PROCEEDINGS OF SPIE

# *International Conference on Intelligent Transportation Systems and Automation Control (ITSAC 2026)*

**Said M. Easa**
**Maki Habib**
*Editors*

**4–5 July 2026**
**Luoyang, China**

*Organized by*
International Association of Applied Science and Technology (China)

*Sponsored by*
International Society for Advanced Scientific Research (Canada)
The Faculty of Applied Informatics, Tomas Bata University in Zlín (Czechia)
The College of Polytechnics Jihlava (Czechia)

*Published by*
SPIE

**Volume 14368**

Part One of Two Parts

Proceedings of SPIE 0277-786X, V. 14368

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIEDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:
Author(s), "Title of Paper," in *International Conference on Intelligent Transportation Systems and Automation Control (ITSAC 2026)*, edited by Said M. Easa, Maki Habib, Proc. of SPIE 14368, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

ISSN: 0277-786X
ISSN: 1996-756X (electronic)

ISBN: 9798902328438
ISBN: 9798902328445 (electronic)

---

**Paper Numbering:** A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B … 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

# Contents

xi *Conference Committee*

## Part One

**OPTICAL SENSING, PERCEPTION, AND DATA FUSION FOR INTELLIGENT TRANSPORTATION**

14368 02 **Adaptive DPIM-based integrated sensing and communication signal generation for LiDAR in intelligent transportation systems** [14368-48]

14368 03 **A quality-aware robust extended Kalman filter for low-cost GNSS/IMU vehicle localization in urban canyons** [14368-19]

14368 04 **Research on an extended Kalman filter-based method for autonomous localization and mapping of AGVs** [14368-88]

14368 05 **Improved YOLOv8 object detection method based on P2 detection head and ECA attention mechanism for autonomous driving scenarios** [14368-15]

14368 06 **Intelligent detection and big data analysis methods for power grid fault handling based on multimodal image fusion** [14368-40]

14368 07 **Optical-fiber-supported gas-aware smart-contract execution for electricity market clearing** [14368-30]

14368 08 **Dynamic optical ethernet path reconfiguration for substation secondary systems based on software-defined networking** [14368-61]

14368 09 **Intelligent 3D object recognition in complex scenes based on deep RGB–LiDAR fusion** [14368-66]

14368 0A **Cloud-edge collaborative dual-branch optoelectronic fusion model for streaming anomaly detection of new energy vehicle OBD data** [14368-85]

14368 0B **Multimodal large-model-driven intelligent inspection, maintenance decision, and closed-loop control for power transmission and substation equipment** [14368-89]

14368 0C **Intelligent defect detection method for transmission lines integrating UAV image recognition** [14368-95]

14368 0D **A traffic flow statistical detection method based on computer vision technology** [14368-101]

14368 0E **A study on an embedded system for workpiece defect detection based on a multiscale image algorithm using deep learning** [14368-103]

14368 0F **A comparative study of suspension-dynamics-based algorithms for real-time estimation of vehicle mass** [14368-1]

14368 0G **Adaptive fuzzy backstepping sliding mode control for rack-assist electric power steering systems** [14368-8]

14368 0H **Safety risk assessment of human–vehicle collaboration in advanced driver assistance systems based on AHP-ANN** [14368-53]

14368 0I **Research on automatic metering and adding control system for high-viscosity drilling fluid based on flow feedback** [14368-11]

14368 0J **Design and implementation of dual machine redundant liquid level control system based on S7-1200 programmable logic controller** [14368-29]

14368 0K **Vehicle path tracking control using a prescribed performance framework** [14368-20]

14368 0L **An MPC trajectory tracking strategy for autonomous vehicles considering actuator hard constraints** [14368-84]

14368 0M **Dynamic event-triggered adaptive optimal control for linear discrete time-varying systems** [14368-57]

14368 0N **Reinforcement-learning-based adaptive energy management strategy for microgrid energy storage systems** [14368-16]

14368 0O **Transfer-learning-based prediction of abrupt regional grid load changes under cold-wave weather** [14368-44]

14368 0P **Multiagent collaborative decision-making method for self-healing control of distribution networks** [14368-27]

14368 0Q **Fault early-warning and closed-loop thermal control for power transformers based on multisource sensor data fusion** [14368-22]

14368 0R **Multiscale modeling and digital twin technology for mechanical materials in intelligent manufacturing** [14368-32]

14368 0S **Deep reinforcement learning-based economic dispatch strategy for automation-oriented renewable grid integration** [14368-49]

14368 0T **Big data-driven methods for gas turbine performance prediction and energy-saving control** [14368-50]

14368 0U **Quantum-inspired energy-storage distribution-network reconfiguration with an optical-sensing interface for smart-infrastructure automatic control** [14368-31]

14368 0V **Quality-gated automatic repair and verifiable closed-loop control for anomalous power-grid operational data** [14368-63]

14368 0W **A causal-inference-fused model for automatic identification of outage causes in distribution networks** [14368-71]

14368 0X **An adaptive model predictive control method for autonomous driving obstacle avoidance considering trajectory prediction uncertainty** [14368-33]

14368 0Y **Neural-network-assisted model predictive control for formation tracking of wheeled mobile robots under Markov-switching communication topologies** [14368-39]

14368 0Z **Coordinated Volt/VAR control of distribution networks based on mixed-integer intelligent optimization** [14368-70]

14368 10 **GA-optimized Deep Neural Network for intelligent power-quality regulation in power systems** [14368-73]

14368 11 **Trusted smart-meter data-driven decision support and closed-loop control for distribution automation** [14368-58]

14368 12 **Automated control-oriented natural-language intelligent decision support system for power grid dispatch** [14368-81]

14368 13 **Edge-computing-based lightweight identity authentication and automated access control for distribution Internet of Things** [14368-76]

14368 14 **Intelligent leak detection and localization for surface oil production pipelines using time-frequency feature fusion and multisensor TDOA** [14368-83]

14368 15 **Deep learning-driven intelligent optimization and stability prediction for cigarette packing process parameters** [14368-74]

14368 16 **A neural surrogate model for radio-frequency and optical transmission through hypersonic plasma sheaths in onboard adaptive link switching control** [14368-79]

14368 17 **Adaptive current control for reactor control rod drive mechanisms via forgetting factor and self-tuning PID** [14368-90]

14368 18 **A neuro-symbolic computing-based method for power-grid transient stability assessment** [14368-98]

**OPTICAL COMMUNICATION, V2X, AND NETWORKED AUTOMATION SYSTEMS**

14368 19 **Design of an AI sunroom control system based on neural network speech recognition and multisensor intelligent perception fusion** [14368-7]

14368 1A **Joint design of physical layer network coding and block codes based on QAM modulation for IoT and IoV communications** [14368-18]

14368 1B **An asymmetric channel-based key generation protocol for RFID tags in connected vehicle environments** [14368-4]

14368 1C **Cloud-edge collaborative state monitoring and fault diagnosis for smart distribution system operation and maintenance** [14368-17]

14368 1D **Cloud-edge automated decision support and coordinated control system** [14368-21]

## Part Two

14368 1E **Reliability analysis of distribution automation control systems considering 5G communication latency** [14368-87]

14368 1F **A privacy-preserving federated learning framework for load forecasting in electrified intelligent transportation systems** [14368-47]

14368 1G **Edge computing resource optimization allocation method for virtual power plants** [14368-51]

14368 1H **Real-time perception of distributed energy resource access status based on an event-driven architecture** [14368-67]

14368 1I **A LightGBM algorithm-based in-vehicle network intrusion detection method for intelligent connected vehicles** [14368-55]

14368 1J **Low-latency cloud-edge fault diagnosis and location for networked distribution automation systems** [14368-75]

14368 1K **An intelligent analysis model for detecting anomalies in autonomous vehicle networks with enhanced edge computing** [14368-77]

14368 1L **A cloud-native log analytics-based operating fault tracing method for power monitoring systems** [14368-91]

14368 1M **Cyber-physical security protection model for automation-oriented smart grids considering cyber-attack risks** [14368-94]

14368 1N **Anomaly traffic detection and attack traceability for power communication networks** [14368-96]

**INTELLIGENT TRANSPORTATION SYSTEMS: MODELING, OPTIMIZATION, AND SMART MOBILITY**

14368 1O **AI-Driven Collaborative optimization of Berth shifting, allocation, and vessel scheduling in restricted-channel ports for enhanced operational resilience** [14368-3]

14368 1P **Multiobjective optimization of sea-rail intermodal transport routes from Yibin Port to Europe based on NSGA-II algorithm** [14368-23]

14368 1Q **Multisource risk fusion and safe path planning for low-altitude campus inspection** [14368-10]

14368 1R **Emergency logistics location-routing problem under facility failure uncertainty: a two-stage stochastic programming approach** [14368-14]

14368 1S **A multi-constraint hosting capacity assessment framework for coupled power-transportation networks considering heterogeneous EV charging behaviors** [14368-82]

14368 1T **Design of intelligent warehouse stacker control system for terminal logistics nodes of intelligent transportation** [14368-13]

14368 1U **Dynamic traffic perception-based route optimization and adaptive control strategy for agricultural product cold chain distribution** [14368-34]

14368 1V **Spatiotemporal charging load modeling for intelligent electric vehicle charging systems based on traffic–distribution network coupling** [14368-5]

14368 1W **Multistrategy improved honey badger algorithm and its application in unmanned aerial vehicle path planning** [14368-78]

14368 1X **A reproducible Deep Reinforcement Learning baseline for tourist bus route planning: a case study in Ha Noi** [14368-12]

14368 1Y **A spatiotemporal attention network for wind-power grid-connection fluctuation forecasting** [14368-25]

14368 1Z **Big-data mining-based identification of abnormal electricity consumption behavior for urban transport-energy distribution networks** [14368-38]

14368 20 **Intelligent charging scheduling algorithm for electric vehicle cluster access in transportation charging facilities** [14368-35]

14368 21 **Blockchain-based distributed photovoltaic energy trading and settlement mechanism for traffic-oriented charging facilities** [14368-68]

14368 22 **An intelligent taxi dispatching system based on spatiotemporal queueing model and discrete-event simulation** [14368-93]

## OPTICAL SENSING, SAFETY, AND RELIABILITY FOR AUTOMATED SYSTEMS

14368 23 **TRIZ-based optimal design of waterproofing membrane laying industrial machine** [14368-43]

14368 24 **BP neural network-based self-tuning PID temperature control for coating ovens** [14368-9]

14368 25 **Design and posture-stability analysis of a three-point stable-support automatic docking-and-charging mechanism for high-center-of-gravity humanoid robots** [14368-86]

14368 26 **Innovative design of golden bracelet automatic calendar equipment based on TRIZ theory** [14368-24]

14368 27 **Design of a remote operation and maintenance assistance system for substations based on augmented reality and three-dimensional modeling** [14368-36]

14368 28 **Intelligent fire-risk assessment model for cable tunnels based on multimodal data fusion** [14368-41]

14368 29 **Intelligent fault diagnosis and protection strategy for flexible HVDC transmission systems** [14368-42]

14368 2A **Dynamic division method of virtual power plant based on the improvement of renewable energy consumption capacity** [14368-26]

14368 2B **Recognition of power-grid frequency anomaly evolution trends based on a large time-series model** [14368-37]

14368 2C **An intelligent risk evolution simulation method for grid operation in offshore wind power export systems** [14368-28]

14368 2D **Probabilistic reliability assessment method for urban power grids based on Bayesian networks** [14368-45]

14368 2E **High-performance parallel computing-based fast power-flow solution technology for large-scale power grids** [14368-46]

14368 2F **Drift-aware feedback correction and decision gating for renewable-energy station forecasting and automatic control** [14368-52]

14368 2G **User behavior modeling and group response prediction for flexible load aggregation** [14368-54]

14368 2H **Intelligent analytics and automated collaborative control of source grid-load-storage power-energy coupled systems based on a power data middle platform** [14368-69]

14368 2I **Synchrophasor data-stream compression and fast reconstruction for grid stability control** [14368-72]

14368 2J **Knowledge-graph-based case reasoning and auxiliary decision-making method for power grid faults** [14368-60]

14368 2K **Automatic detection of spatial safety clearances in substations based on 3D point cloud semantic segmentation** [14368-65]

14368 2L **Digital-twin-based visual monitoring and automated maintenance decision support for substation equipment health** [14368-56]

14368 2M **Substation equipment target recognition and path planning for power inspection robots** [14368-59]

14368 2N **Optical-data-aware architecture of a containerized microservice platform for power dispatch simulation** [14368-62]

14368 2O **Graph-database-based relationship tracking and risk propagation analysis for power equipment assets** [14368-64]

14368 2P **Graph neural network based topology recognition and operational state assessment for complex power-grid automation control** [14368-80]

14368 2Q **A study on the optimal dispatch of storage and load in microgrids considering coordinated control of wind and solar power** [14368-92]

14368 2R **Privacy-computing-based potential evaluation and model predictive control for user-side demand response** [14368-97]

14368 2S **Resilience assessment and intelligent allocation of emergency repair resources for transmission and distribution networks under typhoon disasters** [14368-99]

14368 2T **Intelligent fusion of multisource disaster information and situation generation for power grid emergency command** [14368-100]

14368 2U **Design of an automated rule-based verification system for power dispatching regulations with fiber-optic sensing integration** [14368-102]
