PROCEEDINGS OF SPIE

Third International Conference on Electronics, Electrical, and Control System (EECS 2026)

Ljiljana Trajkovic
Shunli Wang
Editors

22–24 May 2026
Dalian, China

Organized by
Dalian Jiaotong University (China)

Published by
SPIE

Volume 14327

Part One of Two Parts

Proceedings of SPIE 0277-786X, V. 14327

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIEDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:
Author(s), "Title of Paper," in *Third International Conference on Electronics, Electrical, and Control System (EECS 2026)*, edited by Ljiljana Trajkovic, Shunli Wang, Proc. of SPIE 14327, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B … 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

xiii *Conference Committee*

Part One

OPTOELECTRONIC COMMUNICATIONS AND EMBEDDED SYSTEMS

14327 02 **An optical-emission-based model predictive control method for discharge-state stabilization in biomass straw plasma electrolytic liquefaction** [14327-11]

14327 03 **Secure over-the-air firmware update mechanism for embedded IoT devices using lightweight cryptographic authentication** [14327-32]

14327 04 **Application of LEO satellite communication in electric power emergency scenarios** [14327-38]

14327 05 **Optimization of the spun quarter wave plate in FOCT based on spinning rate function continuity** [14327-40]

14327 06 **Design of a parallel multipath triple-band millimeter-wave filter for 5G/6G communications** [14327-42]

14327 07 **Fusion of sparse LiDAR point cloud and 2D optical image features for power grid defect duplicate elimination** [14327-57]

14327 08 **Digital predistortion of RF Doherty power amplifier based on GWO-MA-BiLSTM model** [14327-67]

14327 09 **Diamond NV center electrometry under single-axis magnetic field compensation** [14327-83]

14327 0A **A survey on GNSS anti-jamming technologies for civil aircraft: threats, approaches, and future trends** [14327-91]

14327 0B **Subcarrier power allocation algorithm and channel capacity boundary analysis in OFDMA-PLC-MIMO system** [14327-95]

14327 0C **Edge collaborative inference and resource scheduling optimization for optical sensing networks** [14327-118]

14327 0D **Precoding matrix optimization and inter-symbol interference cancellation algorithm in power line multiple-input multiple-output transmission** [14327-120]

14327 0E **Design and implementation of a single-chip microcomputer-based intelligent bathroom monitoring system** [14327-121]

14327 0F **Design of an optical-metrology-assisted MEMS thermoelectric microwave power sensor based on BP neural network optimization** [14327-131]

14327 0G **Optimization design and improvement of optical efficiency for tower-type heliostat field layout** [14327-135]

14327 0H **Measurement and optimization of epitaxial layer thickness using advanced optical interference and photonics technology** [14327-140]

14327 0I **A novel planar rectangular single-arm spiral antenna loaded with a monopole** [14327-1]

14327 0J **Design of a portable on-load tap changer system based on wireless ad hoc network** [14327-5]

14327 0K **Spatio-temporal graph neural network for state awareness and fault diagnosis in virtual power plant communication networks** [14327-25]

14327 0L **Data time slot reuse allocation algorithm based on colouring theory** [14327-51]

14327 0M **Design of on-line pipeline leakage monitoring system based on sensor network** [14327-63]

14327 0N **Development of static mass method cryogenic liquid flow standard device** [14327-66]

14327 0O **Study on structural optimization of MEMS microwave power sensors based on thermoelectric materials** [14327-81]

14327 0P **Active-active technology for business applications on a power grid dispatch cloud platform with one cloud and multiple chips** [14327-103]

14327 0Q **Research and implementation of low-frequency information extension technology for ZPW-2000 track circuit** [14327-106]

14327 0R **Multi-channel time velocity tester design based on narrow pulse broadening circuit** [14327-108]

14327 0S **Design of substation environmental safety monitoring system based on STM32** [14327-113]

14327 0T **Interference modeling and adaptive suppression algorithm for HPLC and 920MHz wireless fusion communication in complex building environments** [14327-122]

14327 0U **Development of a cable duct internal morphology measurement system based on a ring array of multi-beam lasers** [14327-123]

14327 0V **Design and implementation of a high-throughput piecewise approximate bilateral filter on FPGA for automated optical inspection systems** [14327-124]

14327 0W **Adaptive filtering and signal reconstruction methods for high-precision electrical parameter measurement systems** [14327-125]

14327 0X **Multimodal machine vision and intelligent control framework for automated cable surface laser cleaning** [14327-130]

14327 0Y **Design of a cross-regional power system interconnection operation bus based on a unidirectional optical fiber link** [14327-137]

14327 0Z **Research on security automation response scheme for power data middle platform** [14327-138]

EQUIPMENT DIAGNOSTICS AND ELECTRIFICATION

14327 10 **Thermal stability failure analysis model for surge protective devices based on an improved Bayesian network** [14327-4]

14327 11 **Dynamic ground fault location algorithm for distribution networks based on frequency-energy feature analysis** [14327-6]

14327 12 **A physics-informed CNN-LSTM for state-of-health reconstruction and remaining-useful-life prediction of lithium-ion batteries** [14327-7]

14327 13 **Transformer fault diagnosis using CatBoost optimized with LASSO and PLO** [14327-16]

14327 14 **OMA-optimized CNN for circuit breaker fault diagnosis** [14327-19]

14327 15 **Battery depletion analysis and optimization for smartphones based on continuous-time SOC dynamics and multi-physics field coupling** [14327-34]

14327 16 **Transformer fault diagnosis based on Fisher criterion and BKA-optimized KELM** [14327-41]

14327 17 **Motor bearing fault diagnosis based on CEEMDAN and GJO-optimized CNN** [14327-43]

14327 18 **Hybrid neural network-based state of health estimation for lithium-ion batteries in electric vehicles** [14327-44]

14327 19 **Real-time fault detection technology for power transmission and distribution equipment based on intelligent sensing** [14327-49]

14327 1A **Research on adaptive control strategy of CLLLC topology for on-board charger with wide-range voltage input** [14327-56]

14327 1B **Insulator fault diagnosis method for renewable energy generation systems based on LAF-YOLOv11** [14327-71]

14327 1C **Infrared image detection and deep learning-based fault recognition method for electrical equipment: intelligent diagnosis of abnormal heating in distribution cabinets** [14327-73]

14327 1D **A lightweight improved convolutional neural network method for vehicle motor condition monitoring** [14327-96]

14327 1E **Continuous-time optical-electrothermal SOC model for lithium-ion batteries under random dynamic loads** [14327-100]

14327 1F **Deep learning-based intelligent fault identification for power transmission lines** [14327-117]

14327 1G **Enhancing the operational reliability of circuit breaker pre-insertion resistors: failure mechanisms, modification measures, and condition assessment** [14327-13]

14327 1H **Transformer fault diagnosis based on hybrid feature selection and an improved differential evolution algorithm for optimizing convolutional neural networks** [14327-23]

14327 1I **OptoVib-former: self-supervised optical-vibration fusion transformer with thermal priors for rolling bearing remaining useful life prediction** [14327-30]

14327 1J **Simplified reinforcement learning for energy management of extended-range electric vehicles based on STM32** [14327-45]

14327 1K **A multi-factor coupled continuous-time model for smartphone battery discharge prediction** [14327-62]

14327 1L **Insulation condition assessment of 10kV cable joints based on multi-dimensional feature extraction and D-S decision fusion** [14327-76]

14327 1M **Automatic location and analysis technology for physical circuit faults in UHVDC control-protection system** [14327-77]

14327 1N **Thermal flow analysis and electrical safety control strategies for electric vehicle power batteries** [14327-84]

14327 1O **Circuit breaker fault diagnosis based on GWO-optimized CNN-LSTM** [14327-89]

14327 1P **A study on the diagnosis of power transformer winding faults considering power and voltage characteristics** [14327-104]

14327 1Q **Lithium-ion battery RUL prediction using CNN-BiLSTM-Attention** [14327-105]

14327 1R **Mechanical fault diagnosis of high-voltage circuit breakers based on EEMD energy entropy and BO-RF** [14327-109]

14327 1S **Wavelet-based compressed sensing for motor bearing fault diagnosis** [14327-112]

14327 1T **Design of a real-time prediction device for lithium battery SOC based on BP neural network and STM32 chip** [14327-114]

14327 1U **Battery state estimation and aging modeling for smartphones based on PSO-LS hybrid optimization** [14327-126]

14327 1V **Terminal voltage collapse characterization and endurance prediction model for mobile devices based on electrochemical-thermal coupled dynamics** [14327-129]

14327 1W **High-voltage circuit breaker fault detection based on improved complete ensemble empirical mode decomposition with adaptive noise and firefly algorithm-optimized least squares support vector machine** [14327-132]

14327 1X **Optical-sensing-oriented remaining useful life estimation of lithium-ion batteries using ALA-tuned VMD and a BiTCN-AM model** [14327-136]

Part Two

SMART GRID AND NEW ENERGY

14327 1Y **Large-model-driven multimodal monitoring data analysis for transmission lines: architecture, fusion, and risk warning** [14327-3]

14327 1Z **Deep reinforcement learning-based optimal energy management for microgrids** [14327-12]

14327 20 **Physics-guided temporal fusion transformer for probabilistic photovoltaic power forecasting under weather regime shifts** [14327-15]

14327 21 **Calculation of current carrying capacity of high-voltage AC submarine cables under different seabed conditions** [14327-18]

14327 22 **Optimal scheduling method for biomass off-grid microgrids considering load uncertainty** [14327-24]

14327 23 **Intraday rolling early-warning optimal dispatch algorithm for power systems considering emerging climate change risks** [14327-33]

14327 24 **Digital twin-driven short-term photovoltaic power forecasting using a hybrid TCN-transformer with residual correction** [14327-39]

14327 25 **Optimized design and implementation of a power grid load forecasting model for renewable energy integration scenarios** [14327-46]

14327 26 **An intelligent optimization method for non-pressurized fire suppression systems in power grid equipment protection combining optical sensing and numerical simulation** [14327-50]

14327 27 **Design and electrical field characteristics analysis of portable electrically remote-controlled insulation operation device for live replacement of insulator strings on 35kV straight towers** [14327-54]

14327 28 **Design of intelligent control system for energy internet based on edge computing** [14327-59]

14327 29 **Method of integrating deep reinforcement learning for electricity price prediction and intelligent trading strategy construction in smart grids** [14327-65]

14327 2A **Analysis of rated current-carrying capacity and temperature field of three-circuit 10kV cables under different laying methods** [14327-70]

14327 2B **Simulation and visual analytics of smart grid electricity theft based on digital twin and stochastic processes** [14327-72]

14327 2C **The hyperparameter automatic search engine is integrated and implemented in the power grid model development process** [14327-85]

14327 2D **Improved ip-iq harmonic current detection algorithm and simulation based on instantaneous reactive power theory** [14327-90]

14327 2E **An adaptive dual-decomposition informer framework for wind power forecasting** [14327-98]

14327 2F **A cluster-based short-term photovoltaic power forecasting method using K-means and CNN-BiLSTM-Attention** [14327-99]

14327 2G **An integrated power equipment testing system for grid and load simulation based on back-to-back transformation** [14327-119]

14327 2H **Physics-guided residual learning for day-ahead forecasting and scheduling in active distribution networks** [14327-141]

14327 2I **Ontology-driven billing engine for multi-dimensional electricity market settlement** [14327-8]

14327 2J **Coordinated control of an electricity–hydrogen integrated energy system for suppressing persistent power imbalance and frequent start–stop with solar optical fluctuation consideration** [14327-14]

14327 2K **Influence of current transformer layout and winding arrangement on protection action** [14327-22]

14327 2L **MSF-TransPV: a multi-source fusion transformer for short-term photovoltaic power forecasting** [14327-28]

14327 2M **Planning of microgrid combined cooling, heating, and power supply system considering complete reliability** [14327-36]

14327 2N **A GCN-LSTM multi-task learning framework for fault prediction and reliability management of hydropower generating units** [14327-61]

14327 2O **Application of rapid networking technology in switchgear fault handling of distribution room** [14327-75]

14327 2P **An adaptive reporting method and system implementation for power grid emergency information adapted to multiple scenarios** [14327-82]

14327 2Q **Design of grid intelligent dispatch system incorporating forecast error feedback mechanisms** [14327-87]

14327 2R **Design of hydrogen production system driven by photoelectric and thermoelectric coupling** [14327-93]

14327 2S **Design and testing of electrical interlocking circuit for transformer intervals in ultra-high voltage substations** [14327-97]

14327 2T **Power system transient stability assessment via physics-informed graph convolutional networks** [14327-133]

14327 2U **Anti-interference timing methods for power systems in complex environments** [14327-134]

14327 2V **A short-term power load prediction method based on Attention-LSTM in the context of optical-computing synergy** [14327-142]

CONTROL AUTOMATION AND POWER ELECTRONICS

14327 2W **Design of electrical control system for transmission line inspection unmanned aerial vehicle based on multi-sensor fusion and optical sensing** [14327-9]

14327 2X **A calibration method for non-binary successive approximation register analog-to-digital converters based on code density** [14327-53]

14327 2Y **Analysis of high reliability, openness and flexibility of DCS control system in nuclear power plant** [14327-17]

14327 2Z **Optical-informed multi-modal deep learning for breakdown strength and aging prediction of epoxy nanocomposites** [14327-21]

14327 30 **Recovery of quench energy in superconducting reactor** [14327-27]

14327 31 **Nonlinear H∞ optimal control of reconfigurable robot manipulator via adaptive torque estimation** [14327-35]

14327 32 **Design of a control system for a flexible clamping grounding rod with an electric remote-controlled lead screw** [14327-48]

14327 33 **Optical vision-based dynamic target recognition model for industrial robots using improved YOLOv13** [14327-55]

14327 34 **A novel DC–DC boost converter topology and its performance analysis: high step-up ratio with low device stress** [14327-58]

14327 35 **Design of piezoelectric-triboelectric hybrid generator for micro-energy harvesting and power management system** [14327-69]

14327 36 **Simulation study of thrust vector aircraft attitude control based on optimal feedback control** [14327-74]

14327 37 **Design of high-precision control and remote NDT system for industrial pipeline robots** [14327-86]

14327 38 **Iterative optimization of an L-type impedance matching network for reflection minimization in 1D cylindrical capacitively coupled plasma discharge** [14327-88]

14327 39 **Intelligent diagnosis and compensation of zero drift in main control valves for hydraulic servo systems** [14327-94]

14327 3A **Trajectory planning of unmanned aerial vehicles in uncertain environments based on model predictive control and dual-model control** [14327-115]

14327 3B **Dynamic on-resistance degradation mechanism and suppression methods for 1200V GaN high-voltage power devices** [14327-116]

14327 3C **Modeling and simulation of induction motor stall under voltage drop considering magnetic saturation and skin effect** [14327-127]

14327 3D **Optimization design of contact spring based on improved marine predators algorithm** [14327-139]

14327 3E **Design of transmission line robot platform for optoelectronic inspection payload and dynamic simulation of lateral obstacle-surmounting process** [14327-2]

14327 3F **A dynamic simulation model of urban rail transit train electrical circuit based on BFS algorithm** [14327-10]

14327 3G **The mechanism and compensation strategies of MOSFET second-order effects in nanometer CMOS for photodetector readout and imaging front-end circuits** [14327-20]

14327 3H **Control strategy of full-bridge modular multilevel converter for DC ice-melting application based on NACA4412 airfoil turbine blades** [14327-26]

14327 3I **Numerical analysis of carrier transport and in $In_{0.2}Ga_{0.8}N$ single-quantum-well blue light-emitting diodes** [14327-31]

14327 3J **Research and analysis of disturbances in closed-loop system** [14327-60]

14327 3K **Design and implementation of a multi-level safety protection system for elevators based on PLC and star-sealing technology in case of power failure** [14327-64]

14327 3L **Research on optimization control method for cooperative coverage time of multiple smoke grenades based on model predictive control** [14327-92]

14327 3M **Review on phase control principles, new function expansion and frontier applications of metasurfaces** [14327-101]

14327 3N **A small-sample fault diagnosis method based on efficient feature extraction and graph attention prototypical learning** [14327-102]

14327 3O **Design of an energy-feedback DC electronic load system based on STM32** [14327-107]

14327 3P **Electromagnetic-enhanced piezoelectric voltage flipping and synchronous charge extraction circuit for wave energy harvesting** [14327-111]

14327 3Q **A closed-loop automated control architecture with physics-informed compensation for springback regulation in aerospace tube bending manufacturing** [14327-128]

14327 3R **Investigation of cooling issues in high power density permanent magnet synchronous motors** [14327-144]
