PROCEEDINGS OF SPIE

International Conference on Aerospace Electronics Information and Intelligent Systems (AEIIS 2026)

Weilong Yin
Hao Zhang
Ziquan Yu
Editors

15–17 May 2026
Zhengzhou, China

Organized by
Zhengzhou University of Aeronautics (China)

Sponsored by
AEIC Academic Exchange Information Centre (China)

SPIE

Volume 14356

Proceedings of SPIE 0277-786X, V. 14356

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIEDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:
Author(s), "Title of Paper," in *International Conference on Aerospace Electronics Information and Intelligent Systems (AEIIS 2026)*, edited by Weilong Yin, Hao Zhang, Ziquan Yu, Proc. of SPIE 14356, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B … 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

vii *Conference Committee*

GUIDANCE, NAVIGATION, AND CONTROL OF AEROSPACE VEHICLES

14356 02 **An improved sliding mode guidance law for high-speed maneuvering targets** [14356-24]

14356 03 **Research on path planning of intelligent agents based on reinforcement learning** [14356-47]

14356 04 **Numerical investigation of the external aerodynamics of a high-speed conical projectile** [14356-3]

14356 05 **Research on deterministic path replanning algorithm in dynamic low-altitude environments** [14356-1]

14356 06 **Intelligent autonomous navigation for UAVs: a strategic hierarchical path planning framework** [14356-7]

14356 07 **Three-dimensional cooperative guidance method for seeker-less aircraft and beacon aircraft** [14356-19]

14356 08 **Autonomous control and integrated navigation system for quadrotor unmanned aerial vehicles** [14356-8]

14356 09 **Research on UAV formation obstacle avoidance algorithm based on artificial potential field method** [14356-11]

14356 0A **Design of quadrotor UAV formation control system based on hierarchical PD and consensus algorithms** [14356-45]

14356 0B **Research on path planning for low-altitude unmanned aerial vehicles** [14356-46]

14356 0C **A study on trajectory forecasting approach optimized by PSO-based TCN-attention mechanism** [14356-30]

14356 0D **Multi-UAV fire rescue path planning based on the improved DQN algorithm** [14356-41]

14356 0E **Analysis and solutions of environmental factors on drift angle and ground speed** [14356-23]

14356 0F **Federated GPB2-UKF-based GPS/INS fusion algorithm with error and failure resistance for USVs** [14356-40]

14356 0G **Integrated navigation algorithm for unmanned surface vessels in marine environments** [14356-25]

14356 0H **Design of mechatronic deployable mechanisms based on origami topology for space systems** [14356-26]

14356 0I **Integrated navigation system for helicopter UAVs in complex environments** [14356-33]

14356 0J **Rotary engine-propeller power bench test and electronic control system verification** [14356-2]

14356 0K **Attitude control of super-maneuverable aircraft using a wavelet neural network disturbance observer** [14356-21]

14356 0L **Research on flight test method for minimum control speed during approach and landing (VMCL) dynamic test in civil aircraft** [14356-27]

14356 0M **DoDAF-based system architecture modeling of air-defense UAV swarm operations** [14356-37]

SENSING AND INFORMATION PROCESSING FOR AEROSPACE SYSTEMS

14356 0N **Improved probability hypothesis density filter-based time difference of arrival passive localization and tracking method for UAV swarms** [14356-6]

14356 0O **Intelligent scheduling of aerospace precision forgings based on deep reinforcement learning and graph neural networks** [14356-34]

14356 0P **A domain-specific RAG framework for aviation intelligence: integrating localized LLMs with hybrid reasoning** [14356-18]

14356 0Q **Carrier phase tracking performance of a digital PLL under low SNR conditions for spread spectrum TT&C links** [14356-49]

14356 0R **A two-stage multi-AGV task allocation method based on capacity constrained K-means clustering and improved genetic algorithm for smart logistics parks** [14356-32]

14356 0S **Adaptive filtering and dynamic outlier rejection for laser ranging target distance prediction and densification** [14356-12]

14356 0T **GSC-ByteTrack: a motion-aware and scale-adaptive multi-object tracking framework** [14356-43]

14356 0U **Research on a highly reliable startup and loading technology for software-defined satellite payloads** [14356-16]

14356 0V **RFSoC-based radar frequency-measurement hardware for aerospace avionic monitoring and signal analysis systems** [14356-50]

14356 0W **Research on security and zero-trust access authentication for large-scale LEO satellite networking** [14356-48]

14356 0X **Global stochastic model adaptation for BDS-only static precise point positioning using post-fit residual statistics** [14356-51]

14356 0Y **Model-free 6D pose estimation for noncooperative space targets driven by implicit surface anchors** [14356-22]

14356 0Z **Robust design of sparse array-based sensing-aided physical layer secure transmission in mixed far-field and near-field environments** [14356-4]

14356 10 **Remote sensing image rotation target detection algorithm based on improved YOLO26n-obb** [14356-31]

14356 11 **A self-supervised dual-branch network for terrain matching localization** [14356-14]

14356 12 **Interference-mitigated multitask learning CNN based on statistical prior weights and feature-wise linear modulation** [14356-17]

14356 13 **VL-SEG: a vision-language multimodal segmentation method for intelligent maintenance of power equipment** [14356-29]

14356 14 **An intelligent maintenance decision-making method for power equipment based on multimodal large language model** [14356-35]

14356 15 **Worst-case secrecy rate maximization for near-field secure integrated sensing and communication with hybrid reconfigurable intelligent surfaces** [14356-36]

14356 16 **Statistical CSI-based covert beamforming for UAV-assisted SAGINs** [14356-42]

14356 17 **A multimodal fusion fault diagnosis method for partial discharge in switchgear** [14356-28]
