Proceedings contents

Soares, Costa, Marques, Vieira	Understanding meiosis in sugarcane using immunocytology	1-5
Qazi, Rose	Flood mitigation works at Condong Sugar Mill	6-18
Sakr, Teixeira, Caldwell, Donovan, Zahra	Additive manufacturing using sugarcane by-products	19-24
Zia, Li, Ford, Sambasivam, Rapmund, Bhuiyan	A novel green chemistry-based approach for managing sugarcane fungal diseases	25-28
Bhuiyan, Adhikari, Rapmund, Sherring	Identification and pathogenicity of a <i>Fusarium</i> sp. causing plant death and root rots to sugarcane in the Bundaberg region	29-34
Salter, Kok	Sub-surface placement of organic amendments on a marginal sugarcane soil	35-43
Lavarack	Review of co-product papers presented at the centennial congress of the ISSCT	44-52
Pinto-Irish, Sherring, Bhuiyan, Aitken, Piperidis	Comparative early-stage infection dynamics of <i>Meloidogyne javanica</i> and <i>Pratylenchus zeae</i> in sugarcane cultivars	53-58
Awasthi, Goyal, Mishra	Development of a modern energy-efficient sugar complex: achieving 26% on cane steam consumption with a roadmap to 23% on cane	59-73
Singh, Schulz, Schläfer	Advanced surface engineering solutions for biomass-fired boilers in the sugar industry: addressing corrosion and erosion challenges	74-79
Bird, Plaza	Automatic remeshing in modelling the crushing of sugarcane bagasse	80-85
Connellan, Robertson, Vaggelas, Maitland	Implications for sugarcane nutrient management following a green-manure crop of sunn hemp	86-95
Fillols	Screening sugarcane varieties propagated through tissue culture for tolerance to herbicides	96-100
Mienie, Dauvellier, Smith	Impact of emission reductions on scrubber selection, efficiency and energy consumption	101-106
Leekar, Jensen, Schroeder	Measuring gap percentage using a deep-learning technique approach	107-120
Bawa, Gregg, Del-Socorro, Burey, Powell	identification of fig-derived volatile organic compounds for lure development	121-125
Bhuiyan, Panitz, Panitz, Sherring, Rosewarne, Devereaux	Does genotype shape the soil nematode community in the sugarcane rhizosphere? A survey at Rocky Point	126-133
Rapmund, Keats, Wedel, Sherring, Manandhar, Bhuiyan	Potentially pathogenic fungi causing sugarcane stool death	134-137
Ditchon, Van der Jeugt, Williams	Applying thermal vapour recompression (TVR) at Millaquin Mill	138-147
Fillols	Screening pre-emergent herbicides for the control of itch grass in sugarcane	148-157
Fillols	Pre-emergent control of different accessions of itch grass with pendimethalin	158-163
Attard, Rickert, Granshaw	Smart Irrigation Practice delivers measurable benefits	164-173
Haydon, Staunton, Simpson, Rodman	Development of an application to assess cane-stalk maturity using a handheld VIAVI Onsite-W microNIR	174-181
Arend da Silva, Clarke, Salter	Effects of climate change on wet-weather interruptions to harvest in five Australian sugarcane milling areas	182-200
Schembri	Addressing increasing harvester chopper losses with a chopper-drum test facility	201-209
Gooley, Tsang, Wong, Pereira	Validation of simulated thermal performance calculations of X.e series industrial gear unit with real-time field data	210-219
Lavarack, Fraga, Broadfoot	Controlling high-grade pan boilings at Farleigh Mill with a microwave dry substance meter	220-222
Mann, Williams	Greenhouse gas emissions from sugar factory boilers	223-234
Nielson, Logan, Buckman, Bacchiella, Nash, Di Bella, Tessieri, Rosenberger	Project Squealer: observations from GPS collaring and tracking	235-244
Cardillo, Butler, Larsen	Use of chemical ripeners to maximise CCS early in the season and on standover cane	245
Lowe, Lavarack	Construction and operation of a surface wetland at Marian Mill – a precautionary tale	246-255
Tom, Lavarack	Controlling the pH of an ash clarifier with milk of lime	256
Nel, Lavarack	Installation of a horizontal vacuum belt filter to optimise the clarification processes at Farleigh Mill	257

Rosettenstein, Bezuidenhoudt, Stevens	Performance of dimple tube technology for enhanced heat transfer and energy efficiency in sugar factory vacuum pans	258-262
Powell, Bawa, Emtia, Kikitam, Light, Achadian, Hanboonsong	Biosecurity threats on the doorstep: monitoring for potential insect vectors of <i>Sugarcane streak mosaic virus</i>	263
Sherring, Connellan, Rapmund, Bhuiyan	Potential of sunn hemp to suppress nematodes in sugarcane cultivation	264-268
Cardillo, Davis, Larsen	Use of bio-stimulants in sugar cane	269-273
Emtia, Powell, Bawa, Kikitam, Light, Achadian, Hanboonsong	Outsmarting the vectors: proactive defence against sugarcane white leaf disease (SCWLD)	274
Hunt, Fleischfresser, Halpin	Evaluating the Soil Post Legume nitrogen Application Tool (SPLAT) in the Burdekin: nitrogen rates in sugarcane after peanuts	275-278
Broadfoot, Fraga	Suitability of using massed dry substance transducers to control batch high-grade strike pans in Australian factories	279-293
Broadfoot, Fraga, Rackemann	Planning for improved control of batch high-grade strikes	294-313
Kikitam, Powell, Light	Integrated pest management of the endemic white grub <i>Lepidota reuleauxi</i> at Ramu, Papua New Guinea	314
Halpin, Bird, Rehbein, Panitz	Effects of sub-soil amelioration to improve the productivity of marginal soils in the Bundaberg/Maryborough cane-supply regions	315-323
Simpson, Staunton, Lethbridge	Accounting for the presence of fermentation products in sugarcane using classified NIR calibrations	324-331
Gower, Fillols	When mill mud meets herbicides: impacts on pre-emergent weed control in sugarcane	332-336
Park, Skocaj	Effect of nitrogen in an eighth-ratoon crop within the Herbert River district	337-340
Manandhar, Sherring, Rapmund, Bhuiyan	Effects of the growth hormone Auxinone® on sugarcane growth and tolerance to nematodes	341-345
Dodt, Green	Harvest Allocation and Transport Routing Optimisation Software (HATROS)	346-352
Lavarack, Griffin, Nielsen, Ripper	Upgrading the Racecourse Mill evaporator station to achieve improved factory performance	353-361
Rosenbauer, Lavarack, Griffin, Ripper	Operation of a falling film tube evaporator in its first season at Racecourse Mill	362-370
Kyaw, Plaza, Fraga	Insights into heat transfer, boiling and flow behaviour in evaporator tubes using computational fluid dynamics	371-376
Dauvellier, Mienie, Frost, Smith	Optimising fan efficiency by retrofitting of boiler induced-draft fans for changing operating conditions	377-386
Solis-Aulestia, Welsh, Cosgrove, Mylrea	Building emissions knowledge for the Australian sugarcane industry: A gap analysis	387-396
Rawlins, Wilke, Marais	Identifying boiler equipment anomalies and quantifying their impact on co-generation efficiency using thermal modelling	397-407
Matthews, Higgins, Paine, DiBella, Kemp, Shannon	Serenade® Prime and Serenade® SOIL ACTIV mix benefits sugarcane planting fungicides via plant-growth-promoting bacteria for improved establishment metrics and remotely sensed plant-health indices	408-410
Hofer, Britton, Green	Stress validation for transom-type cane-rail bridges	411-425
Baker, Curran, Bakir, Rackemann	Hybrid pH control strategies to reduce sucrose losses and control corrosion in sugar factory evaporators Chemical cues driving host selection by greyback cane beetles:	426-436
Albertson, Grof	Looking backward to move the Australian Sugar Industry forward – using experience in both scientific research and workforce development to identify and address SNAFUs in the Australian sugarcane industry	437-444
Albertson, Grof	Innovation and productivity concerns in the Australian Sugar Industry – a possible link to recent changes in its R&D innovation system and a workforce development solution	445-453
Wixted, Bartels, Afzal, Busch	Measuring real-time billet-planting rates using machine vision and object tracking	454-462
Thaval, Lehnberger	Understanding the economics of cleaning methods for evaporator tubes	463-471
Yang, Tembo, Situ, Gilberd, Rodman, Khatamifar	Effects of corrosion inhibitor concentration on condensation in evaporators	472-480
