14326 05	The practice of the ideological and political teaching system based on multidimensional data and LSTM model for dynamic analysis [14326-4]
14326 06	Hybrid modeling of pulsar timing noise via time-frequency analysis and neural networks with atmospheric delay compensation [14326-5]
14326 07	A study on QVE-based three-dimensional coupling assessment of urban land potential from the smart growth perspective: a case study of Pingshan County, Sichuan Province [14326-6]
14326 08	Research on a multimodal assessment model of bank employees' psychological safety and work engagement based on deep learning [14326-7]
14326 09	BIM-enabled dynamic safety early warning system for rail transit construction driven by multisource data fusion [14326-8]
14326 0A	STRAP: a deep learning-based predictive framework with low-latency evaluation for real-time streaming data [14326-9]
14326 0B	TCN-attention: a temporal convolutional network with self-attention mechanism for streamflow prediction in Chinese River Basins [14326-10]
14326 0C	Prediction and evaluation of parameter optimization effect of large language model fine-tuning [14326-11]
14326 0D	Heterogeneous storage acceleration architecture for AI training: collaborative optimization strategy of hierarchical caching and data prefetching [14326-12]
14326 0E	Social and behavioral determinants of health classification from clinical notes using Qwen3-8B with low-rank adaptation [14326-13]

- 14326 OF **Instruction finetuning DeepSeek-R1-8B model using LoRA and NEFTune for financial named entity recognition** [14326-14]
- 14326 OG **MSA-ResNet: multi-scale attention enhanced ResNet for artwork style classification in intelligent museum education systems** [14326-15]
- 14326 OH **The quantitative evaluation of the implementation effectiveness of educational tourism courses based on knowledge graph and visual semantic fusion** [14326-16]
- 14326 OI **Eye-tracking attention-enhanced multi-region content layout reinforcement learning ranking model** [14326-17]
- 14326 OJ **Implementation path of three-all education in universities driven by AI large model-based alumni resource collaboration** [14326-18]
- 14326 OK **Comprehensive career prospect evaluation under Gen-AI-based multi-indicator weighting and multi-objective optimization** [14326-19]
- 14326 OL **A hybrid QRF-GPR framework for probabilistic forecasting of competitive performance** [14326-20]
- 14326 OM **Fourier transform spectroscopy epitaxial layer thickness analysis** [14326-21]
- 14326 ON **A threshold-achievement time optimization model based on centered regression, interpolation, and clustering** [14326-22]
- 14326 OO **Machine learning-based risk prediction of corporate digital transformation** [14326-24]
- 14326 OP **Predicting post-purchase regret in green appliances using BERT-enhanced sentiment representation and a SMOTE-XGBoost hybrid model** [14326-25]
- 14326 OQ **Application of AI optimization algorithms in dynamic allocation of educational resources** [14326-26]
- 14326 OR **A coupled computational framework for labor trajectory prediction via scaling laws and dual-source validation** [14326-27]
- 14326 OS **Robustness and non-monotonic performance of deep feature-based VIO under low-frequency sampling** [14326-28]
- 14326 OT **Integration model of edge computing and OBE philosophy in advertising planning course instruction** [14326-29]
- 14326 OU **Deep reinforcement learning-driven multimodal assessment model for digital literacy under OBE constraints of food inspection** [14326-30]
- 14326 OV **Multi-level data fusion and machine learning in intelligent risk control: an automated risk assessment framework** [14326-31]

- 14326 0W **Deep learning models and speech data augmentation technologies for foreign language speech recognition** [14326-32]
- 14326 0X **An integrated learning risk prediction model for multisource data in nuclear power engineering** [14326-33]
- 14326 0Y **Server load change prediction and stability evaluation based on time series prediction model** [14326-34]
- 14326 0Z **Dynamic interactive behavior in social media based on multidimensional hybrid prediction models and spatio-temporal feature extraction** [14326-35]
- 14326 10 **A real-time defect detection system for cigarette appearance based on machine vision** [14326-36]
- 14326 11 **Predicting muscle fatigue during high-intensity interval training using explainable artificial intelligence** [14326-37]
- 14326 12 **Dual-domain adversarial training for realistic 4D facial makeup detection and generation** [14326-38]
- 14326 13 **Deep learning-driven machine vision system for real-time safety hazard recognition in tobacco production environments** [14326-39]
- 14326 14 **Recommendation of adaptive learning pathways for college Chinese based on reinforcement learning** [14326-40]
- 14326 15 **A real-time dynamic vehicle path optimization framework for urban logistics based on deep reinforcement learning** [14326-41]
- 14326 16 **A classical text translation method based on real-time neural post-editing** [14326-42]
- 14326 17 **Lightweight data mining and intelligent decision-making methods for IoT business terminals based on edge AI** [14326-43]
- 14326 18 **Application and innovation of computer-assisted instruction in physical education** [14326-44]
- 14326 19 **Natural language processing optimizes Japanese speech recognition technology for translation applications** [14326-45]
- 14326 1A **Dynamic blur association rule extraction method in real-time visual tracking** [14326-46]
- 14326 1B **Joint multi-task learning with knowledge graph embedding and semantic-enhanced encoding for teaching evaluation text analysis** [14326-47]
- 14326 1C **Big data-based digital film and television technology and intelligent content distribution algorithms** [14326-48]
- 14326 1D **Design and application research of an AI-based virtual simulation teaching system for nursing skills training** [14326-49]

- 14326 1E **Design and implementation of a big data-driven intelligent early warning system for psychological crises among vocational college students** [14326-50]
- 14326 1F **The application of AI-driven voice assistants in blended learning** [14326-51]
- 14326 1G **A method for monitoring exercise load and generating personalized rehabilitation plans based on deep learning** [14326-52]
- 14326 1H **Few-shot learning for identifying rare sports in unconstrained environments** [14326-53]
- 14326 1I **An autonomous grasping path planning algorithm for robotic arms that integrates open vocabulary visual perception** [14326-54]
- 14326 1J **Engineering modeling and implementation of a joint intervention effect prediction system driven by multimodal data fusion** [14326-55]
- 14326 1K **Recommendation of adaptive learning paths for English MOOCs based on reinforcement learning** [14326-56]
- 14326 1L **Knowledge graph-based digital twin robot production line fault diagnosis method** [14326-57]
- 14326 1M **Big data privacy protection and data security based on deep learning** [14326-58]
- 14326 1N **A system for intelligent verification of assignment files that integrates computer vision and natural language processing** [14326-59]
- 14326 1O **Visualization and interaction design methods for digital twin systems in smart manufacturing** [14326-60]
- 14326 1P **Rapid safety assessment of large-scale infrastructure empowered by edge AI** [14326-61]
- 14326 1Q **An end-to-end method for extracting financial document data using transformers** [14326-62]
- 14326 1R **User behavior prediction model based on big data analysis** [14326-63]

Part Two

- 14326 1S **Data-driven Python task-based teaching** [14326-64]
- 14326 1T **Intelligent production control method for cigarette manufacturing based on industrial data and machine learning** [14326-65]
- 14326 1U **Fault diagnosis and early warning for distribution network equipment operation and maintenance using artificial intelligence and digital twins** [14326-66]

- 14326 1V **Automated analysis method for mineral exploration data based on deep learning** [14326-67]
- 14326 1W **Deep learning models for urban rail transit traffic flow prediction** [14326-68]
- 14326 1X **Building a scoring optimization and decision support system for competition-based reality shows based on multi-model collaboration** [14326-69]
- 14326 1Y **Geometry-guided cooperative scheduling for multi-UAV smoke-screen occlusion under strict visibility criteria** [14326-70]
- 14326 1Z **Real-time multi-target face detection system for edge applications based on FPGA** [14326-71]
- 14326 20 **Multi-objective optimization modeling and risk-resilient robustness assessment for large-scale extraterrestrial material transfer logistics systems** [14326-72]
- 14326 21 **A robust frequency-domain approach for optical thickness measurement: global alignment and multibeam interference compensation** [14326-73]
- 14326 22 **Exploration of the integration path of modeling thinking for higher mathematics and intelligent recommendation algorithm** [14326-75]
- 14326 23 **Intelligent structural health monitoring using convolutional neural networks and IoT sensor fusion** [14326-76]
- 14326 24 **A modified XGBoost model for beef cattle body weight prediction** [14326-77]
- 14326 25 **Research on lunar colony logistics network optimization based on hybrid stochastic programming and SBO strategies** [14326-78]
- 14326 26 **Semantic-aware and variational mode decomposition-based multi-view learning for automotive categorization** [14326-79]
- 14326 27 **A constrained hierarchical Bayesian framework for latent variable inference and dual-response evaluation divergence analysis** [14326-80]
- 14326 28 **Multi-source perception data fusion for connected vehicle trajectory reconstruction and intention prediction** [14326-81]
- 14326 29 **Bionic time delay difference communication using bottlenose dolphin whistles** [14326-82]
- 14326 2A **Visual monitoring and structural health assessment method for key components of special equipment** [14326-83]
- 14326 2B **Recombinant protein structure prediction based on deep learning and its application in genetic engineering** [14326-84]
- 14326 2C **Generation of personalized learning paths in the digitalization of education: a study on dynamic optimization based on large language models** [14326-85]

- 14326 2D **Design of intelligent decision system for exercise health care intervention based on deep reinforcement learning** [14326-86]
- 14326 2E **The reconstruction of internal control framework for accounting information systems in the context of artificial intelligence** [14326-87]
- 14326 2F **Gesture-aware adaptive interface design using vision-language models for enhanced human-computer interaction** [14326-88]
- 14326 2G **Kinematic modeling and multi-objective optimization of passive shading design for campus buildings in low-latitude regions** [14326-89]
- 14326 2H **Federated learning-enhanced digital twin for intelligent warehouse management and demand forecasting** [14326-90]
- 14326 2I **A deep learning framework for COVID-19 detection: integrating attention modules into ResNet50 and optimizing cross-entropy loss function** [14326-91]
- 14326 2J **Typhoon multi-task prediction based on displacement residual learning** [14326-92]
- 14326 2K **High-dimensional representation learning via Grassmannian subspace fusion** [14326-93]
- 14326 2L **Design and implementation of a dual-teacher practical teaching platform for architecture based on virtual reality technology** [14326-94]
- 14326 2M **Intelligent corpus processing for precise data mining in French language teaching** [14326-95]
- 14326 2N **Knowledge graph construction from sparse educational data using improved association rules** [14326-96]
- 14326 2O **Behavioral intelligence optimization methods in higher education based on multi-agent collaborative decision-making model** [14326-97]
- 14326 2P **Construction of a deep learning model for optical imaging target recognition under complex lighting conditions** [14326-98]
- 14326 2Q **Deep learning is applied in abnormal behavior recognition for data security protection** [14326-99]
- 14326 2R **Cross-cultural analysis of the mechanism of difficulty in emotion recognition for children with autism in AI-driven inclusive education environments** [14326-100]
- 14326 2S **High-precision inversion of small earthquake source parameters based on transfer learning** [14326-101]
- 14326 2T **Optimization of digital twin model for switchgear vibration monitoring and computer-aided fault diagnosis** [14326-102]

- 14326 2U **Optimization of Japanese text automatic translation system based on computer vision**
[14326-103]
- 14326 2V **BERT-based short text sentiment classification model integrating dynamic pruning and multiscale attention** [14326-104]
- 14326 2W **The optimization of loading utilization for heterogeneous cargo in a single vehicle model under complex physical constraints** [14326-105]
- 14326 2X **Deep learning integrated with causal inference for professional sports league decision-making** [14326-106]
- 14326 2Y **Chromosomal abnormality diagnosis based on soft voting ensemble learning of logistic regression and XGBoost** [14326-107]
- 14326 2Z **LSTM-XGBoost hybrid neural network for multi-scenario inventory and multi-dimensional comprehensive demand forecasting in the supply chain** [14326-108]
- 14326 30 **Adaptability assessment and optimal strategy selection for parameter-efficient fine-tuning of large language models** [14326-109]
- 14326 31 **Auto-PTTD: automatic prompt selection for prompt-based test-time dehazing** [14326-110]
- 14326 32 **Grouping and optimal decision timing based on XGBoost-dual-objective optimization under multi-feature fusion** [14326-111]
- 14326 33 **Multi-stage feature modeling and dynamic optimization strategy for time-series decision systems** [14326-112]
- 14326 34 **Performance evaluation of the enhancement of service capacity of smart libraries enabled by artificial intelligence** [14326-113]
- 14326 35 **Comparative evaluation of optimized Bayesian versus improved machine learning methods for genomic selection of milk production traits** [14326-114]
- 14326 36 **Design of civil litigation evidence collection system driven by virtual simulation technology** [14326-115]
- 14326 37 **A machine learning-based risk identification and decision support framework for university student management systems** [14326-116]
- 14326 38 **Uncertainty quantification in deep learning via Bayesian inference mechanism** [14326-117]
- 14326 39 **Machine learning algorithms in the context of digital education** [14326-118]
- 14326 3A **Nutrient identification and estimation for complex mixed foods: an empirical study based on near-infrared spectroscopy and deep learning** [14326-119]
- 14326 3B **Federated learning-based collaborative assessment of distributed photovoltaic generation potential in multi-park systems** [14326-120]

- 14326 3C **Intelligent management platform architecture based on spatiotemporal graph networks and multi-modal anomaly identification under low-carbon constraints [14326-121]**
- 14326 3D **Construction of an automatic German inflection recognition model based on deep neural networks [14326-122]**
- 14326 3E **Multi-strategy cooperative prediction model for short-term electric load based on Ultra-NOA-CNN-DLKA-GRU [14326-123]**
- 14326 3F **Data-driven pattern generation and strategy optimization for study travel 4.0 based on multi-dimensional feature fusion [14326-124]**
- 14326 3G **Evaluation of the BERT model for text semantic similarity [14326-125]**
- 14326 3H **Multi-dimensional evaluation of waste sorting and recycling efficiency based on deep learning [14326-126]**
- 14326 3I **Traffic flow balancing and public transportation co-optimization under critical node failures [14326-127]**
- 14326 3J **A recommendation method for dynamic employment scenarios based on LoRA fine-tuning and incremental learning [14326-128]**
- 14326 3K **Optimization strategy for the timing of non-invasive prenatal testing based on K-means clustering and risk-efficiency ratio model [14326-129]**
- 14326 3L **Enhancing intent recognition in conversational human-computer interaction using LoRA-adapted Qwen2.5-7B [14326-130]**
