PROCEEDINGS OF SPIE

Photomask Japan 2026: XXXII Symposium on Photomask and Next-Generation Lithography Mask Technology

Noriaki Nakayamada
Editor

8–10 April 2026
Yokohama, Japan

Organized by
Photomask Japan
SPIE

Co-organized by
BACUS and EMLC

Sponsored by
SEMI Japan

Published by
SPIE

Volume 14275

Proceedings of SPIE 0277-786X, V. 14275

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIEDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:
Author(s), "Title of Paper," in *Photomask Japan 2026: XXXII Symposium on Photomask and Next-Generation Lithography Mask Technology*, edited by Noriaki Nakayamada, Proc. of SPIE 14275, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B … 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

vii Conference Committee

OPENING SESSION DAY 1: KEYNOTE AND MASK MODELS

14275 02 **Direct mask modelling for enhanced OPC accuracy in the era of curvilinear masks** [14275-52]

14275 03 **Synthetic mask layout generation for machine learning-based OPC modeling in NA 0.33 EUV lithography** [14275-50]

14275 04 **Improvement of curvilinear patterning fidelity via contour based MPC** [14275-33]

14275 05 **Beyond Gaussians: better models for EUV masks** [14275-17]

MPC

14275 06 **End-to-end entirely curvilinear ILT solution for everyone (Invited Paper)** [14275-21]

14275 07 **A holistic approach to curvilinear enablement for advanced logic scaling: from design to patterning (Invited Paper)** [14275-56]

14275 08 **Toward ultimate mask fidelity: how aggressive MPC performs on MULTIGON curves** [14275-31]

LARGE SIZE PANEL TECHNOLOGY

14275 09 **X-ray inspection of glass substrates and through-glass vias using laminography, tilted radiography, and automated defect recognition (Invited Paper)** [14275-40]

MATERIAL AND PROCESS

14275 0B **Selective etching for high-NA EUV mask film stack** [14275-30]

14275 0C **ZERODUR as low-thermal-expansion material in EUV photomask-blank substrates** [14275-53]

NANOIMPRINT

14275 0D **Master-based distortion correction method for wafer-scale nanoimprint lithography** [14275-51]

OPENING SESSION DAY 2: KEYNOTE, MASK MARKET, AND LOGISTICS

14275 0E **14th eBeam Initiative Annual Luminaries Survey predicts photomask market and equipment growth (Invited Paper)** [14275-8]

14275 0F **A unified architecture for enterprise photomask lifecycle management in advanced lithography** [14275-26]

CNT PELLICLE

14275 0G **Development status and HVM progress of CNT pellicles (Invited Paper)** [14275-49]

14275 0H **Manufacturing ready and supporting infrastructure for successful adoption of EUV CNT pellicles in mass production environment** [14275-44]

NEW HORIZON AND FUTURE LITHOGRAPHY

14275 0I **Mo_2N as a novel barrier layer to mitigate interface imperfection in (Mo/Si)-based soft x-ray multilayer mirror** [14275-37]

OPENING SESSION DAY 3: KEYNOTE AND MASK REPAIR

14275 0K **On the road to fully automated photomask repair** [14275-15]

14275 0L **Debris mitigation improvements in laser ablation photomask repair** [14275-16]

METROLOGY AND INSPECTION

14275 0M **Benefits of alternative reticles for high-NA EUV logic metal printing** [14275-29]

14275 0N **Development of inspection conditions for phase-shift EUV masks and curvilinear patterns** [14275-20]

14275 0O **Curvilinear mask metrology: toward standardizing contour-based metrics for EUV mask qualification** [14275-55]

14275 0P **A novel EPE measurement method for curvilinear pattern with Multigon format** [14275-24]

14275 0Q **Evaluation of accelerated reticle lifetime testing using different applied bias voltages at EBL2** [14275-18]

ACTINIC INSPECTION

14275 0R **Advanced D2DB modeling and ADC with S/W solutions for actinic patterned mask inspection** [14275-9]

14275 0S **Advantages and challenges of actinic inspection systems in EUV mask technology** [14275-48]

WRITING AND PATTERNING

14275 0T **Stripe scheduling effects on throughput and CDU in multi-beam mask writing** [14275-27]

14275 0U **Multi-beam mask writer MBM 4000: enhancements and latest performance** [14275-38]

14275 0V **Current status and challenges of bright field mask technology for high-NA lithography** [14275-47]

POSTER SESSION

14275 0W **A lab-scale EUV high-intensity exposure setup for small-spot exposures and angular-resolved photoelectron spectroscopy** [14275-54]

14275 0X **A lab-scale EUV scatterometry setup for nanograting and latent image metrology** [14275-11]

14275 0Y **Lithography hotspot detection and automated repair using pattern encoding and CNNs** [14275-10]

14275 0Z **Automated SRAF generation for 75-nm contact holes patterning using generative AI in 193-nm immersion lithography** [14275-5]

14275 10 **Resolution limits of rough dense patterns printed on curved surfaces using a paraboloid mirror optics** [14275-12]

14275 11 **High-NA in-line projector for EUV lithography** [14275-36]

14275 12 **Development of a high-precision mirror positioning mechanism** [14275-43]

14275 13 **Conceptual design and component development of vacuum chamber for OIST-EUV lithography** [14275-41]

14275 14 **Pattern contrast analysis through two-mirror projector: impact of central obscuration and scan mirror shadowing** [14275-42]

14275 15 **Corner-focused evaluation of AI-based design-to-real prediction for FPD photomasks** [14275-6]

14275 16 **Study of mask handling in a plasma etching chamber** [14275-2]

14275 17 **E-beam repair process for low n EUV photomasks** [14275-7]

14275 18 **Lithographic performance and SEM-based geometrical analysis of curvilinear photomasks** [14275-46]

14275 19 **Validation of a new metrology solution for main-flow legacy photomasks** [14275-28]

14275 1A **Hybrid photomask registration measurement system for high-precision and high-speed registration metrology** [14275-35]

14275 1B **Resist heating effect correction in multi-beam mask writer MBM-4000** [14275-34]

14275 1C **Development of low-n/mid-k EUV masks for high-NA lithography** [14275-45]

14275 1D **Self-affine fractal abrasive model for ultra-flat surface fabrication of mask blank substrates** [14275-25]

14275 1E **Extend existing platform capacity to mature node mask inspection** [14275-3]

14275 1F **Optical components for lithography systems using cordierite ceramics** [14275-39]
