SPIE

Volume 14147

Part One of Two Parts

Proceedings of SPIE 0277-786X, V. 14147

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIEDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:
Author(s), "Title of Paper," in *Ground-based and Airborne Telescopes XI*, edited by Heather K. Marshall, Tomonori Usuda, Brialyn Onodera, Jason Spyromilio, Proc. of SPIE 14147, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B … 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

xiii *Conference Committee*

Part One

FACILITY INFRASTRUCTURE AND UPGRADES I

14147 02 **Decommissioning the Caltech Submillimeter Observatory (CSO) on Maunakea** [14147-1]

14147 03 **VLTI system upgrades: recent engineering progress and future developments** [14147-2]

14147 04 **Conquering wear plate cracking on the 100-meter Green Bank Telescope** [14147-3]

14147 05 **Toward sustainable telescope motion: supercapacitor-based energy recovery for CTA South Large-Sized Telescopes** [14147-4]

14147 06 **Sustainability as a design parameter in the early development of the Wide-field Spectroscopic Telescope** [14147-5]

FACILITY INFRASTRUCTURE AND UPGRADES II

14147 08 **What is LOVE: learnings and challenges in developing a real-time monitoring system for observatory operations** [14147-7]

14147 0A **An update on the Daniel K. Inouye Solar Telescope facility thermal systems** [14147-9]

14147 0B **Vera C. Rubin Observatory: final coating plant integration, commissioning, and coating results over the main telescope mirrors** [14147-10]

14147 0C **OPTIMIA: an AI-enabled maintenance assistant for critical observatory infrastructure at the Javalambre Astrophysical Observatory** [14147-11]

CONCEPTS FOR FUTURE TELESCOPES I

14147 0D **MezzoCielo: a new concept telescope capable of fisheye FOV at seeing limited resolution** [14147-12]

14147 0E **The AlUla Manara Observatory Complex: an integrated concept for an advanced multi-aperture scientific platform and visitor centre** [14147-13]

14147 0G **Conceptual design of a 50m telescope with large-aperture and wide-field for optical and infrared surveys** [14147-15]

14147 0I **The Korea Large Spectroscopic Telescope (KLST) project for flux-limited spectroscopic survey in the southern hemisphere** [14147-17]

CONCEPTS FOR FUTURE TELESCOPES II

14147 0J **WST – Wide-field Spectroscopic Telescope: the next leap in wide-field spectroscopy (Invited Paper)** [14147-18]

14147 0K **Progress of the design of Extremely large Spectroscopic Survey Telescope (Invited Paper)** [14147-19]

14147 0L **Next generation ground-based solar observing network** [14147-20]

14147 0M **European Solar Telescope status: progressing from preliminary design to detailed design** [14147-21]

14147 0N **The Global Open Transient Telescope Array: a distributed 1m-class telescope network for high cadence, wide field optical transient surveys** [14147-22]

14147 0O **The Large Fiber Array Spectroscopic Telescope: status update of the prototype telescope** [14147-23]

MODELING AS A DRIVER OF OBSERVATORY DESIGN I: JOINT SESSION WITH 14147 AND 14152

14147 0P **Thermal management and environmental sensing of the Simonyi telescope and enclosure at the Vera C. Rubin observatory** [14147-24]

14147 0R **Thermal validation of a balloon-borne infrared telescope (EXCITE) using test flight measurement data and TAITherm** [14147-26]

14147 0S **Simulation-based dynamic pointing analysis of AtLAST under wind loading and fast-scan conditions** [14147-27]

14147 0T **Implementation of an ensemble of atmospheric monitoring equipment at the Large Binocular Telescope Observatory site for agile AO-based observing, improved atmospheric turbulence forecasting, and local turbulence exploration** [14147-28]

PROJECT UPDATES: COMMISSIONING TO EARLY OPERATIONS

14147 0V **The University of Tokyo Atacama Observatory 6.5m telescope: project status 2026 (Invited Paper)** [14147-30]

14147 0X **DAG 4m Telescope: on-sky alignment and commissioning** [14147-32]

PROJECT UPDATES: UNDER CONSTRUCTION

14147 0Y **Development of the 14.5m optical/infrared telescope (FORT)** [14147-33]

14147 0Z **IAC contribution to the New Robotic Telescope: an overview** [14147-34]

PROJECT UPDATES: INTEGRATION AND COMMISSIONING I

14147 12 **Rubin optical system integration and commissioning** [14147-37]

14147 13 **Integration, alignment, and early laboratory performance of the Hobby-Eberly Telescope primary mirror alignment metrology system upgrade** [14147-38]

PROJECT UPDATES: INTEGRATION AND COMMISSIONING II

14147 14 **LSSTCam installation and commissioning at the Vera C. Rubin Observatory** [14147-39]

14147 15 **In-field array and atmospheric calibration strategy of the Cherenkov Telescope Array Observatory** [14147-40]

PROJECT UPDATES: EARLY OPERATIONS

14147 16 **Completion and early scientific observations of the ASTRI Mini-Array air Cherenkov experiment for ground-based gamma-ray astronomy** [14147-41]

14147 17 **From commissioning to operations: testing Europe's next-generation NEO survey telescope, the Flyeye 1** [14147-42]

14147 19 **Performance of the International Liquid Mirror Telescope** [14147-44]

EXTREMELY LARGE TELESCOPES

14147 1B **ESO's ELT takes shape: first deliveries and start of AIV (Invited Paper)** [14147-46]

14147 1C **The Giant Magellan Telescope project in 2026: status and plan forward (Invited Paper)** [14147-47]

ENABLING TECHNOLOGIES AND SYSTEMS FOR EXTREMELY LARGE TELESCOPES I

14147 1E **The GMT site, enclosure, and facilities: 2026 design and construction update** [14147-50]

14147 1F **Procurement of the dome and the telescope structure of the ELT: update status report** [14147-51]

14147 1G **The Giant Magellan Telescope Mount: manufacturing progress of the azimuth systems** [14147-52]

14147 1H **GMT primary mirror test cell performance and optical testing results** [14147-53]

14147 1I **Getting the ELT into shape with the phasing and diagnostic station** [14147-54]

14147 1J **The acceptance of the Extremely Large Telescope Prefocal Stations Main System** [14147-55]

ENABLING TECHNOLOGIES AND SYSTEMS FOR EXTREMELY LARGE TELESCOPES II

14147 1K **Wavefront control on the Extremely Large Telescope (ELT)** [14147-56]

14147 1L **High-precision remote handling for the ELT: design and verification of the segment manipulator** [14147-57]

14147 1N **Experimental validation of a CO_2 refrigerant-based thermal control system for the Giant Magellan Telescope (GMT) primary mirror (M1) segments** [14147-59]

14147 1O **Final integration and testing for the Extremely Large Telescope (ELT) M1 Local Coherencer** [14147-61]

PROJECT UPDATES: RADIO TELESCOPES

14147 1P **CCAT: the Fred Young Submillimeter Telescope (FYST) nears first light on Cerro Chajnantor: status and first light science (Invited Paper)** [14147-63]

14147 1Q **The Atacama Large Aperture Submillimeter Telescope (AtLAST): enabling large-scale sub-mm science beyond 2030 (Invited Paper)** [14147-64]

GROUND-BASED RADIO TELESCOPES AND ENABLING TECHNOLOGIES I: JOINT SESSION WITH 14147 AND 14153

14147 1S **The ALMA2030 wideband sensitivity upgrade: 2026 status report** [14147-66]

14147 1T **Performance modelling for radio telescopes: an integrated framework of metrology, finite element analysis, and electromagnetic simulation** [14147-175]

14147 1U **Millimeter-wave adaptive optics: demonstrating closed-loop correction for lowest Zernike modes** [14147-68]

OPTO-MECHANICAL DESIGNS I

14147 1V **The Keck Adaptive Secondary Mirror: a new prime focus capability for the Keck I Telescope** [14147-69]

14147 1W **Development of the Flyeye shutter for SST application from tracklet acquisition to characterization: high temporal accuracy for optimized orbit determination performance** [14147-70]

14147 1X **Design evolution for the Wide-field Spectroscopic Telescope** [14147-71]

14147 1Y **The optical system of the large-sized telescopes for the southern site of the Cherenkov Telescope Array Observatory** [14147-73]

OPTO-MECHANICAL DESIGNS II

14147 1Z **Design, manufacturing, and quality control of the mechanical structures of the small size telescopes for CTAO** [14147-190]

14147 20 **Thirty Meter Telescope: design of the M2 and M3 support systems and positioners** [14147-74]

ROBOTIC TELESCOPES AND ARRAYS I

14147 25 **Laser-based metrology systems versus wavefront sensing techniques: a comparative overview between the Large Binocular Telescope and the Vera C. Rubin Observatory for the telescope alignment and collimation tracking** [14147-79]

14147 26 **The new and improved TSST: advancing toward a robotic solar facility for continuous space weather monitoring** [14147-80]

14147 27 **The roboticization of the Isaac Newton Telescope: the largest robotic telescope in the world** [14147-82]

14147 28 **The Multi-Aperture Spectroscopic Telescope (MAST)** [14147-83]

ROBOTIC TELESCOPES AND ARRAYS II

14147 2A **The 7-Dimensional Telescope and the 7-Dimensional Sky Survey: status report on final commissioning and survey operation** [14147-84]

Part Two

14147 2B **Photonic EMARCOT at Calar Alto: a modular and photonically connected telescope architecture for the post-ELT era** [14147-85]

14147 2C **A modular wide-field observatory node for distributed NEO survey networks** [14147-86]

POSTERS: FACILITY INFRASTRUCTURE AND UPGRADES

14147 2D **Mechanical designs, thermo-mechanical tests, laboratory evaluation of the 50-channel pilot absolute multiline system for the Hobby-Eberly Telescope edge sensor upgrade** [14147-87]

14147 2E **ELT Dome project: from final design to first rotation on site** [14147-88]

14147 2F **Status of the 4.3-meter Lowell Discovery Telescope (LDT): new instruments, same notable performance** [14147-89]

14147 2G **Improving observatory resilience: insights from Subaru's 2024 tropical storm damage** [14147-90]

14147 2H **The Venus Project: building a fully opening tent-dome at the Pic du Midi Observatory** [14147-91]

14147 2J **Automated liquid nitrogen supply 2.0 at the European Southern Observatory** [14147-93]

14147 2M **Experimental vibration analysis of the 2m Himalayan Chandra Telescope for control system development** [14147-96]

14147 2N **Turning obsolescence into opportunity: evolution of the DKIST functional safety system** [14147-97]

14147 2P **Environmental isolation for the Argus Array: feasibility analysis of air curtains** [14147-99]

14147 2Q **Widefield Spectroscopic Telescope (WST): coating strategy to achieve high optical throughput** [14147-100]

14147 2R **ngVLTI: cost and feasibility of a four-telescope VLTI expansion for milliarcsecond-scale imaging** [14147-101]

POSTERS: CONCEPTS FOR FUTURE TELESCOPES

14147 2S **Development progress and science drivers of the 4.2m ground-based astrometric telescope** [14147-102]

14147 2T **Upgrade of the LAMOST telescope tracking control servo system based on a proprietary hardware architecture** [14147-104]

14147 2V **Optimization of petal-shaped occulters for exo-Earth observation** [14147-106]

14147 2W **Design of a heavy-load field derotator structure and control system for large-aperture alt-azimuth astronomical telescopes** [14147-107]

14147 2X **Harnessing astronomy knowledge of telescopes to industrialise telescope production** [14147-108]

14147 2Y **WST, the Wide-field Spectroscopic Telescope: telescope structure FE analyses** [14147-109]

14147 2Z **Research on collaborative architecture optimization for computing offloading in telescope control of WeHoST** [14147-110]

14147 32 **GOTTA prototype telescope and preliminary results from the pilot survey** [14147-113]

14147 33 **The AlUla Manara Observatory Complex: site characterization with integrated turbulence, meteorology, and aerosol assessment from a 24-hour operating Astronomical Site Monitor** [14147-114]

14147 34 **Exploring the trade-space of distributed aperture telescopes for faint-object spectroscopy** [14147-115]

14147 35 **On-sky commissioning and technical performance of Proto-NUX at Pic du Midi** [14147-116]

14147 36 **The Large Fiber Array Spectroscopic Telescope: optical system throughput analysis** [14147-118]

14147 37 **2ES: the development of a solar telescope** [14147-119]

POSTERS: MODELING AS A DRIVER OF OBSERVATORY DESIGN

14147 38 **Investigation and mitigation of a prominent off-axis stray light path in Rubin Observatory commissioning** [14147-121]

14147 39 **DAG - HVAC control system: ventilation strategies for thermal performance of primary mirror on the DAG400 telescope** [14147-123]

14147 3A **System analysis of the 4m segmented JUST telescope** [14147-124]

14147 3B **Design of a conical phase optical system for RINGSS** [14147-127]

14147 3E **Development of Shack-Hartmann wavefront sensing for the 4m segmented JUST telescope** [14147-130]

14147 3F **Automatic guide star simulation method and implementation based on the Mutian Telescope** [14147-131]

14147 3G **Support system design of the tertiary mirror of the 4m JUST telescope** [14147-132]

14147 3H **Vibration measurements and effects on instrumentation performance at DKIST** [14147-133]

POSTERS: PROJECT UPDATES

14147 3I **Development status of the 4m segmented Jiaotong University Spectroscopic Telescope (JUST)** [14147-134]

14147 3L **ERIN: a radio-quiet autonomous daytime star camera for stratospheric balloon missions** [14147-137]

14147 3M **Test management and coordination during the Vera C. Rubin Observatory commissioning and early operations using Zephyr Scale** [14147-138]

14147 3O **SAMM-E: the enhanced version of the solar activity magnetic monitor for the SAMM-NET space weather network** [14147-140]

14147 3P **Design, assembly, and alignment strategy of the CubeSpec Cassegrain Telescope** [14147-141]

14147 3Q **NEO Flyeye network: from the commissioning of the OHB-I Flyeye-1 to the future Flyeye-2 deployment** [14147-143]

14147 3S **Commissioning the SKA telescopes: results and plans towards science verification** [14147-145]

14147 3T **An overview of the stray light findings and interpretation during the on-sky commissioning of LSSTCam** [14147-146]

14147 3V **Optical performance verification for the Argus Array** [14147-150]

14147 3Y **Status of the NectarCAM camera for the medium-sized telescopes of CTAO** [14147-154]

14147 3Z **From sky to screen: improving downlinking over error-prone, omni-directional links from the stratosphere** [14147-155]

14147 40 **Slit-referenced auto-guiding system for the spectrograph of the SiTian Pilot-Node Telescope** [14147-156]

14147 41 **Technical upgrades for the Noto radio telescope for multimessenger perspectives in synergy with the KM3NeT** [14147-157]

14147 42 **Chinese Antarctic Survey Telescope for near infrared band (AST3-NIR)** [14147-159]

14147 43 **Results of the DICOS ground tests** [14147-160]

POSTERS: ENABLING TECHNOLOGIES AND SYSTEMS FOR ELTS

14147 45 **The design and performance of Giant Magellan Telescope's primary mirror actuator calibration system employing a hexapod motion stage** [14147-162]

14147 46 **Construction of the dome and the telescope structure of the ELT: update status report** [14147-163]

14147 47 **From final design to first alignment: advancements in the ELT Main Structure** [14147-164]

14147 48 **NSF sponsored risk reduction for the Giant Magellan Telescope (GMT)** [14147-165]

14147 49 **GMT site, enclosure, and facilities: facing the construction phase** [14147-167]

14147 4A **Four decades of technical progress in building Large Optical Telescopes** [14147-168]

POSTERS: RADIO TELESCOPES ENABLING TECHNOLOGIES

14147 4B **Development of the digital servo system for enhanced pointing accuracy of the 32m Gavril Grueff VLBI antenna in Medicina** [14147-170]

14147 4C **ngVLA 18m antenna preliminary foundation study** [14147-171]

14147 4D **Sardinia Radio Telescope Metrology System: early commissioning insights** [14147-172]

14147 4F **Optimizing wavefront-deformation sensor placement for active radio-telescope surfaces** [14147-174]

POSTERS: OPTO-MECHANICAL DESIGNS

14147 4G **ULTIMATE-Subaru: interface between adaptive secondary mirror and the telescope** [14147-176]

14147 4H **Commissioning and performance of the M1M3 thermal control system for the Vera C. Rubin Observatory** [14147-177]

14147 4I **From geometry to efficiency: updated CFHT astrometric camera pointing model and estimated on-sky time savings** [14147-178]

14147 4K **Design and construction of the QUBIC instrument mount** [14147-180]

14147 4N **High dynamic-range observation using a 1.8m off-axis telescope PLANETS: primary mirror polish and its support structures** [14147-184]

14147 4P **The Large Size Telescope (LST) for the south observing site of CTAO** [14147-187]

14147 4Q **The Schwarzschild-Couder Telescope for the Cherenkov Telescope Array Observatory: latest improvements to the optical system** [14147-189]

14147 4R **MezzoCielo: from the 40cm prototype toward a 1m class monocentric all-sky telescope** [14147-191]

14147 4S **Telescope testing with active M1M3/M2 cells: mass balance and dynamics performance during the commissioning of Vera C. Rubin Observatory** [14147-192]

14147 4T **Testing and corrective work on primary mirrors of two 1.2m class Australian telescopes** [14147-194]

14147 4U **Lining it up: integrated focus and tilt alignment system for the Argus Array** [14147-197]

POSTERS: ROBOTIC TELESCOPES AND ARRAYS

14147 4V **The Large Fiber Array Spectroscopic Telescope: engineering development of an observatory-ready system** [14147-199]

14147 4W **The Large Fiber Array Spectroscopic Telescope: rapid and low-cost prototyping and integration strategies** [14147-200]

14147 50 **ADDem: the Argus Deep-Field Demonstrator** [14147-206]

14147 51 **On-sky performance of a mobile, off-grid, robotic observatory for space domain awareness** [14147-207]
