PROCEEDINGS OF SPIE

International Conference on Advances in Energy and Environmental Engineering (AEEE 2026)

Najib Essounbouli
Guang-Liang Feng
Hamid Gualous
Editors

17–19 July 2026
Wuhan, China

Organized by
Southwest Jiaotong University (China)
Henan Polytechnic University (China)

Sponsored by
Highway Engineering Key Laboratory of Sichuan Province (China)
Hubei Yueqiao Technology Co., Ltd. (China)

Published by
SPIE

Volume 14510

Proceedings of SPIE 0277-786X, V. 14510

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIEDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:
Author(s), "Title of Paper," in *International Conference on Advances in Energy and Environmental Engineering (AEEE 2026)*, edited by Najib Essounbouli, Guang-Liang Feng, Hamid Gualous, Proc. of SPIE 14510, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B … 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

vii *Conference Committee*

GREEN ENERGY AND SYSTEM

14510 02 **In situ K doping towards efficient Cu(In, Ga)Se_2 solar cells in direct sputtering process** [14510-23]

14510 03 **A validity-range-based benchmark of liquid-metal heat transfer correlations for nuclear energy systems** [14510-9]

14510 04 **Coordinated multiarea optimization for hosting capacity enhancement in active distribution networks with high renewable energy penetration** [14510-33]

14510 05 **Design and analysis of energy consumption characteristics and techno-economic performance of a biomass boiler and coal-fired boiler steam-side coupling system** [14510-5]

14510 06 **Spatio-temporal distribution of Cu I excitation temperature in SF_6 arcs with different effective currents** [14510-3]

14510 07 **Hydrodynamic and sediment transport characteristics of an offshore wind farms in complex hydrodynamic environments** [14510-14]

14510 08 **In-situ stress field inversion for pumped storage underground caverns: comparing GA-BP neural network and multivariate regression** [14510-22]

14510 09 **Analysis of hydrogen induced stress corrosion leakage of water wall tubes in supercritical power plant boilers** [14510-21]

14510 0A **Determinants of carbon total factor productivity in the Beijing-Tianjin-Hebei region: a machine learning approach** [14510-16]

14510 0B **Primary frequency control performance comparison of a new thermal power plant under different regulation methods** [14510-8]

14510 0C **Rearward amplification of a three-unit articulated electric vehicle under front-rear traction allocation: experiments and same-input simulations** [14510-37]

14510 0D **Study on the degradation laws of critical current and damage mechanisms in REBCO high-temperature superconducting strips over a wide load range** [14510-13]

CIVIL AND ENVIRONMENTAL ENGINEERING

14510 0E **UAV LiDAR-based identification method for valley-type debris flows in southeastern Tibet** [14510-36]

14510 0F **A study on surface runoff prediction in Guangzhou using the SCS-CN model** [14510-7]

14510 0G **Low-carbon evaluation and carbon quantification for highway reconstruction and expansion projects: framework development and engineering applications** [14510-2]

14510 0H **Upper bound solution under rainfall-earthquake coupling for curvilinear shallow landslides considering progressive failure mechanism** [14510-32]

14510 0I **Study on the influence laws of geology and stress on the occurrence time of rockburst in deep-buried borehole-blasting tunnels** [14510-38]

14510 0J **Study on the method system for estimating the resource quantity of urban underground space** [14510-18]

14510 0K **Numerical simulation study on the bearing performance of squeezed branch piles in deep soft foundation and the influence of branch and plate parameters** [14510-24]

14510 0L **Mechanical response and performance evaluation of a novel cold-formed grouted sleeve under seismic loading based on Abaqus** [14510-17]

14510 0M **Prestressing state of PCCP based on elasto-magnetic effect** [14510-11]

14510 0N **Research on the evaluation method system of urban underground space resource value** [14510-19]

14510 0O **Probabilistic reference finite element model of a tunnel based on strain monitoring data** [14510-12]

14510 0P **Using BOTDA to measure the distributed strain of PCCPs with large diameters under internal water** [14510-39]

14510 0Q **Analysis of the correlation between deflection basins on rigid pavements and stiffness radius** [14510-25]

INTERDISCIPLINARY APPLICATIONS AND TECHNOLOGIES

14510 0R **Error calibration of inertial measurement unit based on strapdown inertial navigation system** [14510-35]

14510 0S **Full-traffic fault diagnosis for industrial control networks in oil and gas production** [14510-31]

14510 0T **Comprehensive exploitation technology and application of residual oil in transition zone during ultra-high water cut period** [14510-4]

14510 0U **Progress, geological characteristics and resource potential of continental shale oil exploration and development in China** [14510-15]

14510 0V **Structural strength verification and analysis of stern A-frame of a research vessel under complex operating conditions** [14510-34]

14510 0W **Study on route design methods for submarine cables and pipelines** [14510-6]

14510 0X **Research on abnormality identification technology of belt conveyor idlers based on acoustic signals** [14510-1]
