Sponsored and Published by
SPIE

Volume 14197

Proceedings of SPIE 0277-786X, V. 14197

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIEDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:
Author(s), "Title of Paper," in *Enhanced Spectroscopies and Nanoimaging 2026*, edited by Prabhat Verma, Yung Doug Suh, Proc. of SPIE 14197, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B … 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v *Conference Committee*

SURFACE-ENHANCED RAMAN SPECTROCOPY I

14197 02 **Surface-enhanced two-photon excited emission via continuous-wave laser utilizing plasmonic nanowires (Invited Paper)** [14197-5]

PLASMONICS AT NANOSCALE

14197 03 **Strong-coupling of quantum emitters in plasmonic nanocavities (Invited Paper)** [14197-12]

TIP-ENHANCED RAMAN SPECTROSCOPY II

14197 04 **Vibrational Stark shift of CO on Cu(001) observed by tip-enhanced Raman microscopy (Invited Paper)** [14197-16]

14197 05 **First-principles simulation of the vibrational Stark effect of CO on Cu(001)** [14197-18]

METASURFACES FOR NANOINVESTIGATION

14197 06 **Opioid sensing with plasmonic metasurfaces** [14197-33]

OTHER PHENOMENA AT NANOSCALE I

14197 07 **Plasmonic structured illumination enables super-resolution digital nanoparticles analysis** [14197-44]

POSTER SESSION

14197 08 **Resonance gradient deep-ultraviolet high-Q metasurfaces for surface enhanced deep-ultraviolet absorption (SEDUVA)** [14197-46]

14197 09 **Relative Raman scattering cross sections of aqueous glucose** [14197-49]
