

PROCEEDINGS OF SPIE

International Conference on Precision Instruments and Optical Engineering (PIOE 2026)

**Jing Wang
Shuhua Gao**
Editors

**22–24 May 2026
Jinan, China**

Organized by
Shandong University (China)

Sponsored by
AEIC—Academic Exchange Information Centre (China)

Published by
SPIE

Volume 14372

Proceedings of SPIE 0277-786X, V. 14372

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *International Conference on Precision Instruments and Optical Engineering (PIOE 2026)*, edited by Jing Wang, Shuhua Gao, Proc. of SPIE 14372, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

vii *Conference Committee*

OPTICAL SENSING AND METROLOGY

- 14372 02 **Fiber-optic microcavity temperature and humidity sensor based on the Vernier effect**
[14372-67]
- 14372 03 **Study on the enhancement of weak measurement amplified shift by surface exciton polaritons** [14372-23]
- 14372 04 **PZT-based active phase stabilization technology for Fizeau fiber probes** [14372-58]
- 14372 05 **A low-noise LED excitation and opto-mechanical coupling system for fluorescence detection** [14372-63]
- 14372 06 **Non-destructive optical measurement system for high aspect ratio micro-holes based on Raspberry Pi** [14372-12]
- 14372 07 **Computational model for inverting the thickness of silicon carbide epitaxial layers based on the principle of optical interference** [14372-10]
- 14372 08 **High-precision wavefront measurement for high numerical aperture microscope objectives based on sub-aperture stitching** [14372-9]
- 14372 09 **Application research of blackbody radiation source based on precision electronic technology in the field of radiation thermometer calibration** [14372-35]
- 14372 0A **Research on SiC epitaxial layer thickness measurement based on infrared interferometry**
[14372-51]
- 14372 0B **Intelligent sensing technology based on metasurfaces** [14372-2]
- 14372 0C **Design and performance evaluation of a compact differential laser interferometric displacement sensor with real-time refractive index compensation** [14372-71]
- 14372 0D **Simultaneous measurement of refractive index and temperature using a cascaded core-offset in-line fiber Mach-Zehnder interferometer** [14372-15]
- 14372 0E **Label-free and high-sensitive optical detection of PSA based on silicon cascaded micro-ring resonators** [14372-64]

- 14372 OF **In situ correction method for displacement field cumulative errors in long-distance fiber optic shape sensors** [14372-26]
- 14372 OG **A dual-range FBG pressure sensor based on differential stiffness structures** [14372-48]

NONDESTRUCTIVE TESTING AND IMAGING TECHNOLOGIES

- 14372 OH **Modeling and simulation of a high-performance laminated PZT-PVDF ultrasonic transducer** [14372-18]
- 14372 OI **Research on the prediction of mechanical properties of 316L stainless steel laser welded joints based on MLP** [14372-39]
- 14372 OJ **Single-chip near-field MIMO-SAR imaging system: development and experimental validation** [14372-36]
- 14372 OK **Research on quartz glass damage detection based on guided waves** [14372-44]
- 14372 OL **Aluminum plate damage imaging detection method based on Lamb wave** [14372-19]
- 14372 OM **A method for imaging damage in carbon fiber composites based on Lamb waves and correlation entropy spectral density** [14372-65]
- 14372 ON **Research on methods for detecting explosive devices such as wires and circuit boards in x-ray images for security screening scenarios** [14372-8]
- 14372 OO **Research on model compression and acceleration techniques for x-ray explosive device recognition on edge computing platforms** [14372-5]
- 14372 OP **Pipeline damage area recognition method based on ultrasonic guided wave time-frequency characteristics and CNN** [14372-4]
- 14372 OQ **Structural regions identification method of pipelines based on the envelope characteristics of guided wave signals and CNN network** [14372-7]
- 14372 OR **Guided wave-based contact acoustic nonlinearity in CFRP-metal bonded structures: simulation and experimental study on debonding detection** [14372-72]
- 14372 OS **One-dimensional convolutional neural network with hierarchical dropout for locating pipeline damage using helical guided waves** [14372-20]
- 14372 OT **A regional damage localization method for composite plate based on guided waves and semi-supervised generative adversarial networks** [14372-3]
- 14372 OU **A multimodal fusion method for damage localization in composite panels based on guided ultrasonic waves** [14372-56]
- 14372 OV **Impact localization and energy estimation of carbon fiber composite materials by employing Hilbert envelope enhancement and CBA-Net** [14372-16]

- 14372 0W **Deep learning-based tunnel surface defects 3D reconstruction and spatial location mapping method** [14372-50]
- 14372 0X **Deep learning-based structural internal defects identification method from GPR images** [14372-30]
- 14372 0Y **Complex shape subsurface target 3D reconstruction method based on multi-profile ground penetrating radar data** [14372-22]

PRECISION INSTRUMENTATION AND OPTOELECTRONIC SYSTEMS

- 14372 0Z **Detection and uncertainty analysis of medical central vacuum systems** [14372-40]
- 14372 10 **Design and fabrication of micronano optical devices based on electrochemical nanoimprint lithography** [14372-41]
- 14372 11 **Research on enhancing routine radio monitoring and electromagnetic conflict resolution at space launch sites** [14372-13]
- 14372 12 **Design and implementation of high-resolution frequency counter based on continuous timestamp** [14372-49]
- 14372 13 **Design of a portable high-resolution Raman spectroscopic system based on Littrow configuration** [14372-29]
- 14372 14 **Sea wave measurement using a 64 GHz millimeter-wave radar array** [14372-47]
- 14372 15 **Design and numerical simulation analysis of centrifugal fan based on three-dimensional flow** [14372-1]
- 14372 16 **Finite element simulation and process optimization of fusion-press forming for fiber optic image inverters based on rigid-viscoplastic constitutive model** [14372-45]
- 14372 17 **Workpiece recognition and positioning for laser marking machine based on machine vision** [14372-14]
- 14372 18 **Research and application of direct sunlight illumination technology for highway tunnel entrance sections** [14372-21]
- 14372 19 **Measurement of atomic number density in alkali metal vapor cells for optically pumped atomic magnetometers under geomagnetic conditions** [14372-46]
- 14372 1A **Optimization method for dwell time in microemulsion abrasive-free jet polishing of large-aperture KDP** [14372-60]
- 14372 1B **Simulation research on trajectory tracking control of precision mechanical servo system based on improved PID algorithm** [14372-31]

- 14372 1C **Research on multifunctional temperature and humidity inspection instrument based on intelligent parameter acquisition** [14372-38]
- 14372 1D **Preparation and photoelectrical performance study of gallium oxide photodetectors** [14372-11]
- 14372 1E **A computer-aided alignment method for off-axis reflective systems based on a neural network with a sensitivity-matrix prior** [14372-54]
- 14372 1F **Application of direct ionization mass spectrometry in drug detection** [14372-62]
- 14372 1G **Fixed-time lightweight compliance control for embedded dexterous hands** [14372-70]
- 14372 1H **Modeling and optimization of photoacoustic cell for trace gas detection based on a full-chain coupled simulation model of photothermal acoustic effect** [14372-43]
- 14372 1I **Research design and method discussion of flue dust concentration tester based on β -ray attenuation method** [14372-27]
- 14372 1J **Modeling and design optimization of off-axis beam expanders using super element method and active learning-based Kriging model** [14372-24]
- 14372 1K **Design of a human knee joint negative work harvesting device** [14372-59]
- 14372 1L **Research on compact single-beam atomic magnetometer with high sensitivity under geomagnetic field intensity** [14372-34]
- 14372 1M **Design and implementation of a three-axis linkage wrench library control system with enhanced kinematic coupling and synchronization compensation** [14372-57]
- 14372 1N **Performance control of output beams in medical endoscopic cold light sources** [14372-68]
