Volume 14228

Proceedings of SPIE 0277-786X, V. 14228

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIEDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:
Author(s), "Title of Paper," in *Quantum Communications and Quantum Imaging XXIV*, edited by Keith S. Deacon, Ronald E. Meyers, Proc. of SPIE 14228, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B … 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v *Conference Committee*

QUANTUM COMMUNICATIONS AND QUANTUM IMAGING I

14228 02 **Continuous-variable quantum machine learning on a programmable photonic processor** [14228-5]

QUANTUM COMMUNICATIONS AND QUANTUM IMAGING II

14228 03 **A non-Hermitian Bloch oscillation platform** [14228-8]

14228 04 **Towards Dynamical Casimir sourced N00N states for quantum sensing** [14228-9]

QUANTUM COMMUNICATIONS AND QUANTUM IMAGING III

14228 05 **Quantum random number generator based on branching path approach with single detector** [14228-12]

14228 06 **Scaling up multimode entanglement generated by mode-swapping (Invited Paper)** [14228-13]

14228 07 **Characterization of QBER contributions in phase-encoding QKD transmitters with an optical coherent receiver** [14228-14]

QUANTUM COMMUNICATIONS AND QUANTUM IMAGING IV

14228 08 **Low-loss chip-to-free-space connectivity via hybrid Si-on-TFLN: efficient and scalable grating couplers for quantum SoC integration** [14228-16]

14228 09 **Review of twin-field quantum key distribution: from theoretical architectural variants to practical implementations (Invited Paper)** [14228-23]

POSTER SESSION

14228 0A **Actively phase-stabilized fiber-based Mach–Zehnder interferometer for quantum interference measurements** [14228-21]

14228 0B **Applications of quantum remote sensing in aerospace information systems** [14228-22]

DIGITAL POSTER SESSION

14228 0D **Adaptive optics implementation for QBER reducing technique in lab experiment** [14228-19]
