# TABLE OF CONTENTS

|                                                                                                                                           |     |
|-------------------------------------------------------------------------------------------------------------------------------------------|-----|
| Pattern Recognition and Prediction with a Hidden Markov–linear Regression Model .....                                                     | 2   |
| <i>Ekaterina Vedennikova, Dmitry Gromov</i>                                                                                               |     |
| Access Control Mechanisms for Agentic AI in Multi-Tenant Cloud Environments.....                                                          | 9   |
| <i>Arun Ganapathi, Dishant Banga</i>                                                                                                      |     |
| From Belief to Behavior: Modeling and Tracking Moral Alignment in Autonomous Agents.....                                                  | 15  |
| <i>Soraya Partow, Satyaki Nan</i>                                                                                                         |     |
| Recognizing Multiple Emotions in Bangla Paragraphs using Multi-Label Classification .....                                                 | 21  |
| <i>Sadia Islam, Md Minhajul Karim, Noortaz Rezoana</i>                                                                                    |     |
| Explainable Customer Churn Prediction with Gradient Boosting, SHAP Insights, and Business-Aware Thresholding .....                        | 29  |
| <i>Trishita Dhara, Siddhesh Sheth, Aishwarya Budhkar</i>                                                                                  |     |
| Adaptive CTGAN: Data Augmentation for Imbalanced Cybersecurity Datasets.....                                                              | 36  |
| <i>Devcharan Krishna Naik, Yuchou Chang, Ashokkumar R Patel</i>                                                                           |     |
| Mitigating Risks in Agents and Robots .....                                                                                               | 42  |
| <i>Mark Maybury</i>                                                                                                                       |     |
| Privacy-Preserving Federated AI on Blockchain for Secure and Compliant Banking Data Management .....                                      | 51  |
| <i>Vineeth Reddy Lakkadi, Praneetha Reddy Donthi, Sravani Kandula, Munish Kumar</i>                                                       |     |
| Privacy Awareness in Large Language Models: Input Regurgitation and Prompt-Induced Sanitization for HIPAA and GDPR Compliance .....       | 58  |
| <i>Aravinda Jatavallabha, Venkatesha Matam, Vidisha Vijay</i>                                                                             |     |
| On the Geometric Limits of Transformer Defenses Against Obfuscation Attacks: Latent Embedding Collapse & Performance–Robustness Gap ..... | 66  |
| <i>Becky Mashaido, Tapadhir Das</i>                                                                                                       |     |
| Beyond Artificial Certainty: Synthetic Socratic Inquiry for Trust Calibration in AI-Augmented Higher Education.....                       | 72  |
| <i>Zomana Majid, Wasim Chaudhuri, Vijay Kanabar</i>                                                                                       |     |
| From Scripts to Prompts: How Large Language Models Are Transforming Penetration Testing .....                                             | 79  |
| <i>Eman Alatawi, Umar Albalawi</i>                                                                                                        |     |
| MRI-AgentNet: A Vision Language Models-Based Multi-Agent AI System for Solving Inverse Problems in MRI .....                              | 87  |
| <i>Gulfam Ahmed Saju, Marjan Akhi, Yuchou Chang</i>                                                                                       |     |
| Agentic AI-Driven Multimodal Emotion-Aware Student Mental Health Chatbot using DistilBERT, AWS Rekognition and N8n .....                  | 95  |
| <i>Aditi Sangle, Shreya Bhandare, Avinash More, Archana Bomnale</i>                                                                       |     |
| Quantization and Its Effects About Reinforcement Learning on Quantum Neural Network Wrapped in Classical Encoder .....                    | 102 |
| <i>Jacob Fronzaglia, Yuchou Chang, Christopher Hixenbaugh</i>                                                                             |     |

|                                                                                                                                        |     |
|----------------------------------------------------------------------------------------------------------------------------------------|-----|
| A Unified MLOps Architecture for Reliable Deployment of Generative AI Systems.....                                                     | 109 |
| <i>Vasanth Rao Jadav, Shravya Bussarisenior, Shalini Sudarsan</i>                                                                      |     |
| Self-Evolving AI Systems: Stability-Plasticity Trade-Offs and Regret-Aware Learning in Deployed Machine Learning.....                  | 115 |
| <i>Raj Kumar Myakala, Vinithya Reddy Podduturi, Akhil Reddy Jagirapu</i>                                                               |     |
| HAGS: A Hand and Glove Segmentation Dataset for Collaborative Assembly.....                                                            | 121 |
| <i>Shivansh Sharma, Mathew Huang, Sanat Nair, Alan Wen, Christina Petlowany, Juston Moore, Selma Wanna, Mitch Pryor</i>                |     |
| AI-Powered Merchant Named Entity Recognition in Financial Transactions: A Production-Scale Transformer System .....                    | 136 |
| <i>Rama Mohan Reddy Pilli, Joe Koch, Chris Wright</i>                                                                                  |     |
| Multi-Dimensional Evaluation Framework for Generative AI Applications with Dynamic Data Sources .....                                  | 144 |
| <i>Vishnuram Venkataswamy Sampathkumar, Vishwanath Pattar, Priyanka Srinivas, Lohith Reddy Kalluru, Ajay Jagannath</i>                 |     |
| AI-Based Discovery of Silent Failures in Financial Software: Representation Learning for Semantic Data Integrity in CI Pipelines ..... | 151 |
| <i>Tetiana Afanasieva</i>                                                                                                              |     |
| Forecast to Replenishment: Interpretable Machine Learning for Retail Inventory Optimization .....                                      | 155 |
| <i>Marsa Rayani, Samarasimha Reddy Donthireddy, Alireza Izaddoost, Benyamin Ahmadnia</i>                                               |     |
| A Systems Engineering Driven Framework for Integrating Large Language Models into Clinical Documentation to Increase Efficiency.....   | 163 |
| <i>Saloni Mittal, Aarushi Ajmera, Hugh Devine, Anoushka Vijay, Lynn Lafiandra, Jyotirmay Gadewadikar</i>                               |     |
| Agentic CDNs: A Multi-Agent Architecture for Edge-Native AI Inference and Control.....                                                 | 171 |
| <i>Venkata Gopi Kolla, Chintan Tank, Luc Giavelli</i>                                                                                  |     |
| AI Models for Smart Building Energy Consumption Forecasting using Survey and Online Weather Data in Kuwait.....                        | 177 |
| <i>Mohamed Zaki, Khaled Abujbara</i>                                                                                                   |     |
| Augmenting Large Language Models with Causal Risk Patterns for AI Deployment Risk Assessment .....                                     | 185 |
| <i>Gareth McConomy, Raymond Bond, David Glass, Jun Liu, Holly Toner</i>                                                                |     |
| Revify: An Agentic Opinion Mining System for Product Reviews.....                                                                      | 193 |
| <i>Harshal Vhatkar, Siddhesh Shrawne, Soorya Sivaramakrishnan, Shaily Goyal, Siddhartha Chandra</i>                                    |     |
| Multi-Modal Causal Reasoning from Sparse Image Datasets: A Synthesis and Discovery Framework.....                                      | 201 |
| <i>Atul Rawal, Adrienne Raglin</i>                                                                                                     |     |
| A Multi-Stage Deep Neural Network with SIFT-VGG Late Feature Fusion for Muzzle Identification .....                                    | 207 |
| <i>Pranshu Tiwari, Vanshika Mehlawat, Suyash Patel, Swapandip Nandi, Pratima Kumar</i>                                                 |     |

|                                                                                                                                                                                                                      |     |
