# TABLE OF CONTENTS

|                                                                                                                                                      |    |
|------------------------------------------------------------------------------------------------------------------------------------------------------|----|
| Optimization-Based Design of Ku-Band Air-Filled Substrate-Integrated-Waveguide Bandpass Filter with Transmission Zeros .....                         | 1  |
| <i>Jingbo Wang, Mohamed Malki, Roberto Gómez-García</i>                                                                                              |    |
| A 0.18- $\mu\text{m}$ InGaAs Ku-Band Continuously-Tunable Bandstop Filter with Extended Passband Response .....                                      | 4  |
| <i>Andrés Fontana, Dimitra Psychogiou</i>                                                                                                            |    |
| Measurement-Based Optimization Strategies for Reconfigurable Filtering Responses on a Field Programmable Microwave Substrate .....                   | 7  |
| <i>Ahmed Aajli, Arnaud Beaumont, Aurelien Perigaud, Fabien Courreges, Romain Negrier, Olivier Lafond, Mohamed Himdi, Langis Roy, Nicolas Delhote</i> |    |
| Millimeter-Wave GaN Transmit/Receive RF Switch Evaluation with the Industry Standard ASM-HEMT .....                                                  | 10 |
| <i>Dave Frey, Dashiel Matlock, Edward Gebara, Nicholas C. Miller</i>                                                                                 |    |
| Load-Pull Framework for Performance Assessment and Modeling of Microwave Power Amplifiers Under Faulty Array Conditions .....                        | 13 |
| <i>M. Mengozzi, A. M. Angelotti, S. Colangeli, P. Mezzanotte, G. P. Gibiino</i>                                                                      |    |
| Harmonic Balance-Based PA Modeling for Wideband Performance Analysis .....                                                                           | 16 |
| <i>B. T. Marcondes, F. M. Barradas, T. R. Cunha, J. C. Pedro</i>                                                                                     |    |
| Rapid Extraction of Trap Parameters for GaN HEMT Models .....                                                                                        | 19 |
| <i>Petros Beleniotis, Christos Zervos, Frank Schnieder, Matthias Rudolph</i>                                                                         |    |
| ANN Based Cryogenic DC Modeling of a 16 nm nMOS FinFET .....                                                                                         | 22 |
| <i>L. Carminati, G. Bosi, C. Esposito, F. D'Aniello, A. Gargiulo, E. Charbon, A. Baschiroto, V. Vadalà</i>                                           |    |
| Numerically Robust SSS-Domain Resistance Extraction for Equivalent-Circuit Modeling of Microwave FETs .....                                          | 25 |
| <i>S. Colangeli, A. Serino, W. Ciccognani, P. E. Longhi, E. Limiti</i>                                                                               |    |
| Transfer Learning-Enhanced Space Mapping for Rapid Microwave Filter Optimization .....                                                               | 28 |
| <i>Olufemi Oluyemi, Paul Laforge, Abdul Bais</i>                                                                                                     |    |
| Machine-Learning-Driven Parameter Extraction for Accelerated Aggressive and Implicit Space Mapping in Microwave Filter Design .....                  | 31 |
| <i>Olufemi Oluyemi, Paul Laforge, Abdul Bais</i>                                                                                                     |    |
| Randomized Space Mapping .....                                                                                                                       | 34 |
| <i>Joaquin F. Valencia Sullca, Belen Perello Garcia, Francisco Pastor Naranjo, José Vicente Morro, Marco Guglielmi, Vicente E. Boria</i>             |    |
| Reflected Group Delay for Lossy Filter Design Using Implicit Space Mapping .....                                                                     | 37 |
| <i>Gaurav Walia, Paul D. Laforge</i>                                                                                                                 |    |
| Fast Geometry-Driven Series Resistance Estimation for Microwave and RF Planar Layouts .....                                                          | 40 |
| <i>Xavier Mir, Aleix Valdivieso, Raúl Loscertales, Sergio Lopez, Jordi Verdú, Pedro de Paco</i>                                                      |    |

|                                                                                                                                                       |    |
|-------------------------------------------------------------------------------------------------------------------------------------------------------|----|
| Machine Learning-Enabled De-Embedding Method Addressing Fixture-DUT Discontinuity with a Modified Thru Dummy .....                                    | 43 |
| <i>Pinhao Zhou, Guangxu Shen, Wenquan Che</i>                                                                                                         |    |
| Constrained Coupling Matrix Reconfiguration Guided by FOM for Numerical Synthesis Methods .....                                                       | 46 |
| <i>Junyi Liu, Ke-Li Wu</i>                                                                                                                            |    |
| Design of Bandpass Filters Composed of Dual-Mode Rectangular Cavities Using an Extended Iris Model .....                                              | 49 |
| <i>Antonio Oliva Aparicio, Antonio Manuel Huéscar de la Cruz, Juan Hinojosa Jiménez<br/>Fernando Daniel Quesada Pereira, Alejandro Álvarez Melcón</i> |    |
| Tx Bandpass Filters Based on Single-Stage Half-Wavelength Short-Ended Three-Section Coaxial Stepped Impedance Resonators .....                        | 52 |
| <i>Jessica Benedicto, Eric Rius, Jean-François Favennec, Juan Pablo Guzmán Vélez</i>                                                                  |    |
| Micromachined Low-Loss Transition from Waveguide-to-Microstrip Line for Large MMIC Integration and Packaging at 250 GHz .....                         | 55 |
| <i>Sadia Farjana, Vessen Vassilev, Per Lundgren, Peter Enoksson, Ashraf Uz Zaman</i>                                                                  |    |
| Combination of Quantized Neural Networks with LSTMs for Design Automation of Power Amplifiers .....                                                   | 58 |
| <i>Lida Kouhalvandi, Fbio Passos, M. Hassan Najafi, Sercan Aygun</i>                                                                                  |    |
| High-Selectivity Matching Optimization for Robust Power Amplifiers .....                                                                              | 61 |
| <i>Sergio López de Pablo, Adrià Moya, Joel Mesas, Aleix Valdivieso, Xavier Mir, Pedro de Paco, Jordi Verdú</i>                                        |    |
| Harmonic Balance TCAD Trap Modeling of GaN HEMTs for Design Technology Co-Optimization .....                                                          | 64 |
| <i>Edoardo De Ruvo, Simona Donati Guerrieri, Fabrizio Bonani</i>                                                                                      |    |
| Modeling of Parasitic Network of Buck Converter Using Full-Wave EM Solver for Design-Oriented Analysis of the Switching Voltage .....                 | 67 |
| <i>Silvia Simone, Fabio Pareschi, Gianluca Setti</i>                                                                                                  |    |
| Electromagnetic Side-Channel Emission Analysis from Hardware Trojan for the Advanced Encryption Standard Circuits .....                               | 70 |
| <i>Peng Huang, Qiang Ren, Dongrong Zhang</i>                                                                                                          |    |
| Automated Post-Manufacturing Tuning of 3D Printed Cavity Filters Based on a Unique Parametrized Coupling Matrix Model .....                           | 73 |
| <i>D. Mamadou Watt, Aurelien Perigaud, Olivier Tantot, Nicolas Delhote, Serge Verdeyme</i>                                                            |    |
| Waveguide-Fed Filtennas Based on C-Shaped Resonant Slots: A New Approach for Independent External Coupling Control .....                              | 76 |
| <i>Cristiano Tomassoni</i>                                                                                                                            |    |
| Half-Mode Groove Gap Waveguide Technology for High-Frequency Filtering Devices .....                                                                  | 79 |
| <i>Antonio Seller-Rueda, Stephan Marini, Pablo Soto, Encarnación Gimeno-Nieves, Vicente E. Boria</i>                                                  |    |
| Performance Evaluation of Hybrid Mushroom Ridge Waveguides for Power Distribution Networks .....                                                      | 82 |
| <i>Alvaro Martín-Nuñez, Miguel Ferrando-Rocher, Jose I. Herranz-Herruzo</i>                                                                           |    |
| Analysis of Structures with Inverted Microstrip Gap Waveguide Technology for Applications in Upper Mid-Band 7-24 GHz .....                            | 85 |
| <i>Cristina Ramos, Mariano Baquero-Escudero, Fernando Carrera-Suárez, José Ignacio Herranz-Herruzo</i>                                                |    |

|                                                                                                                                                       |     |
|-------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| Knowledge-Based Neural Network for Improved Low-Voltage I-V Fitting in RF Transistor Modeling .....                                                   | 88  |
| <i>Jinyuan Cui, Qi-Jun Zhang</i>                                                                                                                      |     |
| Advanced MOR-Based Neuro-TF Method for EM Modeling of Microwave Components .....                                                                      | 91  |
| <i>J. Liu, F. Feng, Q.-J. Zhang</i>                                                                                                                   |     |
| A Space-Mapping-Based Surrogate-Assisted Multistate Optimization Method for Tunable Four-Pole Waveguide Filter .....                                  | 94  |
| <i>Haitian Hu, Wei Zhang, Bingchen Liu, Yiqi Yang, Qi-Jun Zhang</i>                                                                                   |     |
| EM Sensitivity of Lossy Metals Using Fourth-Order Arnoldi Reduction and Self-Adjoint Method for Four-Pole Waveguide Filter Fast Frequency Sweep ..... | 97  |
| <i>Libin Zhang, Feng Feng, Xiaolong Li, Ke Liu, Jianguo Xue, Qi-Jun Zhang</i>                                                                         |     |
| EM Topology Modeling for Waveguide Filter Based on CNN .....                                                                                          | 100 |
| <i>Yiqi Yang, Wei Zhang, Haitian Hu, Kaige Qu, Zhiguo Zhang, Qi-Jun Zhang</i>                                                                         |     |
| A Semi-Analytical Design Approach for Slab Air-Filled Substrate-Integrated Waveguides .....                                                           | 103 |
| <i>Hendrik Rogier, Bram Hoflack, Sofie Lenders, Samuel Rimbaut, Tobias Van Damme, Sam Lemey</i>                                                       |     |
| A Low-Profile Air-Filled SIW Resonant Wide-Band Slot Antenna for Low-Loss Directive Radiation .....                                                   | 106 |
| <i>Rifaqat Hussain, Akram Alomainy</i>                                                                                                                |     |
| Improved Low Losses and Simplified Fabrication Process Transition from Microstrip Line to Empty Substrate Integrated Coaxial Line .....               | 109 |
| <i>Angel Belenguer, Leticia Martinez, David Herraiz-Zanón, Ignacio Galeote, Dario Herraiz Tirado, Héctor Esteban</i>                                  |     |
| Modularity of Locally Resonant Metamaterial Topologies for Electrical Performance, Multipactor Threshold, and Time-Domain Behavior .....              | 112 |
| <i>Karim Kouny, Romain Fleury</i>                                                                                                                     |     |
| A Combined Pole-Zero Identification and Winslow-Probe Approach for Efficient HPA Stability Analysis .....                                             | 115 |
