Volume 14381

Proceedings of SPIE 0277-786X, V. 14381

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIEDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:
Author(s), "Title of Paper," in *International Conference on Algorithms, Machine Learning, and Image Processing (AMLIP 2026)*, edited by Abdurazzag Ali Aburas, Kannimuthu Subramaniyam, Zhihui Wu, Proc. of SPIE 14381, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B … 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

vii *Conference Committee*

IMAGE PROCESSING AND COMPUTER VISION

14381 02 **Design of tracking system for satellite acquisition device based on computer vision** [14381-43]

14381 03 **Information association network for foreground segmentation in infrared videos** [14381-13]

14381 04 **Daw-Mamba: domain-aware and wavelet-guided MambaIRv2 for cross-domain brain MRI super-resolution** [14381-40]

14381 05 **Research on automatic crack recognition of self-locking masonry wall based on convolutional neural network** [14381-27]

14381 06 **A dynamic obstacle avoidance method for autonomous driving of new energy vehicles based on visual image perception and semantic segmentation** [14381-8]

14381 07 **WeedDensitySet: a UAV weed segmentation dataset with hierarchical density annotation** [14381-28]

14381 08 **St-GraphTokenformer: a spatial-temporal graph token transformer for human action recognition** [14381-31]

14381 09 **Dynamic density control for 3D Gaussian splatting scene reconstruction** [14381-3]

14381 0A **Deep learning-based fruit object detection and ripeness grading** [14381-25]

14381 0B **A lightweight method for weed detection based on deep learning** [14381-66]

14381 0C **A review of video action recognition algorithm based on deep learning** [14381-32]

14381 0D **Research on rice disease and pest detection algorithm based on EBP-YOLOv11** [14381-45]

14381 0E **An empirical study of teacher supervision failure in adversarial distillation for lightweight visual recognition** [14381-5]

14381 0F **Fine-grained image recognition and feature visualization of mold spots on tobacco leaves based on multispectral imaging and YOLOv8** [14381-12]

14381 0G **VMDD: variable-mask discrete diffusion for unifying image generation and visual representation learning** [14381-58]

14381 0H **Real-time 3D Gaussian scene reconstruction based on multisensor fusion SLAM in dynamic scenes** [14381-39]

14381 0I **Denoising of seabed sediment images based on degradation-aware spatial modulation network** [14381-4]

14381 0J **An improved YOLOv11n-based algorithm for small object detection in complex environments** [14381-47]

14381 0K **Infrared and visible image fusion based on negative-value calibration and adaptive hierarchical activation** [14381-38]

14381 0L **Infrared and visible image fusion based on nested model decomposition for autonomous driving** [14381-29]

14381 0M **Task-adaptive head refinement of YOLO26 for road pavement distress detection** [14381-11]

14381 0N **SDK-FPN: a lightweight dual-kernel feature pyramid network for UAV small object detection** [14381-9]

ALGORITHMS AND MACHINE LEARNING

14381 0O **Spatio-temporal risk prediction and rolling resource scheduling for post-disaster emergency communication coverage recovery** [14381-6]

14381 0P **Data-driven personalized tourism recommendation via BERTopic-based text mining** [14381-1]

14381 0Q **Hierarchical structural trajectory similarity learning** [14381-37]

14381 0R **Visible-modality-guided dynamic prototype prompting for multimodal sentiment analysis with missing modalities** [14381-36]

14381 0S **Comparative evaluation of multi-algorithm ensemble strategies for intelligent long-term prediction of embankment settlement on soft clay ground** [14381-59]

14381 0T **Research on motion path planning of wheeled soft robot based on A* algorithm** [14381-26]

14381 0U **SecADLog: LLM-prompted security semantic knowledge-enhanced anomaly detection for cybersecurity logs** [14381-14]

14381 0V **Relative navigation information-based transfer alignment method for inertial navigation system** [14381-15]

14381 0W **Remaining useful life prediction for power MOSFETs based on degradation perception** [14381-41]

14381 0X **Probabilistic time series forecasting method for nuclear power plants based on Bayesian LSTM** [14381-33]

14381 0Y **IAG-FSAD: a few-shot anomaly detection based on importance-aware-guided local feature enhancement and global feature filtering** [14381-30]

14381 0Z **When does learning-guided operator selection fail in electric vehicle routing?** [14381-44]

14381 10 **Wavelet-domain denoising methodologies for subaqueous tunnel SHM: a comparative performance assessment** [14381-51]

14381 11 **Adaptive neuro-fuzzy ensemble architecture with performance-driven weight allocation for geotechnical settlement prediction in transport infrastructure** [14381-63]

14381 12 **Smart inversion of constitutive parameters and deformation forecasting via gradient-free optimization coupled with finite element analysis** [14381-48]

14381 13 **A grey theoretical framework for few-shot time-series forecasting of high embankment settlement with integrated interpretable learning** [14381-60]

14381 14 **Patient-specific epileptic seizure detection method via an intra-meta multibranch spatio-temporal attention network** [14381-16]

14381 15 **Design of quantized fault detection algorithm for delayed nonlinear systems under dynamic round-robin protocol** [14381-7]

14381 16 **COPED-FU: a federated unlearning algorithm based on cached orthogonal projection and energy-budget intensity decay** [14381-10]

14381 17 **A federated graph learning method based on personalized prototype aggregation and structure-aware augmentation** [14381-17]

14381 18 **Round-robin protocol-based progressive Bayesian filtering for nonlinear systems against random DoS attacks** [14381-2]

14381 19 **Neural-network-aided recursive state estimation for a class of stochastic systems with unknown nonlinearity, non-Gaussian noises, and coding strategy** [14381-42]

14381 1A **Time-series settlement prediction through a hybrid intelligent framework coupling Pearson-guided feature screening with evolutionarily optimized neural learning** [14381-50]
