TABLE OF CONTENTS

Maximally Informative Koopman-based Reconstruction of Nonlinear Systems: An Observability-Aware Approach 1
Maria Bartzioka, Mohammad Khosravi

Global Linearization of Parameterized Nonlinear Systems with Stable Equilibrium Point Using the Koopman Operator 7
Natsuki Katayama, Alexandre Mauroy, Yoshihiko Susuki

Koopman-Based Dynamic Environment Prediction for Safe UAV Navigation 13
Vitor Bueno, Ali Azarbahram, Marcello Farina, Lorenzo Fagiano

Deep Koopman Economic Model Predictive Control of a Pasteurisation Unit 19
Patrik Valábek, Michaela Horváthová, Martin Klaučo

On the Existence of Quadratic Control Lyapunov Functions for Koopman-Operator based Bilinear Systems 25
Sami Leon Noel Aziz Hanna, Nicolas Hoischen, Sandra Hirche, Armin Lederer

On Data-Driven Unbiased Predictors using the Koopman Operator 31
Roland Schurig, Pieter Van Goor, Karl Worthmann, Rolf Findeisen

Reduced-order predictor feedback design for LTI systems with input delay 38
Jesus-Pablo Toledo-Zucco, Frédéric Gouaisbaut, Gaetan Chapput

An Innovations-Based Data-Driven Kalman Predictor for Predictive Control 44
Mohamed Abdalmoaty, Roy S. Smith

Flexible-step MPC for Unknown Linear Time-Invariant Systems 50
Markus Pietschner, Christian Ebenbauer, Bahman Gharesifard, Raik Suttner

A Trajectory-Based Approach to Controlled Invariance and Recursively Feasible MPC 56
Emmanuel J. Wafo Wembe, Adnane Saoud

Gaussian Processes UCB for decentralized coverage control under unknown density 62
Gennaro Guidone, Luca Monegaglia, Elia Raimondi, Han Wang, Mattia Bianchi, Florian Dörfler

Privacy Preservation in LQG Teams using Information Garbling 68
Apurva Dhingra, Ankur A. Kulkarni

Distributed Operation of Collective Self-Consumption Energy Communities via Hierarchical ADMM: Development and Evaluation 74
S. Madrigal, A. Morell, J. L. Vicario, R. Vilanova

Robust Estimation and Control for Heterogeneous Multi-agent Systems Based on Decentralized k-hop Prescribed Performance Observers 82
Tommaso Zaccherini, Siyuan Liu, Dimos V. Dimarogonas

Hierarchical control framework using flexibility agents for smart grid load shaping 89
Shahab Tohidi, Fraser O'Brien, Henrik Madsen

Design and Analysis of a Rate-based Protocol for Communication Networks 95
Serene Bhaskaran, Gaurav Raina

Mean Field Control of Thermostatically Controlled Loads as Piecewise Deterministic Markov Processes 103
Thomas Le Corre, Adrien Séguret, Ana Bušić

Model-Free Policy Gradient Method for LQG Control with Provable Finite-Sample Convergence to an O (ε)-Stationary Point 109
Kotaro Nakagiri, Tomonori Sadamoto

Fair Allocation of an Exhaustible Resource 115
Thomas A. Weber

Cayley Commutator-free Methods for Krotov-Type Algorithms in Quantum Optimal Control 123
Boris Wembe, Usman Ali, Torsten Meier, Sina Ober-Blöbaum

Sparse stabilization of mean-field agent dynamics through a three-operator splitting method* 129
Giacomo Albi, Dante Kalise, Chiara Segala, Franco Zivcovich

Polytope-Based Singularity Modelling for Robotic Manipulators and its Application to Trajectory Optimization 135
Frederik Schaeffter, Caroline Specht, Roberto Lampariello

Human Joint-Driven Trajectory Tracking for Enhanced End-Effector-Based Robotic Rehabilitation 143
Chiara Alessi, Daniele Romeo, Nikolas Sacchi, Antonella Ferrara

Shared-Control for Teleoperated Mechanical Cutting with Task Constraints and Haptic Feedback 149
Leonidas Droukas, Zoe Doulgeri

Vibration Suppression in Collaborative Flexible Payload Manipulation Using Passive Force Control 156
Alaa Abderrahim, Antonio Rosales, Ferdinando Milella, Markku Suomalainen, Shuai Li

Multi-Modal LSTM-Based Tracking Control for a Soft Robotic Manipulator with Hysteresis 162
Benjamin D. Bassett, Afonso Dias, Jialei Shi, Fahim Shakib, Enrico Franco, Kaiwen Chen

AI-Enhanced Kinematic Modeling of Flexible Manipulators Using Multi-IMU Sensor Fusion 168
Amir Hossein Barjini, Jouni Mattila

On Computing Integer Invariants of Intersection of Several Linear Time-Invariant Behaviors* 176
Anjali Beniwal, A. Sanand Amita Dilip, Swanand R. Khare

Sandwich Bounds for Gramian and Hankel Spectra 182
Giacomo Baggio

Minimal Structured Perturbation for Non-coprimeness of Polynomials 188
Diptanu Debnath, Harish K Pillai

Uncertain modeling through multivariate Loewner interpolation 194
Pierre Vuillemin, Charles Poussot-Vassal

Discretization-Aware Signal-Based Optimization Problem Design for Tuning LTI Differentiators Without Ground Truth Derivatives 200
Amine Othmane, Lothar Kiltz

Weakly Coupled and Overlapping Decompositions of Large-scale Linear Systems of Equations 206
Sahar Maleki, Mehdi Rahmani, Fatemeh Rastgar

Integral Control of Oseen Flows With Mixed Boundary Conditions 212
Jetro Sihvonen, Nicolas Vanspranghe, Lassi Paunonen, Jan Heiland

On the strict-feedback form of hyperbolic distributed-parameter systems 218
Nicole Gehring

Flatness-based control of a Timoshenko beam 224
Simon Schmidt, Nicole Gehring, Abdurrahman Irscheid

On Excitable Control of Stable Infinite-Dimensional Systems 230
Tuulia Tokola, Mohamed Fkirine, Lassi Paunonen

Structure preserving discretization method for 1D and 2D port-Hamiltonian systems using finite differences on staggered grids 236
Ignacio Diaz Alastuey, Yann Le Gorrec, Yongxin Wu

Airborne Wind Energy: The KEEP Project* 242
Antonin Bavoil, Jean-Baptiste Caillau, Lamberto Dell'Elce, Alain Nême

Novel System and Control Modeling for Direct Power Regulation of DFIG Wind Turbines 248
Panos C. Papageorgiou, Theodosis A. Alexandridis, George C. Konstantopoulos, Antonio T. Alexandridis

Constrained Reinforcement Learning for Safe Heat Pump Control 254
Baohe Zhang, Lilli Frison, Thomas Brox, Joschka Bödecker

Physics-Informed Deep Learning and Rule-Based adjustment PIDL-RB for online Building Energy Management System: A Comparative Study 262
Imene Benrabia, Dirk Söffker

Modeling the Dynamics and Costs of Water Desalination and Transport via a Mobile Wave Energy Harvester 268
Sara Tasnim, Michael Tamajong, Alvaro Cachon Delgado, Carson McGuire, Limeng Liu, Minhazul Alam Matthew Bryant, Christopher Vermillion, Scott Willcox, Hosam K. Fathy

A Feedforward Compensation Layer as a Complement to the Steady-State Optimization of Solar Photo-Fenton Plants* 275
D. Rodríguez-García, J.L. Guzmán, J.E. Normey-Rico, J.L. García Sánchez, J.L. Casas López

Detecting Feedback-path Delay Injection Attacks Using Interacting Multiple Model Filtering 281
Lovisa Eriksson, Torbjörn Wigren, Dave Zachariah, André M. H. Teixeira

Robust Magnetic Anomaly Navigation under Changing Magnetic Field Gradients 289
Antonia Hager, Torleiv H. Bryne, Philip P. Lillelund, Nils Olsen, Jasper S. Krauser, Tor A. Johansen

Fault Tolerance of Compressed TD3 Deep Reinforcement Learning Policies for Spacecraft Attitude Control 297
Leonardo Alexandrino de Melo, Manar Gani, Alberto Bosio, Rodrigo Possamai Bastos, David Novo

Robust Nullspace-Based Fault Detection via Convex H∞ Optimization 303
Benedikt Adolph, Daniel Ossmann

Intermediate Observer-Based Fault Estimation for a Class of Linear Systems with Intermittent Measurement 309
Guoning Ji, Jing Chang, Jérôme Cieslak, Zongyi Guo, David Henry

Resilient Interval Observer-Based Cooperative Adaptive Cruise Control Under FDI Attack 315
Parisa Ansari Bonab, Elisabeth Andarge Gedefaw, Mohammad Khajenejad

Mixed-Control Design for Energy-Efficient and Fatigue-Aware E-Bike Assistance* 321
Jessica Leoni, Michele Mazzolari, Mara Tanelli

Energy-based learning in resistor-capacitor circuits 328
Marieke Heidema, Bart Besselink, Henk J. van Waarde

Optimal Stationary Solutions of Vapor Compression Cycles via Smooth Hat Function Approximation 334
Alessandro Cupo, Jan Eilbrecht, Matthias Bitzer, Andreas Potschka

Hierarchical Dual-Actuator Control for Directional Drilling under Low-Bandwidth Communication 340
Felix Häusser, Kai S. Karvinen, Vanja Klemme, Rolf Findeisen

Interpolation Conditions for Data Consistency and Prediction in Noisy Linear Systems 347
Martina Vanelli, Nima Monshizadeh, Julien M. Hendrickx

Initial Excitation-based Adaptive Observers for Discrete-Time LTI Systems 353
Anchita Dey, Soutrik Bandyopadhyay, Shubhendu Bhasin

Equivariant Observer for Bearing Estimation with Linear and Angular Velocity Inputs 359
Gil Serrano, Marcelo Jacinto, Bruno J. Guerreiro, Rita Cunha

Positive Observers Revisited 365
David Ohlin, Anders Rantzer, Emma Tegling

Outlier Detection on the Extended Special Euclidean Group for Iterated Lie-group-based Kalman Filters Applied to Inertial Navigation 371
Finn G. Maurer, Erlend A. Basso, Henrik M. Schmidt-Didlaukies, Torleiv H. Bryne

Control Allocation in Single-Chamber Solid-Propellant DACS via Differentiable Programming-Based Constrained LM Optimization 379
Jaehyeok Cha, Gyubin Park, Jong-Han Kim

Equivariant Filter Cascade for Relative Attitude, Target's Angular Velocity, and Gyroscope Bias Estimation 385
Gil Serrano, Pedro Lourenço, Bruno J. Guerreiro, Rita Cunha

In-context algorithm distillation-based maneuvering evasion scheme for high-speed flight vehicles under limited measurement information 393
Weiyang Zhao, Rui Wang, Chenxi Shi, Yixin Ding, Zhiqiang Wang, Chunyiding Shang, Jing Chang Zongyi Guo, Jianguo Guo

A Floquet Mode LQR for Orbital Station-Keeping in Cislunar Space 399
António Nunes, Sérgio Brás, Pedro Batista

Integrated Guidance and Control for Impact-Time-Constrained Target Interception 405
M. Kidron, Saurabh Kumar, Shashi Ranjan Kumar

Reachability Analysis of Rigid-Body Rotational Dynamics Under Parametric Uncertainty Using Sensitivity-Based Lipschitz Bounds 411
Alessandro Melone, Roberto Lampariello

Advantage-Guided Diffusion for Model-Based Reinforcement Learning 419
Daniele Foffano, Arvid Eriksson, David Broman, Karl H. Johansson, Alexandre Proutiere

Quasi-Newton Compatible Actor–Critic for Deterministic Policies 427
Arash Bahari Kordabad, Dean Brandner, Sebastien Gros, Sergio Lucia, Sadegh Soudjani

A Graph-Based Reinforcement Learning Approach with Frontier Potential Based Reward for Safe Cluttered Environment Exploration 435
Gabriele Calzolari, Vidya Sumathy, Christoforos Kanellakis, George Nikolakopoulos

Learning stabilising policies for constrained nonlinear systems 441
Daniele Ravasio, Danilo Saccani, Marcello Farina, Giancarlo Ferrari-Trecate

Enhanced-FQL(λ), an Efficient and Interpretable RL with novel Fuzzy Eligibility Traces and Segmented Experience Replay 447
Mohsen Jalaeian-Farimani, Xiong Xiong, Luca Bascetta

LQR-KAN Combined Control via Reinforcement Learning Distillation with Stability Guarantees 453
Tamás Hegedűs, Balázs Németh, Máté Fazekas, Péter Gáspár

Scalable Tube-Based Model Predictive Control for Linear Systems with Parametric and Additive Uncertainties using Zonotopes 459
Yongkuan Zhang, Alexander Pleus, Matthias Althoff

Enriching Online Constraint Removal with Initial State Information for MPC with a Lyapunov Function 467
Benedikt Lammersmann, Raphael Dyrska, Martin Mönnigmann

Variance-Adaptive Approximated Model Predictive Control 473
Michaela Horváthová, Yuning Jiang, Juraj Holaza, Sorin Olaru, Juraj Oravec

A PFC strategy without pre-stabilisation for unstable process 480
Guy Lebret

Stochastic tube MPC for wind turbine control 486
Torben Knudsen, Sina Hassani, Rafal Wisniewski

Time-Optimal Model Predictive Control for Linear Systems with Multiplicative Uncertainties 493
Renato Quartullo, Andrea Garulli, Mirko Leomanni

Cooperative Integrated Estimation-Guidance for Simultaneous Interception of Moving Targets 499
Lohitvel Gopikannan, Shashi Ranjan Kumar, Abhinav Sinha

ARGFree: A Randomized Gradient-Free Algorithm for Aggregative Cooperative Optimization and Applications to Robotic Formation 505
Amir Mehrnoosh, Giuseppe Speciale, Riccardo Brumali, Giuseppe Notarstefano, Gianluca Bianchin

Accelerated Consensus via Share-and-Relay with Two-Hop Information 511
Camilla Fioravanti, Gabriele Oliva, Hideaki Ishii

Fiedler-Based Characterization and Identification of Leaders in Semi-Autonomous Networks 519
Evyatar Matmon, Daniel Zelazo

Cooperative aircraft protection using generalized triangle guidance 525
Susmitha T Rayabagi, Shashi Ranjan Kumar, Debasattam Pal, Dwaipayan Mukherjee

Coupled Attitude-Orbit Formation Control Using Aerodynamic Interactions 531
Rajib Shekhar Pal, Shashi Ranjan Kumar, Dwaipayan Mukherjee

Semilinear Conditions for Global Static Anti-Windup Synthesis with Sign-Indefinite Quadratic Forms 537
Santiago Pantano Calderón, Gerardo Becerra Becerra, Jorge Sofrony Esmeral

Safety-Aware Performance Boosting for Constrained Nonlinear Systems 543
Danilo Saccani, Haoming Shen, Luca Furieri, Giancarlo Ferrari-Trecate

On the inversion of affine map subject to input constraints 549
Jean-François Trégouët

Exploiting Over-Approximation Errors as Preview Information for Nonlinear Control* 555
Antoine Aspeel, Antoine Girard, Thiago Alves Lima

Attitude-Hold Polynomial Guidance for Missiles with Off-Axis Seeker Constraints 561
Ohryeung Kang, Jongchan Park, Min-Jea Tahk, Chang-Hun Lee

Warm-Started Physics-Informed Interior Point Methods for Inequality Constrained Optimal Control 567
Eunbyeol Cho, Jong-Han Kim

Geometry-Driven Embedded Control for Deterministic Quadruped Locomotion and Static CoM Regulation 573
Teemu Saukkio, Syed Mehdi, Hashem Haghbayan

A Self-Tuning External Load Observer for Electro-Hydraulic Systems 581
Sule Taskingollu, Erman Selim, Alper Bayrak, Enver Tatlicioglu, Erkan Zergeroglu

Human Kinematics Based Control of Bipedal Robot Squatting 587
Yelin Jiang, Guoping Zhao, Dennis Haufe, Rolf Findeisen, Maziar Ahmad Sharbafi

Data-Driven and Sensor-Based Spatial Error Characterisation and Correction for Multi-Axis Robots 595
Niranjan Kannali Ramesha, Nikhil Meduri, Frank Schrödel

On Koopman Resolvents and Frequency Response of Nonlinear Systems 602
Yoshihiko Susuki, Natsuki Katayama, Alexandre Mauroy, Igor Mezić

On the phases of tensors under the Einstein product 608
Chengdong Liu, Yimin Wei, Guofeng Zhang

On Small-Time Local Controllability in Nonlinear Dynamical Systems under Zero-Excluding Asymmetric Control Domains 614
Amal Bouazza, Mohamed Boutayeb, Mustapha Oudani

Lipschitz Continuity of Solutions to Parametrized Nonlinear Roesser Systems * 620
O. Bachelier, T. Cluzeau, Q. Helman, F. J. Silva Alvarez, N. Yeganefar

Wellposedness of Irregular Infinite–Dimensional Differential-Algebraic Equations (DAEs) 624
Ala' Alalabi, Lorena Bociu, Birgit Jacob, Kirsten Morris

On the controller form for linear hyperbolic MIMO systems with dynamic boundary conditions 630
Stefan Ecklebe, Frank Woittennek

A μ-Analysis and Synthesis Framework for Partial Integral Equations using IQCs 637
Thijs Lenssen, Aleksandr Talitckii, Matthew Peet, Amritam Das

Predictor-Feedback Stabilization of Linear Switched Systems with State-Dependent Switching and Input Delay* 645
Andreas Katsanikakis, Nikolaos Bekiaris-Liberis, Delphine Bresch-Pietri

A Density-Based Approach to the Dual Koopman Observer 651
Judicaël Mohet, Alexandre Mauroy, Joseph J. Winkin

Fairness-Aware Federated Learning with Trajectory Shapley Value 657
Daniel Kuznetsov, Ziqi Wang

A control-based market-clearing dynamic system for bipartite local energy markets* 663
David Erazo-Caicedo, Sorin Olaru, Patrick Panciatici, Javier Revelo-Fuelagán

Comparison of MPC strategies in a microgrid with hybrid inverters 669
F.J. Barrero, M.G. Satué, C. Vivas, J. F. Rodríguez, F.R Rubio

Chance Constrained Optimal Stochastic Control of an Electrical Storage in a Service Station for Fast Charging of Plug-in Electric Vehicles 675
Francesco Liberati, Alessandro Di Giorgio, Giorgio Koch

Integrating Aggregated Electric Vehicle Flexibilities in Unit Commitment Models using Submodular Optimization 682
Hélène Arvis, Olivier Beaude, Nicolas Gast, Stéphane Gaubert, Bruno Gaujal

Consensus Strategy for State-Aware Coordination of Renewable Energy Sources and Battery Storage Systems in Islanded DC Microgrids 689
Mohammad Amin Rezaei, Mohammad Rajabi Nasab, Luca De Cicco, Silviu-Iulian Niculescu, Arben Cela Saverio Mascolo, Marco Liserre

Population-Game Dynamics for Distributed Energy Transactions in a Peer-to-Peer Market Scheme 695
Sofía Chacón, Katerine Guerrero, Germán Obando, Andrés Pantoja, Carlos Ocampo-Martinez

Attitude Estimation Anomaly-based GNSS Spoofing Detection for Aerial Vehicles* 701
Peter Bauer

Dual Markov Jump Switching System for Fault-Tolerant Control: Application to Quadrotor under Single Rotor Faults 707
Xuepeng Zhang, Gian Paolo Incremona, Patrizio Colaneri, Yang Pei

Truncated Online Dynamic Mode Decomposition with Control for Industrial Change Detection 713
Marek Wadinger, Michal Kvasnica, Yoshinobu Kawahara

Non-Gaussian Causality Analysis in Multivariate Control Systems 719
Filip Kwaśnik, Paweł D. Domański

Sensor Fault Tolerant Control with Motion Modulation of a Wave Energy Converter* 725
Alejandro Gonzalez-Esculpi, Pedro O. Fornaro, John V. Ringwood

A Model Predictive Control Scheme for Flight Scheduling and Energy Management of Electric Aviation Networks 731
Finn Vehlhaber, Mauro Salazar

Nonlinear Model-Based Position Control for a Pneumatically Actuated Assistance System 737
Kaneewar Ibrahim, Robert Prabel, Harald Aschemann

Adaptive Tuning of Parameterized Traffic Controllers via Multi-Agent Reinforcement Learning 743
Giray Önür, Azita Dabiri, Bart De Schutter

Feedback dynamics in Politics: The interplay between sentiment and engagement* 749
Simone Formentin

Control of a mechanical structure using wireless sensors and contactless actuators 755
Henrik Niemann, Hans Christian Falkow, Ádám Csaba Kalocsai, Ilmar Santos

Physics-Informed Bank of Estimators for Joint Estimation of States and Parameters for Nonlinear Disturbed Systems 761
Mohamed Boukaf, Zehor Belkhatir, Mohamed Chadli, Taous Meriem Laleg Kirati

Dynamic Covariance Estimation in EKF via Deep Learning for Agricultural Vehicle Localization 767
Andrea D'Antona, Jacopo Rizzi, Saverio Farsoni, Marcello Bonfè

Sample-based Moving Horizon Estimation 774
Isabelle Krauss, Victor G. Lopez, Matthias A. Müller

Transformation of backward observable discrete-time systems into a generalized observer form 780
Arvo Kaldmäe, Ülle Kotta, Maris Tõnso

Observer Design for Lipschitz Systems: Exact Nonlinear Decomposition for LMI Relaxations 786
Thierry-Marie Guerra, Rafael Silva, Ali Zemouche, Anh-Tu Nguyen

Precise Beam Steering Using a Hemispherical Gimbal for the Cube1G Laser Communication Terminal 792
René Rüddenklau, Lukas Rupert Rodeck, Hannes Zeihsel

New Insights into Cascaded Geometric Flight Control: From Performance Guarantees to Practical Pitfalls 798
Brett T. Lopez

Robust Integral Sliding Mode Control for Aircraft On-Ground Obstacle Avoidance 805
Antonio Del Borrello, José Joaquín Mendoza Lopetegui, Mara Tanelli

Sliding Mode Control based Line-of-Sight Stabilization of a 2-DOF Gimbal 811
Vinay Kathiriya, Saurabh Kumar, Rohit V. Nanavati, Shashi Ranjan Kumar, Hemendra Arya

Soft Actor-Critic based Gust Load Alleviation Control Design for an Experimental Flexible Wing 817
Ramesh Konatala, Gertjan Looye, E. van Kampen

Observer-based Iterative Learning Control of Discrete-time Luré Systems 825
Jan Bendtsen, Eric Rogers

Cautious Learning of Vehicle Controller Parameters via Constrained Multi-Fidelity Bayesian Optimization 831
Yongpeng Zhao, Maik Pfefferkorn, Maximilian Templer, Daniel Töpfer, Rolf Findeisen

Transformer-Based Multi-Agent Reinforcement Learning for Networked Systems with Long-Range Interactions 839
Vidur Sinha, Muhammed Ustaomeroglu, Guannan Qu

Efficient Controller Learning from Human Preferences and Numerical Data via Multi-Modal Surrogate Models 847
Lukas Theiner, Maik Pfefferkorn, Yongpeng Zhao, Sebastian Hirt, Rolf Findeisen

MARBLE: Multi-Armed Restless Bandits in Latent Markovian Environment 855
Mohsen Amiri, Konstantin Avrachenkov, Ibtihal El Mimouni, Sindri Magnússon

Federated Learning for Data-Driven Feedforward Control: A Case Study on Vehicle Lateral Dynamics 862
Jakob Weber, Markus Gurtner, Benedikt Alt, Adrian Trachte, Andreas Kugi

Conformal Prediction-Based MPC for Stochastic Linear Systems 870
Lukas Vogel, Andrea Carron, Eleftherios E. Vlahakis, Dimos V. Dimarogonas

Stability of data-driven Koopman MPC with terminal conditions* 876
Irene Schimperna, Lea Bold, Johannes Köhler, Karl Worthmann, Lalo Magni

An adaptive extension to robust data-driven predictive control under parametric uncertainty 884
Ignacio Sanchez, Filiberto Fele, Daniel Limon

Automated Monitoring Specification Synthesis based on symbolic control 890
Marcus Kreuzer, Alexander Weber, Alexander Knoll

Distributed Mobile Sensor Coordination with Provable Optimal Coverage in Obstructed Environments 898
Najmeh Zamani, Amir G. Aghdam

Coordination versus Selfishness: The Impact on Traffic Efficiency 904
Colton Hill, Tommaso Toso, Philip N. Brown

Cooperative guidance for simultaneous interception over ring digraphs 910
Sahaya Aarti Dennisselvan, Shashi Ranjan Kumar, Dwaipayan Mukherjee

Decentralized Cooperative Control for Multi-UAV Navigation via Proximity-Triggered Communication 916
Sanzhar Kusdavletov, Arystan Amangeldi

Reputation-Driven Cooperative Control for Networked Systems with Input Saturation and Malicious Nodes 922
Jiacheng Li, Jason J. R. Liu, Hak-Keung Lam

Probabilistic Safety under Arbitrary Disturbance Distributions using Piecewise-Affine Control Barrier Functions 928
Matisse Teuwen, Mathijs Schuurmans, Panagiotis Patrinos

Control Barrier Functions for Nonlinear Singularly Perturbed Systems 935
Prashanth Krishnamurthy, Farshad Khorrami

Uniform Feasibility For Smoothed Backup Control Barrier Functions 941
Anil Alan, Bart De Schutter

Sampling-Aware Control Barrier Functions for Safety-Critical and Finite-Time Constrained Control 949
Shuo Liu, Wei Xiao, Calin A. Belta

Time-dependent HOCBFs for a Partially Controllable Path-Following System 956
Florian Gschwandtner, Jonathan Specht, Marc-Philipp Schmid, Thomas Meurer, Oliver Sawodny

Distributed Safety Critical Control among Uncontrollable Agents Using Reconstructed Control Barrier Functions 962
Yuzhang Peng, Wei Wang, Jiaqi Yan, Mengze Yu

Learning to Steer Fixed-Wing UAVs from Image Sequences via Flow Matching 968
Jiarun Yan, Yangguang Yu, Yinbo Xu, Xiangke Wang, Xiaoxiong Zhang, Hao Yan

Curriculum-based Sample Efficient Reinforcement Learning for Robust Stabilization of a Quadrotor 975
Fausto Mauricio Lagos Suarez, Akshit Saradagi, Vidya Sumathy, Shruti Kotpalliwar George Nikolakopoulos

A Hybrid Rule-Based Controller for Phase-Synchronized Quadrotor Landing on a Moving Platform* 983
Marie A. Schweim, Anne K. Schweim, Mirco Alpen, Joachim Horn

Combined Feedforward and Feedback Dynamic Trajectory Tracking Control of a Soft Robot 989
Malte Grube, Marven Mathis Mehring, Robert Seifried

Pontryagin-Augmented NMPC for Stable Quadrotor Landing Under Learned Downwash Disturbances 995
Pratik Mukherjee

Robust end-effector trajectory control of rigid robotic manipulators subjected to base vibrations 1003
Han Yao, Alexander Lanzon

Safe scheduling design for networked control systems 1009
Anubhab Dasgupta, Khushboo Kumari, Atreyee Kundu

Bandwidth reduction methods for packetized MPC over lossy networks 1015
Alberto Mingoia, Matthias Pezzutto, Fernando S Barbosa, David Umsonst

Cloud-based Reference Governor with Dynamic Computation Offloading over Shared Computing Resources 1022
Xiyu Gu, Subhrakanti Dey, Matthias Pezzutto

An H_2-norm approach to performance analysis of networked control systems under multiplicative routing transformations 1028
Ruslan Seifullaev, André M. H. Teixeira

Pilot-Free Optimal Control of Linear Systems over OFDM Networks via Control-Aided Channel Prediction 1034
Minjie Tang, Zunqi Li, Marios Kountouris, Photios A. Stavrou

An Application of the Generalized KYP Lemma to Optimal H_2 Model Reduction 1040
W. Zhu, I.M. Jaimoukha

Local Rational Modeling with Differential Filtering for Frequency Response Function Estimation from Point-to-Point Motion Data 1046
Yoshihiro Maeda

A data-based system representation: the coordinate-free case 1052
Z. Szabó, J. Bokor, P. Gáspár

The PhasorArray Toolbox for Harmonic Analysis and Control Design 1060
Maxime Grosso, Pierre Riedinger, Jamal Daafouz

Abstraction-Based Model Reduction of Linear Systems with Output Uncertainty 1066
Melvyn D. Wildeboer, Jacquelien M. A. Scherpen, Bart Besselink

Model Reduction for Controlled Quantum Markov Dynamics 1072
Tommaso Grigoletto, Lorenza Viola, Francesco Ticozzi

Air Supply Control for Proton Exchange Membrane Fuel Cells without Explicit Modeling 1078
Meziane Ait Ziane, Michel Zasadzinski, Cédric Join, Michel Fliess

Design and analysis of sliding mode observers for State-of-Charge estimation in Li-ion cells under realistic conditions 1084
Giorgio Riva, Stefano Radrizzani, Andrea Trivella, Gian Paolo Incremona, Antonella Ferrara Matteo Corno

Interval Estimation for an Electrochemical Lithium-Ion Battery Model 1090
Wissam Khennoune, Thach Ngoc Dinh, Marit Lahme, Andreas Rauh, Jérémy Van Gorp, Mathieu Moze

Dynamic security region construction method considering variable load for industrial gas pipeline network 1098
Hongxin Dong, Zhongyang Han, Ze Wang, Jun Zhao, Wei Wang

Fuel Cell Vehicle Energy Management through Nonlinear MPC and Efficient Speed Prediction 1104
Hongda Weng, Fredy Ruiz

Grid-Aware Discrete-Event Allocation and Scheduling of Electric Buses Charging 1110
Lorenzo Farina, Giulio Ferro, Luca Parodi, Michela Robba

Optimizing performance of sensor network for optimal static output feedback control of parabolic PDEs 1116
Michael A. Demetriou

Backstepping Stabilization of Large-Scale 2×2 Hyperbolic PDEs Through Continuum Ensembles of 2×2 Systems 1122
Jukka-Pekka Humaloja, Nikolaos Bekiaris-Liberis

Fixed-Time Compensation of Input-Dependent Hydraulic Input Delay For a Model of a Microfluidic Process Under Zweifach-Fung Effect 1128
Salim Zekraoui, Delphine Bresch-Pietri, Nicolas Espitia, Nikolaos Bekiaris-Liberis, Nicolas Petit

Inverse-dynamics observer design for a linear single-track vehicle model with distributed tire dynamics 1134
Luigi Romano, Ole Morten Aamo, Jan Åslund, Erik Frisk

Reduced order model based iterative learning control for reduced lift fluctuation in wind turbine blades 1140
Weronika Nowicki, Bing Chu, Owen Tutty, Eric Rogers

Hypnosis-Sedation Formulation for Unique Steady-State Solution in Predictive Control of Anesthesia 1146
Erhan Yumuk, Dana Copot, Bora Ayvaz, Clara M. Ionescu

Digital-Twin-Assisted Predictive Control With AI Bias Correction for Optimizing Drug Titration in Anesthesia 1152
G. Ben Othman, B. Ayvaz, E. Yumuk, D. Copot, A. R. Ynineb, B. Khoumeri, I. R. Birs, M. D. Mihai C. I. Muresan, C. M. Ionescu

Parametric Identification and Reduced-Order Modeling for Closed-Loop Anesthesia Control 1158
Amani R. Ynineb, Robin De Keyser, Bouchra Khoumeri, Bora Ayvaz, Erhan Yumuk, Marcian D. Mihai Ghada Ben Othman, Dana Copot, Cristina I. Muresan, Clara M. Ionescu

Bridging Clinical Knowledge and Reinforcement Learning in Automated Insulin Delivery: An LLM-in-the-Loop Approach 1164
Giada Lops, Taha Ramdan, Vito Andrea Racanelli, Luca De Cicco, Saverio Mascolo

Tissue Activation Calculation in Dual-lead Deep Brain Stimulation* 1170
Anna Franziska Frigge, Alexander Medvedev

One-Shot Policy Iteration for Dynamic Output-Feedback Control of Discrete-Time Nonlinear Systems 1176
Keisuke Baba, Tomonori Sadamoto

Output Feedback Controller Synthesis with Finite Frequency Positive Realness Constraint 1182
Dmitry Rimorov, James R. Forbes

Receptance-based Eigenvalue Assignment by Output-Feedback with Reduced Sensing and Actuation 1188
Darius Becher, Robert Schmid, Johann Reger

Controller Design for Structured State-space Models via Contraction Theory 1195
Muhammad Zakwan, Vaibhav Gupta, Alireza Karimi, Efe C. Balta, Giancarlo Ferrari-Trecate

Memory DOF Control for Discrete-time LPV Systems: Two Iterative LMI-based Approaches 1201
Túlio A. Moura, Cecília F. Morais

Eco-Driving with Green Light Optimal Speed Advisory via Mixed-Integer Quadratic Programming and Model Predictive Control 1209
Steffen Schmees, Marvin Bergmann, Daniel Görges

Cooperative Adaptive Cruise Control with Variable Time Headway for Graceful Degradation under Fluctuating Network Quality of Service 1217
Johannes Böhm, Eric Schöneberg, Kevin Schmidt, Wolfgang Fischer, Daniel Görges

Two-dimensional Spatial Optimization for Electric Motorcycle Powertrain Elements using Mixed-integer Programming 1225
Jorn Van Kampen, Chun-Cheng Huang, Mauro Salazar

Neural ODE-based Optimal Thermal System Control for Electric Vehicles with multi-functional Heat Pump System * 1231
Simon Buck, Benedikt Alt, Julius Aka, Lars Mikelsons

Discrete-Time Model of a Two-Speed PowerShift suitable for Real-Time Control and Simulation 1238
Riccardo Morselli, Davide Tebaldi, Roberto Zanasi

Context-dependent management of multi-objective adaptive cruise control 1244
Gunda Singer, Simone Formentin, Luigi Del Re

Input–Output Data-Driven Stabilization of Continuous-Time Linear MIMO Systems 1250
Haihui Gao, Alessandro Bosso, Lei Wang, David Saussié, Bowen Yi

On Tikhonov Regularization for Direct and Indirect Data-Driven LQR Control 1256
Shuyuan Zhang, Zheming Wang, Raphaël M. Jungers

PID control in the era of data-driven engineering: evolution, integration and challenges 1262
R. Vilanova, O. Arrieta, A. Visioli

Resilient Direct Data-Driven Control Design under Poisoned Input–State Samples 1269
Mojtaba Kaheni, Niklas Persson, Alessandro V. Papadopoulos

Safety-Guaranteed Imitation Learning from Nonlinear Model Predictive Control for Spacecraft Close Proximity Operations 1276
Alexander Meinert, Niklas Baldauf, Peter Stadler, Alen Turnwald

Using Learned Flow-Matching Surrogate Models for Adaptive Receding-Horizon Control 1282
Philipp Holzmann, Maik Pfefferkorn, Jan Peters, Richard D. Braatz, Rolf Findeisen

Exploiting Dynamic Similarity for Direct Transfer of MPC-based Policies 1289
Josip Kir Hromatko, Shambhuraj Sawant, Iandor Ileš, Sébastien Gros

Model Predictive Control and Moving Horizon Estimation using Statistically Weighted Data-Based Ensemble Models 1296
Laura Boca de Giuli, Samuel Mallick, Alessio La Bella, Azita Dabiri, Bart De Schutter, Riccardo Scattolini

Rollout Then Optimize: A One-Step Newton Refinement of Learned Policies for Nonlinear Model Predictive Control 1302
Andrea Ghezzi, Rudolf Reiter, Katrin Baumgärtner, Alberto Bemporad, Moritz Diehl

On two-degrees-of-freedom agreement protocols 1309
Gal Barkai, Leonid Mirkin, Daniel Zelazo

Tight displacement-based formation control under bounded disturbances. A set-theoretic perspective 1315
Vlad-Matei Angheluţă, Bogdan Gheorghe, Daniel Ioan, Ionela Prodan, Florin Stoican

ADMM-based Distributed Coordination of CAVs at Unsignalised Intersections 1321
Kenta Matsui, Jose Escribano Macias, Panagiotis Angeloudis

Distributed Rigid Formation Control of Aerial Robots via Spherical Event Cameras 1329
Andrea Infanti, Bojan Mavkov, Fabio Morbidi, Guillaume Allibert

Rigid formation control in multi-robot systems using Lagrange Multipliers 1337
Francisco José Mañas-Álvarez, María Guinaldo, Raquel Dormido, Sebastian Dormido

Robust, Violation-Free Distributed Safe Control for Multi-Agent Systems 1343
Wei Tan, Xin Chen, Dingchen Yan, Boyu Wen

Nonlinearly preconditioned gradient flows 1349
Konstantinos Oikonomidis, Alexander Bodard, Jan Quan, Panagiotis Patrinos

Krylov Subspace Acceleration for First-Order Splitting Methods in Convex Quadratic Programming 1355
Gabriel Berk Pereira, Paul J. Goulart

Convergence Analysis of Distributed Optimization: A Dissipativity Framework 1363
A. Karakai, J. Eising, A. Martinelli, F. Dörfler

Removing Time-Scale Separation in Feedback-Based Optimization via Estimators 1369
Niloufar Yousefi, John W. Simpson-Porco

Safe Mode-Switching Control Architecture for Robotic-Assisted Surgery Integrating Teleoperation and Autonomy 1376
Theodora Kastritsi, Luigi Villani, Bruno Siciliano, Fanny Ficuciello

Adaptive Safety Filter for Refining Manipulator Control in Shared Human-Robot Spaces* 1384
Ariana Spalter, John S. Baras, Laura M. Hiatt

Safety-Critical Control of Flexible Payload Manipulation Using High Order Control Barrier Functions* 1391
Harun Tugal, Adam Slater, William Harwin, Samuel Herschmann, Kaiqiang Zhang, Robert Skilton

Towards Certified Sim-to-Real Transfer via Stochastic Simulation-Gap Functions 1398
P Sangeerth, Abolfazl Lavaei, Pushpak Jagtap

A novel interconnection of Dynamic Movement Primitives (DMP) with a modified low impedance controlled robot for accurate tracking and compliant robot reactions 1404
Konstantinos Vlachos, Zoe Doulgeri

Optimal Whole-Body Collision Avoidance for Serial Manipulators using Velocity Obstacles 1410
Nicola Piccinelli, Federico Vesentini, Riccardo Muradore

Formal Verification of Control Lyapunov-Barrier Functions for Safe Stabilization with Bounded Controls 1416
Jun Liu

Computation of Lyapunov functions using Zubov's equation and meshless collocation 1422
Peter Giesl, Sigurdur Hafstein

Adaptive Meshing for CPA Lyapunov Function Synthesis* 1428
Amy K. Strong, I. Samuel Akinwande, Leila J. Bridgeman

Time-varying optimal control under measurement errors 1434
Patrick Schmidt, Stefan Streif

Towards Learning and Verifying Maximal Lyapunov-Barrier Functions with a Zubov PDE Formulation 1442
Yiming Meng, Jun Liu

Optimizing Control using Control Lyapunov Functions and Linear Programming 1450
Sigurdur Freyr Hafstein, Patrick Schmidt, Stefan Streif

Generalized Input-Output Hidden Markov Models for Monitoring Finite-Step Cyclic Processes* 1457
Georgios C. Chasparis

A Multi-Fidelity Residual-Correction Framework for Industrial Soft Sensing 1464
Rastislav Fáber, Marco Vaccari, Riccardo Bacci di Capaci, Gabriele Pannocchia, Radoslav Paulen

Efficient Quantification of Time-Series Prediction Error: Optimal Selection Conformal Prediction 1470
Boyu Pang, Kostas Margellos

Frequency-Domain Validation of a Hydraulic Model and Stability Margin Identification Using Multisines on Real Deepwater Wells 1476
Tarek El-Agroudi, Glenn-Ole Kaasa, Lars Imsland

Global Tensor Field Formulation of the Fokker–Planck Equation on Riemannian Manifolds 1482
Taeyoung Lee, Gregory S. Chirikjian

Physics-Informed Data-Driven Modeling of Tool–Soil–Object Interaction 1488
Mohammad Heravi, Amirmasoud Molaei, Martin Servin, Reza Ghabcheloo

Laplacian-Based Modeling and Identification of Thermal Interactions in Lithium-ion Battery Packs 1495
Saima Alam, Vignesh Narayanan, Avimanyu Sahoo

Quantifying Informativity of Identification Datasets for Modelling Lithium-ion Batteries 1501
A.M.A. Sheikh, N.A. Weinreich, H.J. Bergveld, M.C.F. Donkers

Graceful Safety Control of Lithium-Ion Battery Core Temperature 1507
Yejin Moon, Hosam K. Fathy

Residual Bias Compensation Dual Extended Kalman Filter for Physics-Based SOC Estimation in Lithium Iron Phosphate Batteries 1513
Feng Guo, Luis D. Couto, Khiem Trad, Guangdi Hu, Mohammadhosein Safari

Impact of Aging on SOC-based Passive Balancing of Li-ion Battery Packs 1519
Ali Rahdarian, Michel Kinnaert

Robust and learning-augmented algorithms for degradation-aware battery optimization 1525
Jack Umenberger, Anna Osguthorpe Rasmussen

A Comparison Theorem for Algebraic Riccati Equations for Strongly Stabilizable Infinite-Dimensional Systems 1533
Orest V. Iftime

A PDE-constrained Optimization Approach to Optimal Trajectory Planning under Uncertainty via Reflected Schrödinger Bridges 1539
Wenxin Liu, Dante Kalise

Loewner Matrices-Based Time-Delay Approximation with Pole-Placement of a Controlled Single Machine Infinite Bus with Measurement Delays 1545
Orest V. Iftime, Tudor C. Ionescu, Sami Tliba, Islam Boussaada

A Gradient Method for Risk Averse Control of a PDE-SDE Interconnected System 1551
Gabriel Velho, Jean Auriol, Riccardo Bonalli

From Real Muscles to Virtual Contractions: Generative Modeling of Surface Electromyography Contractions 1557
Stefano Marocco, Giulio Saroglia, Inès Chihi, Igor Stefanini

Towards A Digital Twin for Violinists and Clarinetists: Preventive Musculoskeletal Monitoring of Playing-Related Disorders 1562
Hajer Gammoudi, Laura Serra Marin, Luis A. Leiva, Luc Nijs, Inès Chihi

cVAE-Hemodynamics: Controllable Aortic Waveform Generation 1570
Giulio Saroglia, Stefano Marocco, Inès Chihi, Igor Stefanini

Compartmental Recurrent Neural Networks for Modeling Glucose-Insulin Dynamics 1576
Stefano De Carli, Nicola Licini, Davide Previtali, Fabio Previdi, Antonio Ferramosca

Physics-Informed Neural Networks for Fractional SEIR Models with Power Mittag-Leffler Kernels 1582
Zakaria Id-Said, Mohammed Kasbouya, Adnane Boukhouima, Mohamed Boutayeb, El Mehdi Lotfi

Physics-Informed Neural Estimation of State and Unknown Input in Autonomic Cardiac Dynamics with Left-Invertibility Constraints 1588
Sara Nour Sadoun, Giuseppe Alessio D'Inverno, Arnaud Boutin, François Cottin Taous-Meriem Laleg-Kirati

Identification of contractive Lur'e-type systems via kernel-based Lipschitz design 1594
Cesare Donati, Fabrizio Dabbene, Constantino Lagoa, Carlo Novara, Yoshio Ebihara

Sparse Identification of Systems with Both Abrupt and Slowly Varying Nonlinear Dynamics * 1600
Tore Gude, Lars Struen Imsland

Spectral Flow Learning Theory: Finite-Sample Guarantees for System Identification 1606
Chi Ho Leung, Philip E. Paré

Estimation of Time-Varying Parameters using Dynamic Regressor Extension and Mixing 1612
Emil Lykke Diget, Christoffer Sloth

KoopCL: Koopman-Based System Identification via Concurrent Learning 1618
Reza Najarzadeh, Tom Kaufmann, Johann Reger

Dynamic Association of Semantics and Parameter Estimates by Filtering 1626
Marcus Greiff, Ray Zhang, Thomas Lew, John Subosits

Longitudinal Control of Vehicle Platoon Using Negative-Imaginary Theory with Guaranteed String Stability* 1633
Raghvendra Kaushik, Arnab Dey

Stability of Information-Based Routing in Dynamic Transportation Networks 1639
Shaya Garjani, Ashish Cherukuri, Bayu Jayawardhana, Nima Monshizadeh

Hybrid Evolutionary Optimization for Electric Vehicle Routing under Battery State-of-Health Uncertainty 1645
Hadis Mohammadi, Eero Immonen, Hashem Haghbayan

A distributed resilient architecture for networked vehicle platoons during outdoor missions using digital twin and perturbation analysis 1653
Giuseppe Franzè, Domenico Famularo, Francesco Tedesco, Antonello Venturino, Giancarlo Fortino

Distributed Adaptive Control for Heterogeneous Nonlinear CAVs Platoons with Safety Space Constraint Guarantees 1659
Raffaele Cappiello, Dario Giuseppe Lui, Alberto Petrillo, Mauro Salazar, Stefania Santini

Metriplectic Conditional Flow Matching for Structure-Preserving Dynamics Learning 1665
Ali Baheri, Lars Lindemann

Physics-Informed Neural Networks for Nonlinear Output Regulation 1671
Sebastiano Mengozzi, Giovanni B. Esposito, Michelangelo Bin, Andrea Acquaviva, Andrea Bartolini Lorenzo Marconi

Recurrent Neural Network-Based Online Tuning of Control Matrices for Cooperative Systems with Switching Communication Topologies 1678
Ovidiu Pauca, Letitia Mirea, Constantin-Florin Caruntu

Application-Specific Component-Aware Structured Pruning of Deep Neural Networks in Control via Soft Coefficient Optimization 1684
Ganesh Sundaram, Jonas Ulmen, Amjad Haider, Daniel Görges

Turnpikes in Deep Learning: Beyond ResNets and Neural ODEs? 1690
Jens Püttschneider, Simon Heilig, Linara Adilova, Asja Fischer, Timm Faulwasser

Stability-Preserving Online Adaptation of Neural Closed-loop Maps 1697
Danilo Saccani, Luca Furieri, Giancarlo Ferrari-Trecate

Pick to Learn for Stochastic Economic Model Predictive Control with an Expected Shortfall Constraint 1703
Alireza Arastou, Algo Carè, Ye Wang, Marco Campi, Erik Weyer

Exploiting Differential Flatness for Efficient Learning-based Model Predictive Control of Constrained Multi-Input Control Affine Systems 1709
Tobias A. Farger, Adam W. Hall, Angela P. Schoellig

Real-time Gaussian Process based Approximate Model Predictive Trajectory Tracking Control for Autonomous Vehicles 1715
Alexander Rose, Lukas Theiner, Rolf Findeisen

Distributionally Robust Approximate MPC of Markov Jump Linear Systems 1721
Melanie Gallant, Christoph Mark, Kevin Schmidt

Less is More: Contextual Sampling for Nonlinear Data-Driven Predictive Control 1727
Julius Beerwerth, Bassam Alrifaee

Lyapunov-Based Distributed Control for Cooperative Circumnavigation with Sparse Target Information 1733
Kushal Pratap Singh, Hariom, Twinkle Tripathy

A Poisson Jump-driven SDE Approach to Distributed Gradient Descent with Sparse Communication 1739
Marc Weber, John Paul Strachan, Christian Ebenbauer

Adaptive Supertwisting-based Control with Auto-tuning Methodology for Distributed Consensus of Second-order Multi-agent Systems 1746
Mohammad Javad Mirzaei, Mohamed Assaad Hamida, Franck Plestan

Opacity Enforcement for Distributed Control Systems 1752
Obaidullah Yadgar, Ping Zhang

Distributed optimal control of discrete-time linear systems with reduced communication 1758
Stefano Battilotti, Alessandro Borri, Filippo Cacace, Massimiliano D'Angelo

Heterogeneous Multi-Agent Multi-Target Tracking using Cellular Sheaves 1764
Tyler Hanks, Cristian F. Nino, Joana Bou Barcelo, Austin Copeland, Warren Dixon, James Fairbanks

Free-Energy Minimizing Policies Under Generative Model Ambiguity 1772
Arash Shafiei, Caio César Graciani Rodrigues, Giovanni Russo

Strategically Robust Aggregative Games 1780
Andreas Feik, Nicolas Lanzetti, Saverio Bolognani, Florian Dörfler, Dario Paccagnan

Sparse shepherding control of large-scale multi-agent systems via Reinforcement Learning 1786
Luigi Catello, Italo Napolitano, Davide Salzano, Mario Di Bernardo

Nonlinear MPC for Feedback-Interconnected Systems: a Suboptimal and Reduced-Order Model Approach 1792
Stefano Di Gregorio, Guido Carnevale, Giuseppe Notarstefano

Generative Adversarial Networks as Cournot Games: A Control-Theoretic Perspective on Adversarial Learning Dynamics 1798
Dario Bauso, Tamer Başar

Virtual rigid obstacles for safe robot navigation in unknown domains with convex obstacles 1804
Bogdan I. Gavrea, Spring Berman, Hamed Farivarnejad

A Taylor Series Approach to Correct Localization Errors in Robotic Field Mapping using Gaussian Processes 1811
Muzaffar Qureshi, Tochukwu Elijah Ogri, Kyle Volle, Rushikesh Kamalapurkar

How to Capture Human Preference: Commissioning of a Robotic Use-Case via Preferential Bayesian Optimisation 1817
S. De Witte, J. Taets, A. Retzler, G. Crevecoeur, T. Lefebvre

Wheel odometry & GNSS fusion with neural network-based tuning 1825
Máté Fazekas, Péter Gáspár

Anytime Coverage Trajectory Planning in Uncertain Environments 1831
Xiong Xiong, Luca Bascetta

Where to Fly, What to Send: Communication-Aware Aerial Support for Ground Robots 1837
Harshil Suthar, Dipankar Maity

On the Bound for Control Systems That Are Flat by Pure Prolongation 1844
Jean Lévine, Jaume Franch

Flatness of Two-Input Discrete-Time Systems and their Linearization 1850
Johannes Schrotshamer, Bernd Kolar, Markus Schöberl

A control-theoretic simplification of adaptive bitrate (ABR) video streaming 1858
Michel Fliess, Cédric Join

A Flat Triangular Structure Based on a Multi-Chained Form 1864
Georg Hartl, Conrad Gstöttner, Markus Schöberl

Numerical Discretization Schemes that Preserve Flatness 1872
Ashutosh Jindal, Florentina Nicolau, David Martín Diego, Ravi Banavar

Bridging Desktop and Online Simulation: A Web Engine for Scilab/Xcos Virtual Experimentation 1878
Jakub Matišák, Adrián Vrbovský, Katarína Žáková

An improved smartphone app to teach transfer function concepts 1884
Antonio Di Filippo, Alessandro Vigorelli, Antonio Visioli

Gender Inclusion as a System-Level Design Objective in STEM and Control Education: Post-COVID Insights from Belgium and Italy 1890
Clara M. Ionescu, Dana Copot, Nele De Geeter, Bouchra Khoumeri, Maria Losurdo, Monica Favaro

Partial End-to-End Reinforcement Learning of Soft-Actor-Critic Agents for Miniature Robot Car Racing 1896
Frank Tränkle

Interactive Mass-Spring-Damper Models for Control Education * 1902
Jakub Daniš, Roman Koiš, Jakub Matišák, Katarína Žáková

An Approach for the Qualitative Graphical Representation of the Describing Function in Nonlinear Systems Stability Analysis 1908
Davide Tebaldi, Roberto Zanasi

Data-Driven Control of Inverter-Based Microgrids 1914
Temitope Amuda, Eric Silk, T.G. Roberts, Alejandro D. Domínguez-García

Probabilistic-Robust MPC for Fault Detection Applied to Microgrids 1920
P. Velarde, A. Hernández-Rivera, A. Zafra-Cabeza, C. Bordons

Modelling, Analysis and Control of a Power Flow Controller for AC-DC Meshed Grids 1926
Lukas Cafran, Tanguy Simon, Jean-François Trégouët, Jean-Yves Gauthier, Xuefang Lin-Shi Roman Le Goff Latimier, Hamid Ben Ahmed, Gurvan Jodin

A PI-like Bounded Nonlinear Controller for DC-DC Boost Converters 1932
Angelo Lunardi, Frédéric Mazenc, Alessio Iovine

Power Hardware-in-the-loop Interfacing via □∞ Model Matching 1938
Jonathan Eid, Ashley Meagher, Dmitry Rimorov, Anil Kumar Bonala, Rajendra Thike James Richard Forbes

A Reduced-Order Chorin Projection Method Based on POD for Control of Incompressible MHD Flows 1944
S.S. Ravindran

Gain Selection for a Restricted Kalman Filter Applied to State Estimation of Advection-Diffusion PDEs with Mobile Sensors 1950
Tyler W. Lizotte, Michael A. Demetriou, Nikolaos A. Gatsonis

Efficient algorithms for expected value estimation for Markov diffusions: projected Kolmogorov equation based approach 1956
Sergey Bravyi, Robert Manson-Sawko, Mykhaylo Zayats, Sergiy Zhuk

PDE State Observers for Lithium-Ion Batteries Considering Temperature Effects 1962
Sara Sepasiahooyi, Shu-Xia Tang

Structural Identifiability and Discrete Symmetries* 1968
Xabier Rey Barreiro, Nick Baberuxki, Meskerem Abebaw Mebratie, Alejandro F. Villaverde Werner M. Seiler

Dynamic modeling and robust calibration of microalgal photoacclimation and photoinhibition* 1975
Manon Pugnet, Walid Djema, Térence Bayen, Olivier Bernard

Identifiability and Optimal Experimental Design of a model for Industrial Food Washing Processes 1981
Ari S. Moreno-Razo, Nerea Martínez-López, Míriam R. García, Carlos Vilas

Identifiability analysis of a class of pharmacodynamic systems describing antimicrobial resistance 1987
Nerea Martínez-López, Adrián Pedreira, José A. Vázquez, Carlos Vilas, Míriam R. García

Training the SATHE Model to Predict Temperature and Productivity in Microalgae Biofilm Reactors 1993
A. Gharib, W. Djema, F. Guihéneuf, F. Casagli, O. Bernard

Overall Mean Squared Error-Based Optimal Experimental Design for Parameter Identification of a HEK293 Cell Growth Model - Matlab Toolbox and Experimental Results 1999
Carlos Segura Piña, Pierre Denis, Adrien Boes, Emeline Puissant, Riccardo Marega, François Côte Patrice Filée, Constantinos Theodoropoulos, Laurent Dewasme, Alain Vande Wouwer

Weighted Moment-SoS Approach to POMDPs with Polynomial Data 2006

Cross-Modal Reinforcement Learning for Navigation with Degraded Depth Measurements 2612
Omkar Sawant, Luca Zanatta, Grzegorz Malczyk, Kostas Alexis

Augmented Model Predictive Control: A Balance between Satellite Agility and Computation Complexity 2620
Yiming Wang, Mihindukulasooriya Sheral Crescent Tissera, Haihong Yu, Kai Jie Ethan Foo Sean Yeo Keyuan, Ankit Srivastava, Hao An

Prescribed Output Tracking Performance under Finite-Level Input Quantization 2628
Lampros N. Bikas, George A. Rovithakis

Region of Attraction Estimate Learning and Verification for Nonlinear Systems using Neural-Network-based Lyapunov Functions 2634
Adel Bechihi, Aristotelis Kapnopoulos

Contraction Theory and Timescale Separation for Interconnected Nonlinear Systems 2640
Guido Carnevale, Nicola Bastianello, Ruggero Carli, Luca Schenato, Giuseppe Notarstefano

Input-to-state stability (ISS) for a class of piecewise affine (PWA) systems 2646
Radu Cimpean, Alef Sterk, Stephan Trenn

Stabilizing switched systems with both unstable subsystems by bounded average activation time switching 2652
Shenyu Liu

On the equivalence of Lyapunov exponents for singularly perturbed systems and their corresponding switched DAE 2658
Stephan Trenn, Ihab Haidar, Paolo Mason, Mario Sigalotti

Model-reference data-driven control of switched linear systems: a preliminary study 2664
Antonio Russo, Francesco Tucci, Alberto Cavallo

Optimization-based Identification of Weaknesses in Nonlinear Closed-Loop Systems Using Worst-Case Signal Generation 2670
Paul Westhauser, Cornelia Geischläger, Andreas Pfeffer, Dominik Büchl, Jakob Weber, Markus Gurtner Andreas Körner

A Bridge-Server Framework for FMU-Based Co-Simulation Across Industrial Communication Protocols 2678
Kristian Klemets, Jari Böling, Mikael Manngård

Agent-in-the-Loop: Using AI Agents to Perform Control-Oriented Simulation Tasks 2685
Christoffer Björkskog, Lamin Jatta, Mikael Manngård

Using Large Language Models for Black-Box Testing of FMU-Based Simulations 2692
Abdullah Mughees, Gaadha Sudheerbabu, Tanwir Ahmad, Dragos Truscan, Mikael Manngård Kristian Klemets

An MBSE-Based Framework for Configurable and Toolchain-Independent Modular Engine Simulation 2700
Dominik Walica, Isa Banagar, Eileen Neukirchen, Amin Andwari, Juho Könnö

Adaptive Incentive Design with Regret Minimization 2706
Georgios Vasileiou, Lantian Zhang, Silun Zhang

Kinematic Vision Approach for Estimating Reaction Forces and Rotation Dynamics of Cable Slabs for High-Performance Motion Control Applications 2713
Yazan M. Al-Rawashdeh, Mohammad Al Saaideh, Natheer Alatawneh, Mohammad Al Janaideh

Event-Triggered Adaptive PI Control for Mitigating Congestion in Shared Storage Systems 2719
Kouds Halitim, Thomas Collignon, Bogdan Robu, Raphaël Bleuse, Sophie Cerf, Éric Rutten

Singular Perturbation Analysis of Direct Adaptive Control Using a Proportional Integral Update Law 2727
Tom Kaufmann, Johann Reger

Adaptive Steady-State Compressor Control using Multidimensional Piecewise Linear Models 2735
Adrian L. Pavlak, Trym A. L. Gabrielsen, Lars S. Imsland, John-Morten Godhavn

Offline Multi-Agent Reinforcement Learning for pH and Dissolved Oxygen Regulation in Microalgae Bioreactors* 2742
Juan D. Gil, Ehecatl Antonio Del Rio Chanona, José L. Guzmán, Manuel Berenguel

Design of a Biomolecular Signal Buffer for Retroactivity Suppression toward Short-Term Molecular Memory 2748
Takashi Nakakuki

Alternating Bang-Bang Biocontrol Regimes for Optimized Banana Yield under Nematode Pressure* 2756
Frank Kemayou, Walid Djema, Samuel Bowong, Frédéric Grognard, Suzanne Touzeau

Local stability properties of the coexistence steady-state in the chemostat system with a perturbation term 2762
Claudia Alvarez-Latuz, Terence Bayen, Jérôme Coville

The role of enrichment and biological pressure on toxicant control policies in food web dynamics: a modeling approach 2768
Alessandra Gragnani

Automatic water stress estimation from leaf turgor pressure based on machine learning 2774
Jaime Palomo, Rafael Romero, Maria V. Cuevas, Teodoro Alamo, David Muñoz De La Peña

Lower bound computation of L_{2+} induced norm for scalar LTI systems* 2780
Noboru Sebe, Yoshio Ebihara, Hayato Waki, Kana Shikada, Dimitri Peaucelle

On Duality of the L_2/L_1 and L_∞/L_2 Hankel Norms in Linear Periodically Time-Varying Systems 2786
Takumi Hondo, Tomomichi Hagiwara

Robust Partial-State Estimation under Concept Shift using Causal Physics Features: Solenoid Position Estimation 2792
Kenzo Uhlig, Michael Hilsch, Eric Lenz, Matthias Woehrle, Rolf Findeisen

Robust Nonlinear Trajectory Tracking Control for Autonomous Racing on Three-Dimensional Tracks 2800
Joscha F. Bongard, Georg Jank, Simon Sagmeister, Boris Lohmann

On the Global Optimality of Linear Policies for Sinkhorn Distributionally Robust Linear Quadratic Control 2808
Riccardo Cescon, Andrea Martin, Giancarlo Ferrari-Trecate

Semidefinite Programming for Domain Randomization in LQR 2814
Abbas Pasdar, Farnaz Adib Yaghmaei

Gramian-Based Sea Current-Aware MPC for Energy-Efficient Autonomous Surface Vehicle Navigation 2821
Spyridon Syntakas, Kostas Vlachos

Toward a Decision Support System for Energy-Efficient Ferry Operation on Lake Constance based on Optimal Control 2827
Hannes Homburger, Bastian Jäckl, Stefan Wirtensohn, Christian Stopp, Maximilian T. Fischer Moritz Diehl, Daniel A. Keim, Johannes Reuter

Path-following for Underactuated Surface Vessel using Integrated Guidance and Control Approach 2833
Ram Milan Kumar Verma, Shashi Ranjan Kumar, Hemendra Arya

Straight-Line Path Following for a Towed Marine System∗ 2839
Josef Matouš, Kristin Y. Pettersen, Damiano Varagnolo, Marius S. Rundhovde

Closed Form Modelling and Identification of Banking Effects in Confined Waters 2847
Jeppe H. Mikkelsen, Thomas T. Enevoldsen, Bugge T. Jensen, Michael Jeppesen, Roberto Galeazzi Dimitrios Papageorgiou

An experimental comparison of azimuth thrust allocation methods 2853
Andreas Gudahl Tufte, Eivind Stellef Rønningen, Miguel Hinostroza, Morten Breivik Kim Alexander Christensen, Alexey Gusev

Modelling the coevolution of opinion dynamics and decision making in social dilemmas 2861
Ella C. Davidson, Lorenzo Zino, Ming Cao, Mengbin Ye

Approximate Simulation-Based Verification of Compatibility of the Friedkin–Johnsen Model with Binary Observations * 2867
Yu Xing, Aneesh Raghavan, Michael T. Schaub, Karl H. Johansson

Cohort separation in multipolar opinion dynamics 2873
Luka Baković, Mark Jeeninga, Emma Tegling

Topology Identification of Dynamical Signed Graphs 2879
Pelin Sekercioglu, Nana Wang, Angela Fontan, Dimos V. Dimarogonas

Global Synchronization Preserving Model Reduction of a Class of Networked Control-Affine Systems 2885
Yangming Dou, Xiaodong Cheng, Yu Kawano, Jacquelien M. A. Scherpen

Stabilizing NMPC for a Quad-tiltrotor UAV on the Extended SE(3) Manifold* 2891
Aclécio J. Santos, Jean C. Pereira, Guilherme V. Raffo

Energy-aware Model Predictive Variable Impedance Control 2898
Michele Sandrini, Nicola Piccinelli, Riccardo Muradore

Point-to-Cloud NMPC with Smooth Avoidance Constraints* 2904
Brener G. Ferreira, Vinicius M. Gonçalves, Marcelo A. Santos, Guilherme V. Raffo

Real-Time Non-Smooth MPC for Switching Systems: Application to a Three-Tank Process 2910
Hendrik Alsmeier, Felix Häusser, Andreas Knödler, Armin Nurkanović, Anton Pozharskiy, Moritz Diehl Rolf Findeisen

Spatially-Lifted SCvx NMPC for an Articulated Loader under Time-Corridor Constraints 2916
Thanh Binh Do, François Guérin

Unifying Sequential Quadratic Programming and Linear-Parameter-Varying Algorithms for Real-Time Model Predictive Control 2924
Kristóf Floch, Amon Lahr, Roland Tóth, Melanie N. Zeilinger

Consensus in Plug-and-Play Heterogeneous Dynamical Networks: A Passivity Compensation Approach 2932
Yongkang Su, Sei Zhen Khong, Lanlan Su

Scaled relative graph computation for piecewise linear systems 2938
Hoang Chu, Timo De Groot, S.J.A.M. Van Den Eijnden, W.P.M.H. Heemels

Structure-Preserving Model Reduction of Negative Imaginary Systems 2944
Chang Liu, Lanlan Su, Alexander Lanzon

Dissipativity-Based Distributed Control and Communication Topology Co-Design for Robust AC Microgrids 2950
Mohammad Javad Najafirad, Shirantha Welikala, Lei Wu, Panos J. Antsaklis

Robust data-driven incremental passivation and output regulation via noisy data 2958
Yixuan Liu, Meichen Guo

Data-driven feedback passivation of switched linear systems 2964
Meichen Guo, Sergio Grammatico

Cost Identification in Finite-horizon Linear Quadratic Gaussian Games 2970
Kai Ren, Maryam Kamgarpour

A Hybrid Algorithm for Monotone Variational Inequalities 2976
Reza Rahimi Baghbadorani, Peyman Mohajerin Esfahani, Sergio Grammatico

Strategic Dispatching Equilibrium under Competition in Multi-Regional Ride-Hailing Markets 2982
Ran Chen, Nikolas Geroliminis

Towards Fair and Efficient allocation of Mobility-on-Demand resources through a Karma Economy 2988
Matteo Cederle, Saverio Bolognani, Gian Antonio Susto

On solving the closed-loop setpoint regulation problem for the replicator equation via nonlinear MPC 2994
Giulia Brusadin, Michele Pagone, Lorenzo Zino, Alessandro Rizzo

Imitation Dynamics in Population Games Over Large-Scale Networks 3000
Giacomo Como, Fabio Fagnani, Sandro Zampieri

Distributed Localization and Safe Control for Multi-Agent UAV-Assisted 5G Networks 3006
Oumayma Saadani, Patrick Coirault, Frederic Launay

Path-following Control of a Quadrotor using Quasi-Static Transverse Feedback Linearization 3012
Mohamed Al Lawati, Adeel Akhtar

Feedback Linearization of a Micro Tandem Helicopter 3018
Joachim Horn

Design of a Robust Fixed-Time Tracking Control for Quadrotors Unmanned Aerial Vehicles 3026
Moussa Labbadi, Gian Paolo Incremona, Antonella Ferrara

Fault-Tolerant Control of Quadcopters Using Online System Dynamics Identification 3032
Jolan Wauters, Simon Neuttiens, Guillaume Crevecoeur, Annelies Coene

Tracking Multiple Unmanned Aerial Vehicles using a Motion Capture System 3038
Sufyan Ali Memon, Ghulam E Mustafa Abro

New Representation of the Delay Lyapunov Function for a Scalar Linear Periodic Equation With Delay * 3044
Irina V. Aleksandrova, Juan J. L. Velázquez

A generalized global Hartman-Grobman theorem for asymptotically stable semiflows 3050
Wouter Jongeneel

Analytical Robustness Bounds for Interval Type-2 Fuzzy Systems via Convex Dissipativity 3056
Fendy Santoso

Model-Free Tracking Control of Petri Nets 3062
Jose Barbosa, Ping Zhang

Data-driven observability and detectability of linear discrete system 3068
Juhi Jaiswal, Raghunathan Rengaswamy

A framework for state estimation of timed DES under deterministic and non-deterministic dynamic observation mechanisms 3074
Dimitri Lefebvre

Expressive Power and Marking Reachability Conditions of Event Nets 3080
Jorge Júlvez

Risk-Averse Control for Continuous-Time Stochastic System Under Signal Temporal Logic Constraints 3086
En Lai, Riccardo Bonalli, Antoine Girard, Frédéric Jean

Exact Smooth Reformulations for Trajectory Optimization Under Signal Temporal Logic Specifications 3092
Shaohang Han, Joris Verhagen, Jana Tumova

On Tackling Complex Tasks with Reward Machines and Signal Temporal Logics 3098
Ana María Gómez Ruiz, Thao Dang, Alexandre Donzé

Inclusion conditions for the Constrained Polynomial Zonotopic case 3104
Bogdan Gheorghe, Amr Alanwar, Florin Stoican

Roundabout Constrained Convex Generators: A Unified Framework for Multiply-Connected Reachable Sets 3110
Peng Xie, Sabin Diaconescu, Florin Stoican, Amr Alanwar

Safe Stabilization of Cancer Dynamics via Formal Methods and Lyapunov Control: A Case Study on the Stepanova Model 3118
Zhibing Sun, Federico Baldisseri, Danilo Menegatti, Andrea Wrona, Jun Liu

On the use of PIDA controllers for the automatic control of neuromuscular blockade 3124
Michele Schiavo, Nicola Latronico, Teresa Mendonça, Massimiliano Paltenghi, Antonio Visioli

Safe Deep Reinforcement Learning Control of Type 1 Diabetes 3130
F. Baldisseri, G. Lops, M. M. H. Atanasious, D. Menegatti, V. Becchetti, F. Delli Priscoli, S. Mascolo V. A. Racanelli, A. Wrona

Nonlinear control of pinch valve actuators applied to mechanical ventilation 3136
Avinash Kumar, Luca Greco, William Pasillas-Lépine

An Adaptive Personalized Alarm System for Hypoglycemia and Hyperglycemia Prevention based on Online Learning 3142
Matteo Ragni, Zijie Lu, Chiara Toffanin, Francesca Boem

Modelling and Control of a Jamming-Based Soft Exoskeleton for Wrist Tremor Suppression 3148
Abdullah Almansour, Valerio Modugno, Elisa Setti, Yifan Wang, Ravi Vaidyanathan

Real-Time Nonlinear Moving Horizon Estimation of External Torque in Industrial Robot Joints 3156
Valentin Kamm, Christian J. E. Bauer, Jannik Lehner, Armin Lechler, Alexander Verl

Robust Nonlinear System Identification in Reproducing Kernel Hilbert Spaces via Scenario Optimization 3164
Jannis Lübsen, Annika Eichler

GP-based Offset-free MPC using Disturbance Models and MHE 3170
Florian Diepers, Elmar Ahle, Dirk Söffker

On Neuromorphic Signal Pre-Processing: Enabling Sampling in the Frequency Domain with an Adaptive Frequency Controller 3178
Hermann Folke Johann Rolf, Petro Feketa, Thomas Meurer

Detection of false data injection attacks to process plants: experimental evaluation and consequences of smart sensors and communication 3184
Felix Lattmann, Axel Dürrbaum, Tim Redding, Andreas Kroll

On Numerical Solutions of Sampled-Data Control Systems via Differential LMI Optimization 3192
B. Bhiri, I-Alexandru. Ivan, M. Zasadzinski

On the Convergence of an Opinion–Action Coevolution Model with Bounded Confidence 3198
Chen Song, Angela Fontan, Rong Su, Julien M. Hendrickx, Vladimir Cvetkovic, Karl H. Johansson

Optimal Activation in Asynchronous Opinion Dynamics 3205
Anton Proskurnikov, Roberta Raineri

Quantifying Control Performance Loss for a Least Significant Bits Authentication Scheme 3211
Bart Wolleswinkel, Riccardo Ferrari

Learning social influence networks from partial and aggregated opinions 3217
Cesare Donati, Constantino Lagoa, Chiara Ravazzi

Reference Output Tracking in Boolean Control Networks 3223
Giorgia Disarò, Maria Elena Valcher

Dynamic Event-triggered Prescribed Performance Control for SISO Pure-feedback Systems 3229
Thomais A. Aforozi, George A. Rovithakis

Further Exploration of a Laguerre Polynomial Based Sphere Decoding Algorithm for MPC of Inverters 3235
Adrián Parra Lafuente, Rudy Cepeda-Gomez

Lightweight Model Predictive Control for Spacecraft Rendezvous Attitude Synchronization 3241
Peter Stadler, Alexander Meinert, Niklas Baldauf, Alen Turnwald

An Improved Model Reference Predictive Control Method for Building Mass Dampers 3247
Yuta Tomiyoshi, Naoto Yoshida, Masaki Takahashi

Nonlinear Model Predictive Control of Electric Minibus Integrated Cabin and Powertrain Heat Pump Coolant Loop 3255
Filip Miklaužić, Ivan Cvok

Nonlinear Model Predictive Control of Canal Networks with Mobile Sensing and Actuation Robots* 3263
Fabio Zamboni, Jose M. Maestre, Toshiyuki Ohtsuka, Lalo Magni

Model Predictive Contouring Control for Near-limit Handling in Autonomous Racecars 3269
Ioannis Mandalas, Abhijeet M. Kulkarni, Ioannis Poulakakis

A robust recursive least squares adaptive estimation approach 3276
Martin Guay, Denis Dochain, Shimin Wang

Distributed State Estimation of Discrete-Time LTI Systems via Jordan Canonical Representation 3282
Giulio Fattore, Maria Elena Valcher, Rui Gao, Guang-Hong Yang

Consensus-based Robust Kalman Filtering for Distributed State Estimation in Sensor Networks 3288
Fatemeh Rastgar, Mehdi Rahmani

Remote Estimation under Energy-Aware Multisensor Admission Control over Unreliable Channels 3294
Evagoras Makridis, Ioannis Tzortzis, Themistoklis Charalambous

Robust Projected Adaptive High-Gain Observer for Feedback Control of Buck Converters: Practical ISS 3300
Gualberto Solis-Perales, Adriana Aguilera-González

Human-in-the-loop: Real-time Preference Optimization 3306
Wenbin Wang, Wenjie Xu, Colin N. Jones

A condensing approach for linear-quadratic optimization with geometric constraints 3312
Alberto De Marchi

A Sequential Operator-Splitting Framework for Exploration of Nonconvex Trajectory Optimization Solution Spaces 3318
Justin Ganiban, Natalia Pavlasek, Behçet Açıkmeşe

An Alternative State-Space Realization for Optimal Gradient Based Online Optimization Algorithms with Exact Tracking 3325
Alex Xinting Wu, Ian R. Petersen, Iman Shames

Coordinate-Based Optimization for Fast Moving Horizon Estimation 3331
Dyhia Bouhadjra, Mauro Gaggero
